Dispelling Wetiko Paul Levy, 2013-01-15 The mind virus behind human self destruction has a name wetiko See it clearly and it starts to lose power You see it everywhere smart people making destructive choices Companies poisoning their own customers Nations pouring trillions into war while their people suffer Social media built to connect us driving us apart We re the one species that knowingly degrades its own habitat at scale Why do we keep acting against our own survival From Indigenous North American traditions comes the term wetiko a life eating compulsion that turns us against one another and the living world Whether you approach it as metaphor psychology or spirituality the effects are real and they propagate through what we don't see In *Dispelling Wetiko* Paul Levy brings this insight into dialogue with Jungian psychology framing wetiko as a mind parasite that exploits our blind spots Drawing on teachings shared in public sources depth psychology and his own harrowing encounters Levy describes wetiko as ME disease Malignant Egophrenia a pathological self centering that mistakes the ego for the whole Like a vampire that can't see its reflection it hides in the very way we perceive reality The crucial insight the moment we recognize wetiko it begins to lose power The cure isn't waging war on evil or waiting for others to wake up it starts by noticing how our attention and reactions feed the very patterns we oppose and then withdrawing that food *Dispelling Wetiko* offers a clear diagnosis and a practical path back to sanity personally and collectively

Fear of Jung Theo A. Cope, 2018-04-17 The current neuroscientific research in the field of emotion studies highlights a paradigm of scientific research that must be categorized as functional science As functional science the neuroscientific theory of the neuron doctrine combined with a Jungian theory of the complex doctrine hold significant potential for a natural human science and a psychological study of affectivity Though researchers utilize psychological constructs similar to those proposed by Carl Jung there appears to be a fear of Jung that is a professional fear of invoking Jung s name or his psychological research One familiar with Jung s works notice similar terminology ideas and even conclusions The marginalization and neglect of Jung s psychological insights from a serious empirical scientific approach to psychology is due to many factors Jung did not reduce psychological experience to the body or brain a reductive science does not consider seriously the reality of the psyche This work is an initial contribution to a psychological and neurological study of personal emotional experience [Vision, Reality and Complex](#) Thomas Singer, 2020-11-09 Vision Reality and Complex brings together a rich selection of Thomas Singer s scholarship on the development of the cultural complex theory and explores the relationship between vision reality and illusion in politics and psyche The chapters in this book discuss the basic principles of the cultural complex theory in various national and international contexts that span the Clinton Bush Obama and Trump eras Each chapter grounds this theory in practical examples such as race and healthcare in the United States or in specific historical and international conflicts between groups whether they be ethnic racial gender local national or global With chapters on topics including mythology leadership individuation revolution war and the soul Singer s work provides unique insights into contemporary culture activism and politics This collection of essays demonstrates how the cultural complex theory applies in specific contexts while simultaneously having cross cultural relevance through the reemergence of complexes throughout history It is essential reading for academics and students of Jungian and post Jungian ideas politics sociology and international studies as well as for practicing and trainee analysts alike
