1919 - The Year That Changed China Elisabeth Forster, 2018-03-05 The year 1919 changed Chinese culture radically but in a way that completely took contemporaries by surprise At the beginning of the year even well informed intellectuals did not anticipate that for instance baihua a precursor of the modern Chinese language communism Hu Shi and Chen Duxiu would become important and famous all of which was very obvious to them at the end of the year Elisabeth Forster traces the precise mechanisms behind this transformation on the basis of a rich variety of sources including newspapers personal letters student essays advertisements textbooks and diaries She proposes a new model for cultural change which puts intellectual marketing at its core This book retells the story of the New Culture Movement in light of the

diversified and decentered picture of Republican China developed in recent scholarship It is a lively and ironic narrative about cultural change through academic infighting rumors and conspiracy theories newspaper stories and intellectuals hell bent on selling agendas through powerful buzzwords

Goldberg, 2014-01-13 Building on the breakthrough text *Philosophy and Engineering An Emerging Agenda* this book offers 30 chapters covering conceptual and substantive developments in the philosophy of engineering along with a series of critical reflections by engineering practitioners The volume demonstrates how reflective engineering can contribute to a better understanding of engineering identity and explores how integrating engineering and philosophy could lead to innovation in engineering methods design and education The volume is divided into reflections on practice principles and process each of which challenges prevalent assumptions and commitments within engineering and philosophy The volume explores the ontological and epistemological dimensions of engineering and exposes the falsity of the commonly held belief that the field is simply the application of science knowledge to problem solving Above all the perspectives collected here demonstrate the value of a constructive dialogue between engineering and philosophy and show how collaboration between the disciplines casts light on longstanding problems from both sides The chapters in this volume are from a diverse and international body of authors including philosophers and engineers and represent a highly select group of papers originally presented in three different conferences These are the 2008 Workshop on Philosophy and Engineering WPE 2008 held at the Royal Academy of Engineering the 2009 meeting of the Society for Philosophy and Technology SPT 2009 at the University of Twente in the Netherlands and the Forum on Philosophy Engineering and Technology fPET 2010 held in Golden Colorado at the Colorado School of Mines
