Reasoned Argument In Social Science Linking Research To Policy:

Reasoned Argument in Social Science Eugene Meehan, 1981-05-22

Basic Methods of Policy Analysis and Planning Carl Patton, David Sawicki, Jennifer Clark, 2015-08-26 Updated in its 3rd edition Basic Methods of Policy Analysis and Planning presents quickly applied methods for analyzing and resolving planning and policy issues at state regional and urban levels Divided into two parts Methods which presents quick methods in nine chapters and is organized around the steps in the policy analysis process and Cases which presents seven policy cases ranging in degree of complexity the text provides readers with the resources they need for effective policy planning and analysis Quantitative and qualitative methods are systematically combined to address policy dilemmas and urban planning problems Readers and analysts utilizing this text gain comprehensive skills and background needed to impact public policy

The Impact of Policy Analysis James M. Rogers, 2010-11-23 Government agencies spend billions of dollars each year for policy analysis with the expectation that improved policy will follow Although civil servants conduct some analysis themselves more frequently they contract with research organizations to assess the probable consequences of new social policies and to answer other policy questions James M Rogers develops a theory that explains and predicts the impact of policy analysis He illustrates his theory through welfare reform where policy analysis is caught in political warfare and has little chance to improve actual policy During the 1960s and 1970s over 108 million was spent on four unprecedented social scientific experiments to test the effectiveness of a major proposal to reform the welfare system Now out of favor the negative income tax was then considered to be an appealing alternative to welfare Starting in New Jersey and Pennsylvania during the Johnson administration the experimental research continued through Carter's term and helped to keep reform proposal and research organizations alive This book examines the results of these experiments and their effect on Carter's reform attempt the Program for Better Jobs and Income One of the author's main conclusions concerns the role of value conflict If there is strong disagreement within society over the goals of policy analysis will seldom change the minds of decision makers or influence policy Policy analysis is more likely to influence thinking and policy if the issue involves low conflict

The Social Engagement of Social Science, a Tavistock Anthology, Volume 3 Eric Trist, Hugh Murray, Beulah Trist, 2016-01-14 World War II brought together a group of psychiatrists and clinical and social psychologists in the British Army who developed a number of radical action oriented organizational innovations in social psychiatry They became known as the Tavistock Group since the core members had been at the pre war Tavistock Clinic At the post war Tavistock Institute of Human Relations they developed a pioneering mode of relating theory and practice called in these volumes The Social Engagement of Social Science Previous volumes presented two of three interdependent perspectives the socio psychological Volume I 1990 and the socio technical Volume II 1993 The latest volume on the socio ecological perspective completes the set The socio ecological perspective is concerned with the coevolution of systems and their environments It considers the broader environment which shapes not only the task

environments of socio technical organizations but the institutional and cultural environment that confronts the individual

Volume III focuses on nonhierarchical forms of organization facilitating inter organizational relations in complex and rapidly changing environments This perspective provides a guide to institution building for the future The Making of Telecommunications Policy Dick Olufs,1999 The Making of Telecommunications Policy examines the history politics and impact of telecommunications policy Beginning with a comparison of several alternate views of the future Olufs explains how government action makes the widespread use of some new technologies more likely than others He details the challenges that rapid advances in communications technologies pose for policymaking institutions and considers the ways that government responds to the ideological economic and political interests of industry private advocacy groups and individuals Olufs discussed the recent trend toward deregulation and provides a full analysis of the Telecommunications Act of 1996 including the politics of its enactment and its long term implications for both industry and the daily lives of citizens

Science, Politics and Morality R. von Schomberg,2013-06-29 Current environmental problems and technological risks are a challenge for a new institutional arrangement of the value spheres of Science Politics and Morality Distinguished authors from different European countries and America provide a cross disciplinary perspective on the problems of political decision making under the conditions of scientific uncertainty cases from biotechnology and the environmental sciences are discussed The papers collected for this volume address the following themes i controversies about risks and political decision making ii concepts of science for policy iii the use of social science in the policy making process iv ethical problems with developments in science and technology v public and state interests in the development and control of technology A Systems-Based Approach to Policymaking Kenyon B. de Greene,2012-12-06 This book is based on a number of systems concepts of which the following are emphasized here oThe interacting systems of society and the environment are dynamic and evolution ary oEvolution of these systems carries them through stages of differential stability and instability continuity and discontinuity oAssociated with evolution and instability is structural change that is essentially irre versible oThe present is a stage of world transformation that may not have been equaled for decades or even centuries oPolicies and decisions must match the times in the present case the stage of world transformation The time 11 59 59 PM approximately on December 31 2000 has an impor tant symbolic meaning It marks the end of a minute the end of an hour the end of a day the end of a year the end of a decade the end of a century and the end of a millennium The time and date provide a convenient yardstick against which we can evaluate the evolution of our thinking and the adequacy of our assumptions mental models paradigms and policies Will the beginning tum out to be appropriately dif ferent from the end We hope that this book is helpful in such evaluation This is a new paradigm book which both presents and advances the new way of thinking about the systems of science technology society economics politics and the environment and actively calls for the replacement of the worn out cognitive sociotechnical paradigm The Social Engagement of Social Science, Volume 3 Eric Trist,Hugh Murray,Frederick

Edmund Emery, 1990 World War II brought together a group of psychiatrists and clinical and social psychologists in the British Army who developed a number of radical action oriented organizational innovations in social psychiatry They became known as the Tavistock Group since the core members had been at the pre war Tavistock Clinic At the post war Tavistock Institute of Human Relations they developed a pioneering mode of relating theory and practice called in these volumes The Social Engagement of Social Science Previous volumes presented two of three interdependent perspectives the socio psychological Volume I 1990 and the socio technical Volume II 1993 The latest volume on the socio ecological perspective completes the set The socio ecological perspective is concerned with the coevolution of systems and their environments It considers the broader environment which shapes not only the task environments of socio technical organizations but the institutional and cultural environment that confronts the individual Volume III focuses on nonhierarchical forms of organization facilitating inter organizational relations in complex and rapidly changing environments This perspective provides a guide to institution building for the future

The Explanatory Power of Models Robert Franck, 2013-11-11 Empirical research often lacks theory This book progressively works out a method of constructing models which can bridge the gap between empirical and theoretical research in the social sciences This might improve the explanatory power of models The issue is quite novel and it benefited from a thorough examination of statistical and mathematical models conceptual models diagrams and maps machines computer simulations and artificial neural networks These modelling practices have been approached through different disciplines The proposed method is partly inspired by reverse engineering The standard covering law approach is abandoned and classical induction restored to its rightful place It helps to solve several difficulties which impact upon the social sciences today for example how to extend an explanatory model to new phenomena how to establish laws and how to guide the choice of a conceptual structure The book can be used for advanced courses in research methods in the social sciences and in philosophy of science

Model-Based Demography Thomas K. Burch, 2017-10-14 Late in a career of more than sixty years Thomas Burch an internationally known social demographer undertook a wide ranging methodological critique of demography This open access volume contains a selection of resulting papers some previously unpublished some published but not readily accessible from past meetings of The International Union for the Scientific Study of Population and its research committees or from other small conferences and seminars Rejecting the idea that demography is simply a branch of applied statistics his work views it as an autonomous and complete scientific discipline When viewed from the perspective of modern philosophy of science specifically the semantic or model based school demography is a balanced discipline with a rich body of techniques and data but also with more and better theories than generally recognized As demonstrated in this book some demographic techniques can also be seen as theoretical models and some substantive behavioral models commonly rejected as theory because of inconsistent observations are now seen as valuable theoretical models for example demographic transition theory This book shows how demography can build a strong

theoretical edifice on its broad and deep empirical foundation by adoption of the model based approach to science But the full fruits of this approach will require demographers to make greater use of computer modeling both macro and micro simulation in the statement and manipulation of theoretical ideas as well as for numerical computation This book is open access under a CC BY license
