

Reading German Script III

When starting a search, we need a specific name, birth-date (or at least a birth year) and/or the birth place with the correct country. (This may be the location of the parish).

With this we are able to start searching with a search engine— as shown on the previous page's hypothetical example.

Example:

Search input: Justina Catharina GRUEBEREN

First result: www.nw-service.at/familiewl/dornstadt.ged

Apparently someone (actually myself) has already done this search and via the link at the website contact can be made with the other researcher.

This is an important basic principle: before starting any research, check to see whether someone has already done research on that ancestral line.

There are many data bases available on the internet where researchers make their research available.
