Playing for Real K. G. Binmore, 2007-03-29 Ken Binmore's previous game theory textbook *Fun and Games* D C Heath 1991 carved out a significant niche in the advanced undergraduate market it was intellectually serious and more up to date than its competitors but also accessibly written Its central thesis was that game theory allows us to understand many kinds of interactions between people a point that Binmore amply demonstrated through a rich range of examples and applications This replacement for the now out of date 1991 textbook retains the entertaining examples but changes the organization to match how game theory courses are actually taught making *Playing for Real* a more versatile text that almost all possible course designs will find easier to use with less jumping about than before In addition the problem sections already used as a reference by many teachers have become even more clever and varied without becoming too technical *Playing for Real* will sell into advanced undergraduate courses in game theory primarily those in economics but also courses in the social sciences and serve as a reference for economists

Distance Learning for Elementary STEM Amanda Thomas (Math professor),2020 This practical guide outlines a vision for online and distance STEM learning at the elementary level with creative activities based on eight STEM themes Online and distance learning may sound fairly straightforward Instead of learning in a classroom setting students learn at home with the assistance of online resources But classroom learning does not always translate easily to online settings particularly at the elementary level where children should be actively engaging in activities exploration and discussion For STEM subjects integration across subjects settings and play based versus traditional learning present opportunities for young learners to engage in age appropriate online and distance learning This book features eight creative integrated STEM lessons including ideas for designing a zoo learning to garden exploring the night sky and more Each lesson offers online traditional and hands on components with connections to the ISTE Standards and STEM standards across elementary grades Concluding with a model for designing online and distance STEM learning for elementary aged children this book will support teachers and parents in designing the types of resources and learning experiences they need for elementary students distance learning

Social Justice, the Common Core, and Closing the Instructional Gap Janet C. Richards,Kristien Zenkov,2015-10-01 There is little doubt that the Common Core State Standards CCSS are a controversial entity They are provocative for the way in which they have been developed for the ways they are being implemented and evaluated for their content and for their failure to explicitly consider the needs interests and histories of diverse populations While the CCSS continue to be problematized by critics around the country including the editors of this volume it is evident our nation is moving toward some would argue we have arrived at a national set of standards and or a national curriculum This text will be an important volume for multiple audiences in large part because it will bring together critical perspectives on the CCSS and the notion of national standards curricula It will simultaneously provide a social justice orientation as a way to interpret the CCSS and

respond to their limits while presenting practical examples of social justice oriented CCSS focused curricula that empower diverse learners and their teachers Social Justice the Common Core and Closing the Instructional Gap will consist of chapters by classroom teachers and university scholars who portray honest engaging first person accounts of their successes and challenges connecting a social justice pedagogical orientation to the Common Core State Standards These authors candidly and passionately share the challenges of navigating between a social justice curriculum and high stakes standards and test driven environments They highlight their accomplishments that include effectively supporting students to consider social injustices and devise plans to work toward a more equitable world
