Reading, Writing, and Speech Problems in Children and Selected Papers Samuel Torrey Orton, 1989 Rev ed of Reading writing and speech problems in children c1937      **The Mislabeled Child** Brock Eide, Fernette Eide, 2006-08-01 An incredibly reassuring approach by two physicians who specialize in helping children overcome their difficulties in learning and succeeding in school For parents teachers and other professionals seeking practical guidance about ways to help children with learning problems this book provides a comprehensive look at learning differences ranging from dyslexia to dysgraphia to attention problems to giftedness In *The Mislabeled Child* the authors describe how a proper understanding of a child's unique brain based strengths can be used to overcome many different obstacles to learning They show how children are often mislabeled with diagnoses that are too broad ADHD for instance or are simply inaccurate They also explain why medications are often not the best ways to help children who are struggling to learn The authors guide readers through the morass of commonly used labels and treatments offering specific suggestions that can be used to help children at school and at home This book offers extremely empowering information for parents and professionals alike *The Mislabeled Child* examines a full spectrum of learning disorders from dyslexia to giftedness clarifying the diagnoses and providing resources to help The Eides explain how a learning disability encompasses more than a behavioral problem it is also a brain dysfunction that should be treated differently      *The Unteachables* Keith A. Mayes, 2023-01-24 How special education used disability labels to marginalize Black students in public schools *The Unteachables* examines the overrepresentation of Black students in special education over the course of the twentieth century As African American children integrated predominantly white schools many were disproportionately labeled educable mentally retarded EMR learning disabled LD and emotionally behavioral disordered EBD Keith A Mayes charts the evolution of disability categories and how these labels kept Black learners segregated in American classrooms The civil rights and the educational disability rights movements Mayes shows have both collaborated and worked at cross purposes since the beginning of school desegregation Disability rights advocates built upon the opportunity provided by the civil rights movement to make claims about student invisibility at the level of intellectual and cognitive disabilities Although special education ostensibly included children from all racial groups educational disability rights advocates focused on the needs of white disabled students while school systems used disability discourses to malign and marginalize Black students From the 1940s to the present social science researchers policymakers school administrators and teachers have each contributed to the overrepresentation of Black students in special education Excavating the deep seated racism embedded in both the public school system and public policy *The Unteachables* explores the discriminatory labeling of Black students and how it indelibly contributed to special education disproportionality to student discipline and push out practices and to the school to prison pipeline effect      **Twentieth Century Reading Education: Understanding Practices of Today in Terms of Patterns of the Past** Gerard Giordano, 2021-09-13 This book
