Konstantopoulos, Sophus Helle, 2023-03-27 How were narratives composed in the ancient Near East What patterns and principles constraints and considerations guided the shaping of cuneiform stories The study of narrative structures has emerged as a promising approach to the textual heritage of the cuneiform world Engaging with practically any ancient text whether literary historical or religious requires some understanding of the narrative forms that shaped their content This volume gives researchers the tools to better understand those form illustrating each approach to narrative analysis with a case study from the cultures of the ancient Near East Sumerian Babylonian Assyrian and Hittite Women's Writing of Ancient Mesopotamia Charles Halton, Saana Svärd, 2018 This anthology translates and discusses texts authored by women of ancient Mesopotamia Gilgamesh Louise M. Pryke, 2019-03-15 Gilgamesh focuses on the eponymous hero of the world's oldest epic and his legendary adventures However it also goes further and examines the significance of the story's Ancient Near Eastern context and what it tells us about notions of kingship animality and the natures of mortality and immortality In this volume Louise M Pryke provides a unique perspective to consider many foundational aspects of Mesopotamian life such as the significance of love and family the conceptualisation of life and death and the role of religious observance The final chapter assesses the powerful influence of Gilgamesh on later works of ancient literature from the Hebrew Bible to the Odyssey to The Tales of the Arabian Nights and his reception through to the modern era Gilgamesh is an invaluable tool for anyone seeking to understand this fascinating figure and more broadly the relevance of Near Eastern myth in the classical world and beyond How Isaiah Became an Author David Davage, 2022-08-30 Traditionally biblical studies has been an academic discipline with roots deeply embedded in historical inquiries about the genesis of texts It should come as no surprise that a significant amount of scholarly attention has been on the formation of the book of Isaiah especially since the compelling imagination of Isaiah comprises an anthology of prophetic voices each with its own historical context At the same time it is well known that the chasteness of ancient texts discloses precious little specific information to aid with this reconstructive task How Isaiah Became an Author tackles this historical irony head on David Davage begins by describing two contrasting ways authorship was conceived in antiquity Mesopotamian and Greek He next analyzes the processes through which Isaiah ben Amos came to be imagined as an author of the book of Isaiah In doing so Davage changes the question from Who wrote the book of Isaiah to How and in what ways was the relation between the prophet called Isaiah and the book that came to bear his name conceived in the Second Temple period Davage shows how a prophetic anthology that

originally circulated anonymously eventually became transmitted together with a name Although that name originally did not convey any notion of penning but rather portrays Isaiah ben Amos as a tradent of divine revelation transmitted by many agents over time it came to be reimagined as a statement about the origins of the book This transformation is then explained as the result of negotiations between the Mesopotamian and the Greek author concepts in the late Second Temple period negotiations that have continued even to this day **The Formation of the 'Book' of Psalms** David Willgren,2016-09-30 By conceptualizing the Book of Psalms as an anthology and by inquiring into its poetics by means of paratextuality David Willgren provides a fresh reconstruction of its formation and concludes that it preserves a selection of psalms that is best seen not as a book of psalms but as a canon of psalms back of book The Cambridge Handbook of Literacy David R. Olson,Nancy Torrance,2009-02-16 This volume demonstrates how literacy is more than learning to read and write Literacy creates communities organizes personal and social lives makes possible civil society and the rule of law and underwrites the commitment of both modern and developing societies to universal education and ever higher levels of literate competence Everything that is involved in being and becoming literate is the concern of this interdisciplinary group of distinguished scholars
