Reference Planning Teacher Evaluation:

10 Models of Teacher Evaluation David Silverberg, Linda Jungwirth, 2014-02-04 For the first time school districts around the country are being required to adopt formal accountability measures to assess teacher effectiveness. In a radical shift, teacher quality will be based on outputs: student achievement, teacher observations, rather than inputs: years of service, degrees attained. This change in school culture and practice is an attempt to improve everything from individual student learning to national economic competitiveness. It also requires that administrators implement new and rigorous teacher evaluation programs that align with state and federal guidelines. Busy administrators lack the training and experience necessary to quickly and efficiently craft a teacher evaluation system that successfully meets the needs of their district. Questions like "What is the best program for my district?" or "How do I get the teachers on board?" are being asked by school leaders across the country. This book provides real world answers by highlighting 10 diverse model programs from around the country.

Teacher Evaluation Anthony J. Shinkfield, D.L. Stufflebeam, 1995-11-30 Teacher Evaluation Guide to Professional Practice is organized around four dominant interrelated core issues: professional standards, a guide to applying the Joint Committee's Standards, ten alternative models for the evaluation of teacher performance, and an analysis of these selected models. The book draws heavily on research and development conducted by the Federally funded national Center for Research on Educational Accountability and Teacher Evaluation (CREATE). The reader will come to grasp the essence of sound teacher evaluation and will be able to apply its principles, facts, ideas, processes, and procedures. Finally, the book invites and assists school professionals and other readers to examine the latest developments in teacher evaluation.
