Recent Social Trends In France 1960 199:

Recent Social Trends in France, 1960-1990 Michel Forsé, International Research Group on the Comparative Charting of Social Change in Advanced Industrial Societies, 1993 Over the three decades from 1960 to 1990 French society underwent a spectacular transformation due to the baby boom which was particularly broad based and prolonged in France and caused the population to climb by a full one third At the same time the French economy expanded and the pace of modernization picked up with the result that the wealth of the French quadrupled in a single generation The turning point between the reconstruction and development period and the period of profound social change appears to have been 1965 The baby boom was over by then and the production system was shifting in orientation No longer dominated by the growth of basic industries production was now starting to focus on consumer goods and services

Borderlines in a Globalized World G. Preyer, Mathias Bös, 2013-11-11 Scholars of different schools have extensively analyzed world systems as networks of communication under the fashionable heading globalization Our collected new research pushes the argument one step further Globalization is not a homogenization of all social life on earth It is a heterogeneous process that connects the global and the local on different levels To understand these contemporary developments this book employs innovative concepts strategies of research and explanations Globalization is a metaphor for different borderstructures new borderlines and conditions of membership which emerge in a global world system As a world system expands it incorporates new territories and new peoples The process of incorporation creates frontiers or boundaries of the world system These frontiers or boundary zones are the locus of resistance to incorporation ethnogenesis ethnic transformation and ethnocide

The Imaginary Revolution Michael M. Seidman, 2004 The events of 1968 have been seen as a decisive turning point in the Western world The author takes a critical look at May 1968 and questions whether the events were in fact as revolutionary as French and foreign commentators have indicated He concludes the student movement changed little that had not already been challenged and altered in the late fifties and early sixties The workers strikes led to fewer working hours and higher wages but these reforms reflected the secular demands of the French labor movement May 1968 was remarkable not because of the actual transformations it wrought but rather by virtue of the revolutionary power that much of the media and most scholars have attributed to it and which turned it into a symbol of a youthful renewed and freer society in France and beyond

The Politics of Immigration in France, Britain, and the United States M. Schain, 2008-11-10 This book argues that although labour market needs have been an important element in the development of immigration policy they have been filtered through a political process the politics of immigration The book explores the relation between policy and politics in France the UK and the US

La revolución imaginaria. París 1968 Michael Seidman, 2018-05-31 Durante los meses de mayo y junio de 1968 las calles de París fueron testigo de una ola de protestas iniciadas por los estudiantes contra el modelo político social y cultural dominante

Aquellas movilizaciones que pasaron a la Historia como el Mayo del 68 frances dieron la vuelta al mundo y pusieron contra las cuerdas al Gobierno del general De Gaulle. Movilizaciones similares aunque quiz no de tal magnitud se dieron en las universidades de otros países como Estados Unidos Berkeley Alemania México e incluso España. Pero las movilizaciones de París son las que más han quedado en el recuerdo popular y en los medios de comunicación. Pasados los años en este estudio bien documentado detallado y minucioso Michael Seidman analiza aquella revolución valorando su importancia histórica cuestionando algunas ideas establecidas e intentando comprobar si realmente el mundo cambió después de aquel Mayo del 68.

Contemporary Marriage Kingsley Davis, 1986-08-20 This fascinating symposium is based on an assumption that no longer seems to need justification that the institution of marriage is today experiencing profound changes. But the nature of those changes, their causes and consequences is very much in need of explication. The experts contributing to this volume bring a wide range of perspectives: sociological, anthropological, economic, historical, psychological and legal to the problem of marriage in modern society. Together these essays help illuminate a form of relationship that is both vulnerable and resilient, biological and social, a reflection of and an influence on other social institutions. Contemporary Marriage begins with an important assessment of the revolution in marital behavior since World War II, tracing trends in marriage, age, cohabitation, divorce and fertility. The focus here is primarily on the United States and on industrial societies in general. Later chapters provide intriguing case studies of particular countries. There is a recurrent interest in the impact on marriage of modernization itself, but a number of essays probe influences other than industrial development, such as strong cultural and historical patterns or legislation and state control. Beliefs and expectations about marriage are explored and human sexuality and gender roles are also considered as factors in the nature of marriage. Contemporary Marriage offers a rich spectrum of approaches to a problem of central importance. The volume will reward an equally broad spectrum of readers interested in the meaning and future of marriage in our society. Australian Social Trends, 1996 *Canadian Who's Who 2009*
