## **Readings In Ancient Western Philosophy:**

*Readings in Ancient Western Philosophy* George F. McLean, Patrick J. Aspell, 1970      *Readings in Ancient Western Philosophy*, 1970      From Athens to America Paul Dykes, John C. Powell, 2002-01-01 These readings from the literature of western philosophy have been collected to serve a practical home and classroom purposes to make available to readers a sampling of the ideas of some of history's great thinkers on the subject of human values. The selection is eclectic but not random. The excerpts included have been used in philosophy classes and have been the basis for thoughtful and spirited discussions. The intent of the anthologists is not to instill values but to encourage readers to test their own assumptions and opinions against a variety of ideas and to emerge from the encounter better prepared to shape the values by which they will live their own lives. This book contains selected passages from significant works by some of the most influential thinkers in western civilization such as Socrates, Bacon, Kant, Plato, Hobbes, Hegel, Aristotle, Descartes, Schopenhauer, Epicurus, Spinoza, Mill, Epictetus, Locke, Kierkegaard, Marcus Aurelius, Rousseau, Nietzsche, Augustine, Hume, James.      **An Unconventional History of Western Philosophy** Karen Warren, 2009-01-16 In this new account of Western philosophy throughout the past 2600 years, Karen J. Warren has paired sixteen women philosophers alongside their historical male contemporaries in conversations on philosophy. An overview essay together with chapter introductions, primary readings, and expert commentaries offer a rich description and evaluation of each philosopher's vital contribution to Western philosophy. Wohlrapp, 2014-06-26 Arguing that our attachment to Aristotelian modes of discourse makes a revision of their conceptual foundations long overdue the author proposes the consideration of unacknowledged factors that play a central role in argument itself These are in particular the subjective imprint and the dynamics of argumentation Their inclusion in a four dimensional framework subjective objective structural procedural and the focus on thesis validity allow for a more realistic view of our discourse practice Exhaustive analyses of fascinating historical and contemporary arguments are provided These range from Columbus s advocacy of the Western Passage to India over the trial of King Louis XVI during the French Revolution to today s highly charged controversies surrounding euthanasia and embryo research Excavating foundational issues such as the purpose of argument itself assent of an audience or critical examination of validity claims and the contested role of argument as a generator of knowledge the book culminates in a discussion of the relationship between rationality and reasonableness and

criticizes the restrictions of rational argument relying on fixed logical economic or cultural criteria that in reality are mutable Here a true open argument requires the infusion of Paul Lorenzen's principle of transsubjectivity which recognizes but transcends the partiality of the individual and which can be seen in the pragmatic and expanding consensus that humanity can control itself to safeguard the future of a fragile damaged world **Yonsei University Bulletin** Yöñse Taehakkyo,1972
