Mathematical Correspondences and Critical Editions Maria Teresa Borgato, Erwin Neuenschwander, Irène Passeron, 2019-03-22. Mathematical correspondence offers a rich heritage for the history of mathematics and science as well as cultural history and other areas. It naturally covers a vast range of topics and not only of a scientific nature; it includes letters between mathematicians but also between mathematicians and politicians, publishers and men or women of culture. Wallis, Leibniz, the Bernoullis, D'Alembert, Condorcet, Lagrange, Gauss, Hermite, Betti, Cremona, Poincaré and van der Waerden are undoubtedly authors of great interest, and their letters are valuable documents, but the correspondence of less well-known authors too can often make an equally important contribution to our understanding of developments in the history of science. Mathematical correspondences also play an important role in the editions of collected works contributing to the reconstruction of scientific biographies as well as the genesis of scientific ideas and in the correct dating and interpretation of scientific writings. This volume is based on the symposium *Mathematical Correspondences and Critical Editions* held at the 6th International Conference of the ESHS in Lisbon, Portugal, in 2014. In the context of the more than fifteen major and minor editions of mathematical correspondences and collected works presented in detail, the volume discusses issues such as: History and prospects of past and ongoing edition projects; Critical aspects of past editions; The complementary role of printed and digital editions; Integral and partial editions of correspondence; Reproduction techniques for manuscripts, images and formulae; and the editorial challenges and opportunities presented by digital technology.

Diderot and the Metamorphosis of Species Mary E. Frosini Gregory, 2007. First published in 2006, Routledge is an imprint of Taylor & Francis, an informal company.

Stranded Encyclopedias, 1700-2000 Linn Holmberg, Maria Simonsen, 2021-02-17. In *Stranded Encyclopedias 1700-2000*, Exploring Unfinished, Unpublished, Unsuccessful Encyclopedic Projects, fourteen scholars turn to the archives to challenge the way the history of modern encyclopedism has long been told. Rather than emphasizing successful publications and famous compilers, they explore encyclopedic enterprises that somehow failed. With a combined attention to script, print and digital cultures, the volume highlights the many challenges facing those who have pursued complete knowledge in the past three hundred years. By introducing the concepts of stranded and strandedness, it also provides an analytical framework for approaching aspects

often overlooked in histories of encyclopedias books and learning the unpublished the unfinished the incomplete the unsuccessfully disseminated and the no longer updated By examining these aspects in a new and original way this book will be of value to anyone interested in the history of encyclopedism and lexicography the history of knowledge language and ideas and the history of books writing translating and publishing Chapters 1 and 4 are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com **History of Linguistics 2005** Douglas A.

Kibbee, 2007-11-28 As each period in the history of the language sciences has chosen to focus on different key questions the study of that history promises to open our eyes to the variety of interesting questions that can be asked and answered taking off the blinders of contemporary preoccupations September 15 2005 linguists from twenty five countries gathered at the University of Illinois at Urbana Champaign to share their passion for the history of their discipline This volume is a distillation of many fine contributions from that conference shedding light on the many different approaches to the study of language **Evolutionism in Eighteenth-century French Thought** Mary Efrosini Gregory, 2008 This book examines how eighteenth century French theorists Maillet Montesquieu La Mettrie Buffon Maupertuis Diderot Rousseau and Voltaire addressed evolutionism Each thinker laid down a building block that would eventually open the door to the mutability of species and a departure from the long held belief that the chain of beings is fixed This book describes how the philosophes established a triune relationship among contemporary scientific discoveries random creationism propelled by the motive and conscious properties of matter and the notion of the chain of being along with its corollaries plenitude and continuity Also addressed is the contemporary debate over whether apes could ever be taught to speak as well as the issue of race and the family of man
