ML Morrison

Reason Enough:

Reason Enough: A Case for the Christian Faith Clark H. Pinnock, 1997-10-02 A book written for those who do not believe the truth of Christianity and for those who are experiencing difficulties in their believing Pinnock does not call for mere fideism but feels that faith should be tested in light of the knowledge and experience we have at our disposal He claims that there is reason enough to put out trust in Christ

Reason Enough to Hope Philip Morrison, Kosta Tsipis, 1998 In this blue sky effort to rethink humanity's basic challenges Philip Morrison and Kosta Tsipis both eminent scientists with deep expertise in arms control issues sketch the broad outlines for a global approach to the problems of security and development

The Tyranny of Architecture: A Vegan Apologetic Thomas Aiello, 2017-03-04 The Tyranny of Architecture is a full philosophical defense of veganism one that defends the practice in a way fundamentally unique among such arguments It makes the case that in a human society built on artificial constructs the only demonstrable ethics not part of an imagined community is that of respecting the right to life and contentment construed for farmed animals as adequate food space and other basic amenities along with the right not to be tortured and killed for the unnecessary whims of humans existing mentally within a subset of artificial constructs that do not include those nonhuman animals

The Scripture Catechist Clement Ellis, John Veneer, 1738

Metametaphysics David Chalmers, David Manley, Ryan Wasserman, 2009-02-19

Metaphysics asks questions about existence for example do numbers really exist Metaphysics asks questions about metaphysics for example do its questions have determinate answers If so are these answers deep and important or are they merely a matter of how we use words What is the proper methodology for their resolution These questions have received a heightened degree of attention lately with new varieties of ontological deflationism and pluralism challenging the kind of realism that has become orthodoxy in contemporary analytic metaphysics This volume concerns the status and ambitions of metaphysics as a discipline It brings together many of the central figures in the debate with their most recent work on the semantics epistemology and methodology of metaphysics

The conclusion of The rule of conscience; The divine institution and necessity of the office ministerial; and, Rules and advices to the clergy Jeremy Taylor, Reginald Heber, 1828

Objects Daniel Z. Korman, 2015 One of the central questions of material object metaphysics is which highly visible objects there are right before our eyes Daniel Z Korman defends a conservative view according to which our ordinary natural judgments about which objects there are are more or less correct He begins with an overview of the arguments that have led people away from the conservative view into revisionary views according to which there are far more objects than we ordinarily take there to be permissivism or far fewer eliminativism Korman criticizes a variety of compatibilist strategies according to which these revisionary views are actually compatible with our ordinary beliefs and responds to debunking arguments according to which these beliefs are the products of arbitrary biological and cultural influences He goes on to respond to objections that the conservative's verdicts about which objects there are and aren't are objectionably arbitrary and to the argument from

vagueness which purports to show that the sort of restriction that conservatives want to impose on which composites there are is bound to give rise to vagueness about what exists something that is ruled out by widely accepted theories of vagueness Finally Korman responds to the overdetermination argument the argument from material constitution and the problem of the many all of which are meant to motivate eliminativism by showing that accepting ordinary objects commits one to one or another absurdity Girl Aggregate Bonnie Singman,2011 *Rethinking the 21st Century* Doctor Amy Eckert,Laura Sjoberg,2013-07-04 Rethinking the 21st Century brings much needed context and perspective to the security problems we face today In recent years the Bush Doctrine that the security threats we now face are entirely unprecedented has echoed around the world Global security and stability is now challenged not only by states and nuclear war but by insurgency disease environmental degradation and military privatisation Yet this creates a deep sense of disconnect in the way we perceive politics and can be dangerously stark and ahistorical The chapters here show that far from being a clean break the new problems faced today might actually have old solutions What can Locke tell us about terrorists What does Bentham have to say about sanctions What are the ethics of outsourcing war to private companies By looking back to decades and even centuries of ethical analysis and political theory this book provides fascinating insight into all these questions
