Recent Work Of Jürgen Habermas Reason Justice And Modernity:

The Recent Work of Jürgen Habermas Stephen K. White, 1989-08-25 Jürgen Habermas is one of the foremost philosophers and social theorists in the world today. But the complexity and breadth of his thought make him often difficult to understand. In this book, Stephen White offers a clear, accessible, and reliable introduction to Habermas's work, particularly that which he has written since the publication of *Knowledge and Human Interests* in English in 1971. During this period, new themes and directions have emerged in Habermas's thought, which culminated in *The Theory of Communicative Action*, a massive work that has not hitherto been the subject of extended commentary and analysis. This book is the first to provide a full-length study of Habermas's mature thought, locating the latter in the context of contemporary debates. White explains Habermas's ideas about action rationality, communicative ethics, contemporary capitalism, and new social movements which characterize his later work. He also examines Habermas's interpretation of modernity, showing that although like his forerunners in the Frankfurt School, Habermas maintains a critical stance towards modernity's instrumentalization of reason, he nonetheless offers a sophisticated defense of the universal significance of other aspects of modern consciousness that are too often forgotten by many recent radical critics of modernity. Throughout, White presents Habermas's work in such a way as to emphasize its coherence and to demonstrate how it constitutes the beginnings of a distinctive new research program in the social sciences. As a well-researched and lucid account of Habermas's thought, this book will appeal to readers wanting an introduction to the complexity of his ideas as well as to those already conversant with them. It will also interest social and political theorists concerned with the general theoretical issues that it covers. *The Recent Work of Jürgen Habermas*

In *Habermas and Giddens on Praxis and Modernity*, Craig Browne investigates how two of the most important and influential contemporary social theorists have sought to develop the modernist visions of the constitution of society through the autonomous actions of subjects. Comparing Habermas's and Giddens's conceptions of the constitution of society, interpretations of the social structural impediments to subjects' autonomy, and attempts to delineate potentials for progressive social change within contemporary society, Browne draws on his own work, which has extended aspects of the social theorists' approach to modernity. Despite the criticisms developed over the course of the book, Habermas and Giddens are found to be two of the most important theorists of democratization and social democracy, the dynamics of capitalist modernity, and their paradoxes.
