Reasoning Ability of Mildly Retarded Learners Herbert Goldstein, Marjorie T. Goldstein, 1980-01-01 *Resources in Education*, 1993 **Education and Training of the Mentally Retarded**, 1980 If this is Social Studies, why Isn't it Boring? Stephanie Steffey, Wendy J. Hood, 1994 The provocative title of this book plays on a too familiar response from teachers and students alike But now many teachers have begun to seek an approach to social studies that takes account of the ways children learn and that builds on their own knowledge and strengths The authors in this book have found ways to do this Wendy Hood writes in the Introduction that they have not only rediscovered social studies education in general they have also found themselves exploring the many disciplines of the social sciences that combine to make social studies The issues of the disciplines are visible the content of the disciplines is visible and the questions central to each discipline are central in these classrooms While the studies described began in one discipline they branched out or melted into one or more of the others In this contributed collection twenty three teachers explain their successful strategies for teaching the social studies disciplines in a whole language context If This Is Social Studies covers contemporary subjects the Gulf War traditional topics students as historians well known projects Scottish Storyline social studies in the community and multicultural matters Teachers at elementary through middle and high school levels will find this book s holistic approach to social studies a refreshing departure and a source of new practical ideas Indeed the diversity of ideas and styles is as broad as the book s subject *Dictionary of Mental Handicap* Mary P. Lindsey, 2002-03-11 Over recent years the policy of isolating and institutionalizing mentally handicapped people has gradually been dismantled and a major shift to community care has taken place But integration within the general community and access to special services has greatly increased the number of people with a need to know about mental handicap Each profession or discipline has its own terminology nowadays one must be conversant with all of them In this comprehensive dictionary Mary Lindsey has brought together terms and concepts from a wide variety of fields Approximately 2 400 entries are included ranging in length from concise explanations to encyclopaedic essays but always expressed in clear simple language Where appropriate suggestions for further reading are made and possible sources of further information given An extensive system of cross references leads the interested reader further and makes valuable connections between entries The medical aspects of mental handicap its causes prognoses and treatments are of course covered in detail But although the cause of mental handicap may be medical subsequent interventions may be sociological psychological educational medical paramedical or psychiatric This is reflected in the choice of entries making the Dictionary an invaluable source of reference for all those involved with mentally handicapped people in any capacity whatsoever Characteristics of and Strategies for Teaching Students with Mild Disabilities Martin Henley, Roberta S. Ramsey, Robert Algozzine, 1999 This book describes characteristics of mild disabilities in an easy to read and understand format It includes the best teaching practices for inclusion behavior management and classroom instruction
