Comanor, Charles Kershaw Rowley, 1972      **Macroeconomic Planning** Roger Bowles, David Whynes, 2015-09-25 This volume originally published in 1979 examines systematically the nature of control in both capitalist and socialist economies develops a theoretical and applied framework which can embrace both macroeconomics and planning and demonstrates the essential unity of all forms of macroeconomic planning by the consistent application of basic economic principles Firstly the authors establish why societies feel a need for government control and examine the mechanisms by which such social decisions are reached Next they examine the nature of economic data the modelling of economic systems and a review of practical policy goals and instruments The book then reviews the basic theory of optimisation and elaborates it in the context of planning for growth for stabilisation and under uncertainty It closes with an analysis of practical planning based on French and Soviet experience      *Readings in Industrial Economics* Charles K. Rowley, 1972      **The Half-life of Policy Rationales** Fred E. Foldvary, Daniel B. in order to equip them with information that is key to address global economic challenges Thus this pluralist approach calls for a reflection of the evolution of global social and economic conditions to demonstrate problem solving approaches that align with the goal of addressing these challenges Pluralist Readings in Economics Key concepts and policy tools for the 21st century is suitable to a broad interdisciplinary readership as it will benefit all those who seek to better understand the complex stakes of the capitalist system in the tensions between regulatory policies free market equilibria and participatory openings in governance This introductory work also prepares the reader for debates and discussion in economic theory aimed at shaping policy transformations towards a more equitable just and sustainable world
