Alex, S. Susan Deborah, Sachindev P.S., 2014-06-19 Indian ecocriticism has not yet adequately demonstrated the applicability of ecological deep ecological *tinai* principles to visual texts *Culture and Media Ecocritical Explorations* closes this gap at the most opportune moment Though this volume accommodates ecologically oriented interpretations from several cultures across the world it reserves the centre stage for Indian ecocriticism and ecotheory quite appropriately The volume effectively challenges the major documents on ecocriticism and theory published by international presses which have been reluctant to give space to *tinai* criticism and theory that transcend Dravidian or Tamil boundaries The day is not far when cinema of the world shaped by *tinai* theory will employ *tinai* hermeneutics to gain fresh insight which in turn will feed into the processes of creation and production of relevant and great movies *Must We Kill the Thing We Love?* William Rothman, 2014-03-25 William Rothman argues that the driving force of Hitchcock s work was his struggle to reconcile the dark vision of his favorite Oscar Wilde quote Each man kills the thing he loves with the quintessentially American philosophy articulated in

Emerson's writings that gave classical Hollywood movies of the New Deal era their extraordinary combination of popularity and artistic seriousness. A Hitchcock thriller could be a comedy of remarriage or a melodrama of an unknown woman, both Emersonian genres except for the murderous villain and godlike author Hitchcock who pulls the villain's strings and ours. Because Hitchcock believed that the camera has a murderous aspect, the question "What if anything justifies killing?" which every Hitchcock film engages was for him a disturbing question about his own art. Tracing the trajectory of Hitchcock's career, Rothman discerns a progression in the films' meditations on murder and artistic creation. This progression culminates in *Marnie* (1964), Hitchcock's most controversial film in which Hitchcock overcame his ambivalence and fully embraced the Emersonian worldview he had always also resisted. Reading key Emerson passages with the degree of attention he accords to Hitchcock sequences, Rothman discovers surprising affinities between Hitchcock's way of thinking cinematically and the philosophical way of thinking Emerson's essays exemplify. He finds that the terms in which Emerson thought about reality, about our flux of moods, about what it is within us that never changes, about freedom, about America, about reading, about writing, and about thinking are remarkably pertinent to our experience of films and to thinking and writing about them. He also reflects on the implications of this discovery not only for Hitchcock scholarship but also for film criticism in general.

Understanding World Order and Structural Change H. Abrahamsson, 2015-12-22 Hans Abrahamsson assesses the current world order and structural change within an historical framework. He analyzes the interaction of Pax American and the Bretton Woods system in the postwar period and its impact specifically on the development of Southern Africa. The author also proposed an analytical model and a methodological framework for the study of the international political economy and its global and local implications. Finally, he addresses the circumstances behind the current opportunity for global change and the social forces and political action required in order to seize it.

Ernest G. Schachtel, 2013-04-15. First published in 1959, *Metamorphosis* remains one of the great works of developmental psychology of the past century. From his thoughtful meditation on the assumptions of classical Freudian psychoanalysis among them the pleasure and reality principles, the relations of drive and affect, and the nature and causes of infantile amnesia, Schachtel moves on to profound reflections on the senses, considered both in terms of their evolving relation to one another during maturation and as variable ingredients in the perception and cognition of the adult.

Theories of Surplus Value Karl Marx,2020-09-28 Theories of Surplus Value is a book that unlike Marx actually needs an introduction Theories was intended to be collected and published as the fourth volume to Marx s Capital but after Engels had successfully collected and published volumes two and three after Marx s death Engels died before he could publish it Theories has had a long history of being in and out of publication and particularly in and out of being an actually accessible publication In 1905 the infamously hated by Lenin Karl Kautsky published the first edition of the manuscript in three volumes separated and rearranged by Adam Smith in volume one to David Ricardo in the other two volumes with the breakup of the Ricardian school as the third volume Kautsky s version circulated in print and was translated to many languages over the decades remaining the sole version of Theories until The Institute of Marxism Leninism published a new German version This arrangement while still relatively close to Kautsky s narrative arrangement of tracing surplus value from Smith to the Ricardian split into vulgar economics annotated the manuscript with different topic headings This version was then translated into English by Progress Publishers and this is the version of the book which circulates today and is considered to be the most accurate version to Marx s notebooks This Radical Reprint by Pattern Books is made to be accessible and as close to only manufacturing cost as possible This first volume of Theories of Surplus Value covers the origins of surplus value to clarifying confusion between value and material substance to Adam Smith s definitions of value and the contradictions of Smith s idea on value and profit to another extrapolation on circulation within and by capitalist production and the process of reproduction These three volumes in totality are to show how the classical theories of value led to a theory stuck within the market paradigm and caught in the loop of capitalist circularity For Marx the current ontology of political economy only ruled within the scope of pragmatism within the market system and these programs no longer offered any integrated theory of capitalism *Documentary Aesthetics in the Long 1960s in Eastern Europe and Beyond* ,2023-12-18 This book is the first to deal with documentary aesthetic practices of the post war period in Eastern Europe in a comparative perspective The

contributions examine the specific forms and modes of documentary representations and the role they played in the formation of new aesthetic trends during the cultural political transition of the long 1960s This documentary first hand approach to the world aimed to break up unquestioned ideological structures and expose tabooed truths in order to engender much needed social changes New ways of depicting daily life writing testimony or subjective reportage emerged that still shape cultural debates today
