Highlights in Asthmology
F.B. Michel, J. Bousquet, P. Godard, 2012-12-06

F B Michel Asthmology is the neologism I suggested for ideas which were acceptable at the begin the title of a book published in 1981 on the ending of the 20th century and in particular bronchial asthma 4 5 to Pasteur's concept of one cause one illness many syndromes like high blood pressure or asthma are the result of the publications on this subject it is one of the overlapping of hereditary factors and a few suggestions that I have the weakness to require factors This is one reason why asthma feel somewhat proud of In fact this word has had the career I hoped it would and may be not really an illness in the real sense judging by the frequency with which it is of the word but a clinical and functional respiratory syndrome 1 used in both written and spoken language it did answer a need I had no intention of The innate terrain transmitted by suggesting one more neologism but its heredity can possibly concern two factors seemed to me that the word asthmology The bronchial hyperreactivity factor BHR had an element of novelty and above all is often present in early childhood and its production the necessary awareness of the reality is a result of the studies of large need to bring together within a kind of groups of homo and heterozygotic twins
