Khoury,2020-07-09 Based on more than ten years of research All Students Can Succeed presents a comprehensive review of
research related to Direct Instruction DI a highly structured method of teaching based on the assumption that all students
can learn if given appropriate instruction The authors identify over 500 research reports published over the last 50 years and
encompassing almost 4 000 effect sizes no doubt the largest meta analysis of any single method of instruction ever published
Extensive statistical analyses show that estimates of DI s effectiveness are consistent over time with different research
approaches across different school environments students from all types of backgrounds different comparative programs and
both academic achievement and non academic outcomes including student self confidence Effects are substantially stronger
than those reported for other curricula When students have DI for more time and when teachers implement the programs as
designed the effects are even stronger Results indicate that DI has the potential to dramatically change patterns of student
achievement in the United States In an even handed style accessible to policy makers educators and parents the authors
