Joy at Birth Susan Crowther, 2019-09-02 To be at the birth of a baby is special yet there is an increasing secularisation and reliance on technology in contemporary maternity care particularly in the western context Through exploration of experiences at birth this book explores joy at birth which is often ignored and overlooked beyond the activities that help to ensure survival This book draws on a collection of stories of birth from mothers birth partners obstetricians and midwives that demonstrate joy at birth across professional groups and in different types of births and locations with or without technological interventions Each chapter introduces stories of joy that highlight embodied spatial and relational meanings Employing the Heideggerian notion of a human being it sketches out an ontological focus that draws our gaze to the everyday taken for granted ways of being at birth Based on phenomenological experiential data and rigorous interpretive analysis underpinned by seminal philosophical writings this book calls for readers to attend to

 childbirth educator and doula *The Birth Partner* Penny Simkin, 2001 Definitive guide for preparing to help a woman
 through childbirth and the essential manual to have at hand during the event *Birth and Death* Kath Woodward, Sophie
 Woodward, 2019-12-05 Usually conceived in opposition to each other birth as a hopeful beginning death as an ending this
 book brings them into dialogue with each other to argue that both are central to our experiences of being in the world and
 part of living Written by two authors this book takes an intergenerational approach to highlight the connections and
 disconnections between birth and death adopting a relational approach allows the book to explore birth and death through
 the key relationships that constitute them personal and social private and public the affective and social norms the actual and
 the virtual and the ordinary and profound Of interest to academics and students in the fields of feminism phenomenology and
 the life course the book will also be of relevance to policy makers in the areas of birth activism and end of life care Drawing
 from personal stories everyday life and publicly contested examples the book will also be of interest to a more general
 readership as it engages with questions we all at some point will grapple with **Improving Maternity Services** Denis
 Walsh, Sheila Kitzinger, Norman Ellis, 2017-11-22 This title includes Foreword by Sheila Kitzinger Writer Researcher Activist
 and Honorary Professor Wolfson School of Health Sciences Thames Valley University Birth centres are suitable for every
 woman whose birth is straightforward which accounts for around 75 per cent of all women This inspirational guide shows
 how small scale maternity provision has a profound clinical and organisational advantage over large scale hospital provision
 including saving of time and money by reducing intervention rates It presents the thoughts and feelings of midwives and
 patients and how both enjoy the humane and compassionate care of the birth centre ethos The book is invaluable for
 midwives obstetricians doulas maternity care assistants and maternity service planners and managers It also provides
 enlightening information for general practitioners and other health and social care professionals maternity service users
 groups and academics with an interest in midwifery and health services What birth centres do best is simply providing
 humane childbirth care There are no high tech gadgetry doctors or dramatic stories of childbirth rescues that make it into
 the media Yet miracles happen inside their walls every day as women have their babies after normal labours and births Until
 now there have been very few books detailing what happens in birth centres so that women and childbirth professionals can
 be introduced to an alternative beyond the large hospital model This book provides a window in on the birth centre model
 and there are some exciting things to find there about childbirth care in the 21st century Denis Walsh in the Preface Denis
 Walsh has one of the most incisive analytical and brilliant minds in nursing and midwifery research today He demonstrates
 the difference between a quality environment for birth where a woman can create her own nest and a technocratic
 bureaucratically controlled highly medicalised and risk oriented birth culture dominated by the clock which is most women's
 experience today Sheila Kitzinger in the Foreword **Inappropriate Bodies Art, Design and Maternity** Buller Rachel

Epp,2019-09-01 This edited collection examines conflicting assumptions expectations and perceptions of maternity in artistic cultural and institutional contexts Over the past two decades the maternal body has gained currency in popular culture and the contemporary art world with many books and exhibitions foregrounding artists experiences and art historical explorations of maternity that previously were marginalized or dismissed In too many instances however the maternal potential of female bodies whether realized or not still causes them to be stigmatized censored or otherwise treated as inappropriate cultural expectations of maternity create one set of prejudices against women whose bodies or experiences do align with those same expectations and another set of prejudices against those whose do not Support for mothers in the paid workforce remains woefully inadequate yet in many cultural contexts social norms continue to ask what is wrong with women who do not have children In these essays and conversations artists and writers discuss how maternal expectations shape both creative work and designed environments and highlight alternative ways of existing in relation to those expectations

Rosemary Mander,2007-05-21 This book critically analyzes the place of caesarean in childbearing at the beginning of the twenty first century It questions the changes that are taking place in childbirth and in particular the effects and implications of an increase in caesarean births This controversial work by a practising midwife and researcher includes discussion of the context of the operation and description of it health systems around the world and their caesarean incidence rates decision making and cultural medical constraints the short and long term implications of caesarean for baby and mother Using up to date research Rosemary Mander bases her argument on a firm evidence base and argues that the rapidly rising caesarean section rate may not be for the benefit of either the woman giving birth or her baby Rather the beneficiaries may actually be those professionals whose investment is in extending the range of their influence and thus increasing the medicalization of normal life **Birth Your Way** Sheila Kitzinger,2011 Describes different approaches to childbirth and their advantages and disadvantages including midwife delivery and birth centers

Lying in the Dark Room Emma Cheatle, 2023-12-01 *Lying in the Dark Room* Architectures of British Maternity returns to and reflects on the spatial and architectural experience of childbirth through both a critical history of maternity spaces and a creative exploration of those we use today Where conventional architectural histories objectify buildings in parallel with the objectification of the maternal body the book in the mode of creative practice research presents a creative critical autotheory of the architecture of lying in It uses feminist subjective modes of thinking that travel across disciplines registers and arguments The book assesses the transformation of maternity spaces from the female bedchamber of seventeenth and eighteenth century marital homes to the lying in hospitals of the eighteenth and nineteenth centuries purposely built by man midwives to the late twentieth century spaces of home and the modern hospital maternity wing and the parallel shifts in maternal practices The spaces are not

treated as mute or neutral backdrops to maternal history but as a series of vital entangled atmospheres materials practices and objects that are produced by and in turn produce particular social and political conditions gendered structures and experiences Moving across spaces systems protagonists and their subjectivities the book shows how hospital design and protocol altered ordinary birth at home and continues to shape maternal spatial experience today As such it will be of interest to a wide range of readers from architectural historians theoreticians designers and students to medical humanities historians to English Literature humanities and material studies scholars as well as those interested in creative critical writing
