Novel Environments Jayne Hildebrand,2023-05-31 The environment concept has shaped humanity s relationship to the natural world and has drawn attention to the effects of human actions on our natural surroundings But when did we learn that we live in an environment While scholars have often located the emergence of the environment concept in twentieth century ecological and political thought Novel Environments Science Description and Victorian Fiction reconstructs a longer and a specifically literary history It was in the descriptive worldmaking of the Victorian novel that the environment was first transformed from an abstraction into a vivid object of imagination and feeling Engaging the scientific theories of their

contemporaries Mary Russell Mitford George Eliot Thomas Hardy and Robert Louis Stevenson turned to detailed description from gardens and landscapes to weather and atmospheres to model interactions between life and its surroundings Far from merely furnishing static background the descriptive apparatus of the Victorian novel imagined the nonhuman environment as dynamically involved with human action feeling and development In making this argument *Novel Environments* recovers the scientific vocabulary the Victorians used to name the surroundings of living organisms The word environment dominates our own way of speaking about the nonhuman world but nineteenth century scientific writers and novelists availed themselves of a richer conceptual lexicon which included environment along with less familiar concepts such as milieu medium and circumstance Jayne Hildebrand traces the development of Victorian environmental thought from the earliest theorization of physical surroundings as a dynamic influence in the life sciences through the idea of a singular medium in mid century organicism to the conception of the planet as an environmental system at the fin de siècle By showing how novelistic description helped to produce the modern environment concept Hildebrand sheds new light on the relationship between Victorian literature and the life sciences and reveals how literary form has shaped the ecological ideas through which we apprehend the nonhuman world

Irony and the Logic of Modernity Armen Avanessian,2015-09-14 The logic of modernity is an ironical logic Modern irony a flash of genius produced by Romantic theorists is first discussed e g in Hegel and Kierkegaard as an ethical problem personified in figures such as the aesthete the seducer the flaneur or the dandy It fully develops in the novel the modern genre par excellence in novels of the early 19th century no less than in those of postmodernity or in those of the masters of citation parody and pastiche of classical modernism Musil Joyce and Proust This book however goes one step further Looking at how such different authors as Schmitt Kafka and Rorty identify the political conflicts contradictions and paradoxes of the 20th century as ironical and offers a comprehensive account of the constitutive irony of modernity s ethical poetical and political logic
