

Using either *Zen in the Art of Writing* or *On Writing Well*, come up with five principles of strong writing that you believe the author would endorse. Remember, you are not summarizing what the author said in the book; you are using your previous knowledge and the book to create your own ideas about what makes strong writing.

Put your principles into the following format:

"Strong writers....

1. Strong writers have a personal connection and passion to the topic they are writing about.
2. Strong writers write fast and don't stop, this way you get the full truth.
3. Strong writers start by making a prescription list of adjectives and nouns help create quick creative inspiration to write about.
4. Strong writers use what we have experienced with our 5 senses and experiences over our lifespan to create our muse, which is a key concept in our style of writing.
5. Strong writer's success depends on how well they know their own life, which is the most important subject to know.

For your assessment, select any essay you have written in this segment and analyze your own writing. Reflect on the five principles of strong writing you created from your reading synthesis, and then write a paragraph reflecting how your writing incorporates—or could incorporate with revisions—all five principles. Use actual examples from your essay to support your reflection.

Spiritual songs and modern protest songs are years apart but so similar in purpose and idea. The Underground Railroad was a point in history that created many spiritual songs about the time. For example "Swing Low, Sweet Chariot," by Fats Waller. Nowadays some big ideas expressed in songs are racial equality, gun violence, and feminism. Kendrick Lamar has many powerful protest songs but one specifically stands out, "DNA". Both "DNA" and "Swing Low, Sweet Chariot" use rhetorical strategies to get their message across, specifically pathos.

Pathos tries to connect with the reader emotionally. Swing low, Sweet Chariot does a great job with conveying this through symbolism. Swing low, Sweet chariot was about the slaves that tried to escape to the north through the Underground Railroad. However it could also just be referencing the Old Testament. The first line says, "Swing low, Sweet Chariot / Comin' for to carry me home". "Sweet Chariot" means the Underground Railroad and "Comin' for to carry me home" means to take us to the North. This connected to slaves at the time emotionally as they were living with in these conditions. The slaves were waiting and wishing to be able to find a way to the North. The Underground Railroad was a hidden route to the North and it had safe housing for the slaves that were trying to escape. Now when

**Design and Construction of LNG Storage Tanks** Josef Rötzer, 2019-11-12 Worldwide the use of natural gas as a primary energy source will remain vital for decades to come This applies to industrialized emerging countries and developing countries Owing to the low level of impurities natural gas is considered to be a climate friendly fossil fuel because of the low CO2 emissions but is at the same time an affordable source of energy In order to enable transport over long distances and oceans and hence create an economic and political alternative to pipelines the gas is liquefied which is accompanied by a considerable reduction in volume and then transported by ship Thus at international ports many LNG tanks are required for temporary storage and further use The trend towards smaller liquefaction and regasification plants with associated storage tanks for marine fuel applications has attracted new players in this market who often do not yet have the necessary experience and technical expertise It is not sufficient to refer to all existing technical standards when defining consistent state of the art specifications and requirements The switch to European standardisation has made it necessary to revise and adapt existing national codes to match European standards Technical committees at national and international level have begun their work of updating and completing the EN 14620 series In the USA too the corresponding regulations are also being updated The revision of American Concrete Institute standard ACI 376 Requirements for Design and Construction of Concrete Structures for the Containment of Refrigerated Liquefied Gases first published in 2011 will be completed in the spring of 2019 and the final version published in autumn 2019 This book provides an overview of the state of the art in the design and construction of liquefied natural gas LNG tanks Since the topic is very extensive and complex an introduction to all aspects is provided e g requirements and design for operating conditions thermal design hydrostatic and pneumatic tests soil surveys and permissible settlement modelling of and calculations for the concrete structure and the actions due to fire explosion and impact Dynamic analysis and the theory of sloshing liquid are also presented **Report of the Public**

shows the similarities across Gabriel Harvey's poetic canon stretching from his critically ignored self-attributed *Smith* 1578 his famous Edmund Spenser bylined *Fairy Queen* 1590 and his semi-recognized Samuel Brandon bylined *Virtuous Octavia* 1598. This close analysis of *Smith* is essential for explaining all of Harvey's multi-bylined output because *Smith* is an extensive confession about Harvey's ghostwriting process. Harvey's *Fairy Queen* is his mature attempt at an extensive puffery of a monarch which has been as Harvey predicted in *Smith* and Ciceronianus in return over-puffed as a great literary achievement by monarchy conserving literary scholars across the past four hundred years. The relatively superior in its condensed social message and literary achievement, *Smith* has been ignored in part because the subject of its puffery appears trivial from the perspective of national propaganda. *Smith* Or The Tears of the Muses is a metered poetic composition that can also be performed as a multi-monologue play. The central formulaic structure is grounded in nine Cantos that are delivered by each of the nine Muses; this formula appeared in many British poems and interludes after its appearance in Nicholas Grimald's translation of a Virgil assigned poem called *The Muses in Songs and Sonnets* 1557. The repetitive nature of this puffing formula is subverted not only by the satirical and ironic contradictions that are mixed with the standard exaggerated flatteries of Sir Thomas Smith, Elizabeth's Secretary, but also with several seemingly digressive sections that puff and satirize other bylines including Walter Mildmay, King's Councilor, and John Wood, Smith's copyist and nephew. The central subject of the satire in *Smith* is Richard Verstegan's career as a goldsmith who forged antiques and committed identity fraud that included ghostwriting books under multiple bylines. Including passing himself as Harvey points out as at least two different Sir Thomas Smiths. The introduction to this volume includes matching handwritten letters that were written by Smith 1 who died in 1577 and Smith 2 who died in 1625 and by Verstegan under his own byline. In *Smith*'s conclusion, Verstegan responds with ridicule of his own directed at Harvey. This is the first full translation of *Smith* from Latin into English. The accompanying introductory matter, extensive annotations, and class exercises hint at the many scholarly discoveries attainable by researchers who continue the exploration of this elegant work. [A Restitution for Decayed Intelligence in Antiquities](#) Richard Verstegan, 2023-05-02. The launch of Britain's Anglo-Saxon origin myth and the first Old English etymological dictionary. This is the only book in human history that presents a confessional description of criminal forgery that fraudulently introduced the legendary version of British history that continues to be repeated in modern textbooks. Richard Verstegan was the dominant artist and publisher in the British Ghostwriting Workshop that monopolized the print industry across a century. Scholars have previously described him as a professional goldsmith and exiled Catholic propaganda publisher, but these qualifications merely prepared him to become a history forger and multi-sided theopolitical manipulator. The BRRAM series computational linguistic method attributes most of the British Renaissance's theological

output including the translation of the King James Bible to Verstegan as its ghostwriter Beyond providing handwriting analysis and documentary proof that Verstegan was the ghostwriter behind various otherwise bylined history changing texts this translation of Verstegan's self attributed Restitution presents an accessible version of a book that is essential to understanding the path history took to our modern world On the surface Restitution is the first dictionary of Old English and has been credited as the text that established Verstegan as the founder of Anglo Saxon studies The Exordium reveals a much deeper significance behind these firsts by juxtaposing them against Verstegan's letters and the history of the publication of the earliest Old English texts to be printed starting in 1565 at the same time when Verstegan began his studies at Oxford Verstegan is reinterpreted as the dominant forger and self translator of these frequently non existent manuscripts whereas credit for these Old English translations has been erroneously assigned to puffed bylines such as Archbishop Parker and the Learned Camden's Society of Antiquaries When Verstegan's motives are overlayed on this history the term Anglo Saxon is clarified as part of a Dutch German propaganda campaign that aimed to overpower Britain by suggesting it was historically an Old German speaking extension of Germany's Catholic Holy Roman Empire These ideas regarding a pure German race began with the myth of a European unified origin myth with their ancestry stemming from Tuisco shortly after the biblical fall of Babel Tuisco is described variedly as a tribal founder or as an idolatrous god on whom the term Teutonic is based This chosen people European origin myth was used across the colonial era to convince colonized people of the superiority of their colonizers A variant of this myth has also been reused in the Aryan pure race theory the term Aryan is derived from Iran according to the theology Verstegan explains this pure Germanic race originated with Tuisco's exit from Babel in Mesopotamia or modern day Iraq but since Schlegel's 1808 introduced the term Aryan this theory's key term has been erroneously referring to modern day Iran in Persia Since Restitution founded these problematic Anglo Saxon ideas the lack of any earlier translation of it into Modern English has been preventing scholars from understanding the range of deliberate absurdities contradictions and historical manipulations behind this text And the Germanic theological legend that Verstegan imagines about Old German deities such as Thor Zeus thunder Friga Venus love and Seater Saturn is explained as part of an ancient attempt by empires to demonize colonized cultures when in fact references to these deities were merely variants of the Greco Roman deities names that resulted from a degradation of Vulgar Latin into early European languages Translations of the earlier brief versions of these legends from Saxo 1534 1234 John the Great 1554 and Olaus the Great 1555 shows how each subsequent history adds new and contradictory fictitious details while claiming the existence of the preceding sources proves their veracity This study also questions the underlying timeline of British history proposing instead that DNA evidence for modern Britons indicates most of them were Dutch Germans who migrated during Emperor Otto I's reign 962 973 when Germany first gained control over the Holy Roman Empire and not in 477 as the legend of Hengist and Horsa as Verstegan satirically explains both of these names mean horse dictates The history of the origin of Celtic languages such as Welsh is

also undermined with the alternative theory that they originated in Brittany on France's border as opposed to the current belief that British Celts brought the Celtic Breton language into French Brittany when they invaded it in the 9th century. There are many other discoveries across the introductory and annotative content accompanying this translation to stimulate further research.
