

Business Communication

What is Communication?

The word communication comes from a Latin word 'communicare' which means to 'share' or 'participate'.

Communication is the process by which we exchange meanings, facts, ideas, opinions or emotions with other people. It is the art of exchanging opinions, thoughts, facts and ideas in an emphatic manner so that the person at the other end receives and understands the subject matter involved clearly and perceives it in the same way it was intended by the sender.

According to Peter Little, "Communication is the process by which information is transmitted between individuals and/or organizations, so that it results in an understanding response."

Business Communication has become an absolute requirement for all organizations for various reasons, such as:

- * It acts as the basis of organizational growth in terms of human and public relations
- * It widens the outlook of people making them understand the business scenario from a broader perspective
- * Business Communication enhances the overall relationship maintenance capabilities of the organization
- * It empowers the organization to handle public relations in an effective manner
- * It increases personal productivity and confidence of all in the organization by multi-fold levels
