The Conundrum of Human Behavior in the Social Environment presents theories of behavioral change that can be facilitated by practitioners to eliminate or modify undesirable behaviors as well as provides a framework useful for understanding how a macro system consisting of four societal forces: social justice, social problems, social policy, and the political economy works to influence a micro system of community, organizational, and group dynamics. Four types of HB and SE course outlines are presented and discussed with an eye toward strengthening foundation courses along with an analysis of fourteen frequently used Human Behavior and Social Environment textbooks based on the Council on Social Work Education's 2001 guidelines that also offers a framework for integrating content. The application of the transtheoretical model of behavioral change to the welfare-to-work transition with public housing residents is presented using both quantitative and qualitative data that has been closely analyzed. The Conundrum of Human Behavior in the Social Environment provides extensive references, clear and helpful figures and tables of data, numerous appendices of useful, detailed outlines and descriptions of textbooks, lists of Web sites, a syllabi, and course sequence description for micro, macro, mezzo issues.
