Amanda Anderson, Toril Moi, Rita Felski, 2024-05-31 Over the last few decades character based criticism has been seen as either naive or obsolete But now questions of character are attracting renewed interest Making the case for a broad based revision of our understanding of character Character rethinks these questions from the ground up Is it really necessary to remind literary critics that characters are made up of words Must we forbid identification with characters Does character discussion force critics to embrace humanism and outmoded theories of the subject Across three chapters leading scholars Amanda Anderson Rita Felski and Toril Moi reimagine and renew literary studies by engaging in a conversation about character Moi returns to the fundamental theoretical assumptions that convinced literary scholars to stop doing character criticism and shows that they cannot hold Felski turns to the question of identification and draws out its diverse strands as well as its persistence in academic criticism Anderson shows that character criticism illuminates both the moral life of characters and our understanding of literary form In offering new perspectives on the question of fictional character this thought provoking book makes an important intervention in literary studies **Representations and Characters of**

Tragedy and Redress in Western Literature Richard Gaskin, 2018-05-04 This book offers a unique interpretation of tragic literature in the Western tradition deploying the method and style of Analytic philosophy Richard Gaskin argues that tragic literature seeks to offer moral and linguistic redress compensation for suffering Moral redress involves the balancing of a protagonist s suffering with guilt and vice versa Gaskin contends that to a much greater extent than has been recognized by recent critics traditional tragedy represents suffering as incurred by avoidable and culpable mistakes of a cognitive nature Moral redress operates in the first instance at the level of the individual agent Linguistic redress by contrast operates at a higher level of generality namely at the level of the community its fundamental motor is the sheer expressibility of suffering in words Against many writers on tragedy Gaskin argues that language is competent to express pain and suffering and that tragic literature has that expression as one of its principal purposes The definition of tragic literature in this book is expanded to include more than stage drama the treatment stretches from the Classical and Medieval periods through to the early twentieth century There is a special focus on Sophocles but Gaskin takes account of most other major tragic authors in the European tradition including Homer Aeschylus Euripides Virgil Seneca Chaucer Marlowe Shakespeare Corneille Racine Lessing Goethe Schiller Kleist Büchner Ibsen Hardy Kafka and Mann lesser known areas such as Renaissance neo Latin tragedy are also covered Among theorists of tragedy Gaskin concentrates on Aristotle and Bradley but the contributions of numerous contemporary commentators are also assessed *Tragedy and Redress in Western Literature A Philosophical Perspective* offers a new and genuinely interdisciplinary perspective on tragedy that will be of considerable interest both to philosophers of literature and to literary critics

Using Words and Things Mark Coeckelbergh, 2017-06-26 This book offers a systematic framework for thinking about the relationship between language and technology and an argument for interweaving thinking about technology with thinking about language The main claim of philosophy of technology that technologies are not mere tools and artefacts not mere things but crucially and significantly shape what we perceive do and are is rethought in a way that accounts for the role of language in human technological experiences and practices Engaging with work by Wittgenstein Heidegger McLuhan Searle Ihde Latour Ricoeur and many others the author critically responds to and constructs a synthesis of three extreme idealtype untenable positions 1 only humans speak and neither language nor technologies speak 2 only language speaks and neither humans nor technologies speak and 3 only technology speaks and neither humans nor language speak The construction of this synthesis goes hand in hand with a narrative about subjects and objects that become entangled and constitute one another Using Words and Things thus draws in central discussions from other subdisciplines in philosophy such as philosophy of language epistemology and metaphysics to offer an original theory of the relationship between language and philosophy of technology centered on use performance and narrative and taking a transcendental turn
