Reform In Soviet Politics The Lessons Of Recent Policies On Land And Water:

Reform in Soviet Politics Thane Gustafson,1981 This book examines the record of the Brezhnev regime in its only major domestic innovation the attempt to modernise Soviet agriculture Under Brezhnev the Soviets have invested more than half a trillion dollars in the countryside but the Kremlin has remarkably little to show for the effort The reason for the poor return Gustafson argues is that it is fundamentally flawed because it has been conducted along traditional Soviet lines For all its innovative features the agricultural programme resembles nothing so much as the Stalinist industrialising campaigns of the fifties The Soviets cannot afford another such reform Consequently the agricultural programme cannot stand as a model for meeting the complex problems the Soviets will have to deal with in the next twenty years Gustafson asserts that whatever solution they devise will depend on whether the Soviet political elite can develop resources and instruments of power more appropriate to the needs of a mature industrial economy But whether such changes are possible rests on fundamental questions about the essence of power in the Soviet regime

Soviet Science on the Edge of Reform Harley D. Balzer,2019-06-04 It is my sincere hope that the reforms currently being introduced in the USSR will render much of this book obsolete Yet even if perestroika brings significant change to the Soviet Union historians will want a record of what existed before After four years it has become apparent that perestroika is a painful long term process In such a large and diverse country even the reforms that are successful cannot take place everywhere at once One major goal in publishing this book is to make data from a major interview project on Soviet science and technology available to a broader audience Despite the changes taking place many of the features illuminated by these unique data persist

The Soviet Polity in the Modern Era Erik P. Hoffmann,Robbin Frederick Laird,
The Environment and World History Edmund Burke,Kenneth Pomeranz,2009-04-08 In 11 essays the contributors examine the connections between environmental change and other major topics of early modern world history population growth commercialization imperialism industrialization the fossil fuel revolution and more

Monolith James R. Millar,1992 **Soviet Regional Economic Policy** Jonathan R. Schiffer,2016-01-06 An analysis of Soviet spatial resource allocation decision making during the period 1955 1980 utilizing a political economy framework to evaluate the East West debate over relative investment shares in the European and Pacific Siberian parts of the USSR It has case studies and trade details **Problems of Communism** ,1982 **What Have We Learned About Science and Technology from the Russian Experience?** Loren R. Graham,1998 Describes the impact of Russian scientific research on science in the United States **Russian Foreign Policy Since 1990** Peter Shearman,2018-02-12 A book which brings together leading experts on Russia s foreign relations providing the most comprehensive coverage of contemporary Russian foreign policy currently available in a single volume Detailed case studies of relations with specific countries and regions are complemented by chapters that examine the process of decision making conflict between domestic institutional actors the role of groups such as the military and Russia s search for a new identity **The State in Socialist Society** Neil Harding,1984-01-01 The focus of all the essays in this collection is the problem of state power in Communist regimes The problematic nature of the relationship between state and society has troubled the marxist tradition since its inception and continues to be an unresolved issue for its contemporary theorists Western attempts to characterise the state formations of Communist regimes are equally notoriously debatable and fraught with methodological problems Both indigenous and Western attempts to theorise these formations are thoroughly reviewed in the early chapters of this book Later chapters each written by an expert in the field go on to explore particular issues the problem of nationalism within a multi national state for instance or the recent experience of selected Communist regimes in attempting to adapt their institutions to meet new problems Special attention is paid to the USSR in view of the enormous significance of the Soviet State and the extent to which it has served as a model Other case studies have been included on the basis that these state formations display unique features Yugoslavia that size and importance commends them China or that failure in the process of institutional adaptation is instructive for their pathology Poland What this book sets out to do is to bring a variety of approaches and a varied expertise to bear upon a very large but relatively neglected issue in contemporary politics the nature of the state formations of Communist regimes From Lathes to Looms Dorothy Solinger,1991-10-01 For more than three decades all manner of critics of socialist states non socialists and socialists alike have excoriated one of the most unfortunate consequences of the Stalinist style command economy its proclivity to favor heavy industry over other economic sectors Ironically these systems set up in the name of the people s interest shortchanged their constituents livelihood as factories and foundries spewed out an endless stream of machinery and metals at the expense of consumer items and daily necessities In the late 1970 s after the death of Mao Zedong Chinese leaders were able openly and soberly to scrutinize their faltering industrial system Under the determined leadership of Deng Xiaoping they quickly altered the proportions of industrial output in favor of consumer goods The Chinese leaders had two chief economic goals to increase the financial returns to the central government and to

lay the foundation for a reoriented future pattern of national growth that would give China a secure niche in world markets. They also hoped to open up new employment channels and to meet mass needs for consumer goods. This study shows why and how these goals were chosen and spells out how they were realized. Though there is no evidence of conscious borrowing in its vision and tactics, the agenda the Chinese leaders chose was highly resonant with what is elsewhere labeled industrial policy. For this reason, the book draws on the literature of industrial policy in France and Japan where this form of policy first took root rather than adopting the more conventional model of comparative communism. The book uncovers striking similarities between China's post-1979 plan and what occurred in France and Japan after World War II at the level of elite perception and goals and in societal behavioral terms. These similar conditions in context, decision-making pattern and implementation style provide the framework of analysis for this volume, a framework that could be applied to ex-colonial and dependent Third World economies as well as to more authoritarian socialist planning systems.

The Politics of Transition in Central Asia and the Caucasus Amanda E. Wooden, Christoph H. Stefes, 2009-06-08. Most books on the Caucasus and Central Asia are country-by-country studies. This book, on the other hand, fills a gap in Central Eurasian studies as one of the few comparative case study books on Central Eurasia covering both the Caucasus and Central Asia. It considers key themes right across the two regions, highlighting both political change and continuity. Comparative case study chapters written by regional experts from a variety of methodological backgrounds provide historical context and evaluate Soviet political legacies and emerging policy outcomes. Key topics include the varied types and sources of authoritarianism, political opposition and protest, politics, predetermined outcomes of post-Soviet economic choices, social and stability impacts of natural resource wealth, variations in educational reform, international norm influence on gender policy and the power of human rights activists. Overall, the book provides a thorough up-to-date overview of what is increasingly becoming a significant area of concern.

Crisis in Soviet Agriculture Stefan Hedlund, 2019-08-06. This book, first published in 1984, analyses the institutions and decision-making processes that determined agricultural production in the Soviet Union. It addresses the crisis in Soviet agriculture of the early 1980s, examining the problems of low productivity, adverse natural conditions and an underdeveloped infrastructure. The book's analysis of the crisis focuses on the growing gap between demand and supply of agricultural produce and the pressures on the government to alleviate the food shortages.

Internal Factors in Russian Foreign Policy Neil Malcolm, 1996. After the turmoil following the collapse of Soviet power, post-Communist Russia has emerged as an assertively independent force in international affairs. Meanwhile, an intense debate has been underway in Moscow about Russia's national interests and foreign policy priorities. Domestic political conflicts and the close ties with former Soviet partner states have made internal factors particularly important in shaping Russian foreign policy. *Internal Factors in Russian Foreign Policy* is the first systematic analysis of the domestic political forces which condition the international behaviour of the new Russian state. Four leading specialists examine in turn the areas of foreign policy thinking

and debate how policy is made the public politics of foreign policy and the role of the military They explore the changing domestic alignments associated with recent shifts in Russian foreign policy focusing on the roles played by institutions such as the Security Council and the legislature by military groupings and by emerging economic interests The authors throw new light on the domestic foundations of Moscow's more assertive and self-reliant stance *Soviet Power and the Countryside* N. Melvin, 2003-11-04 Drawing upon extensive archival and other original sources *Soviet Power and the Countryside* offers a new approach to understanding the political dynamics that led to the collapse of the Soviet order A detailed analysis of the design implementation and collapse of Soviet policy toward the countryside is used to explore the implications of a broadening of participation in the policy process from the 1960s Neil J Melvin argues that the new knowledge about rural society created as a result of this process provided the basis for a fundamental change in the nature of power relations in the Soviet order leading to the decay and eventual collapse of policy making institutions *Five Years That Shook The World* Harley D. Balzer, 2019-03-04 This book presents a balanced analysis of perestroika with an eye to the ongoing political social and cultural changes It is based on papers prepared for a conference on The First Five Years of Perestroika What Have We Learned What Has Gorbachev Learned held at Georgetown University **Smokestack Diplomacy** Robert G. Darst, 2001-01-02 Many environmental problems cross national boundaries and can be addressed only through international cooperation In this book Robert Darst examines transnational efforts to promote environmental protection in the USSR and in five of its successor states Russia Ukraine and the Baltic republics of Estonia Latvia and Lithuania from the late 1960s to the present The core of the book is a comparative study of three key issues nuclear power safety transboundary air pollution and Baltic Sea pollution Although expectations were high that the end of the Cold War and the breakup of the Soviet Union would lead to increased East West environmental cooperation the opposite has been true Russia and the other successor states have generally agreed to address such problems only when paid to do so Darst finds that post Cold War environmental cooperation has been most successful when there is an overlap between the environmental and economic interests of the successor states and those of their Western neighbors and when the foundation for cooperation was laid during the Cold War period The book is based on extensive original field research including interviews with diplomats government officials scientists and environmental activists in the successor states and Western Europe Its findings underscore the importance of the domestic and international political context in which international environmental policy making occurs It also deepens our understanding of the opportunities and dangers of positive inducements as a tool of international environmental policy **The Nature of Soviet Power** Andy Bruno, 2016-04-11 This in depth exploration of five industries in the Kola Peninsula examines Soviet power and its interaction with the natural world *Think Tanks and Civil Societies* R. Weaver, 2017-09-29 Government and individual policymakers throughout the developed and developing world face the common problem of bringing expert knowledge to bear in government decision making Policymakers need understandable reliable accessible and

useful information about the societies they govern They also need to know how current policies are working as well as possible alternatives and their likely costs and consequences This expanding need has fostered the growth of independent public policy research organizations commonly known as think tanks Think Tanks and Civil Societies analyzes their growth scope and constraints while providing institutional profiles of such organizations in every region of the world Beginning with North America contributors analyze think tank development past and future consider their relationship to the general political culture and provide detailed looks at such examples as the Heritage Foundation and the Institute for Research on Public Policy A historical and subregional overview of think tanks throughout Europe notes the emphasis on European Union issues and points to a dramatic rise in the number and influence of free market institutes across the continent Think tanks in Germany Spain and France are profiled with respect to national politics and cultures Advanced industrial nations of northern Asia are compared and contrasted revealing a greater need for independent policy voices Moving to countries undergoing economic transition contributors deal with challenges posed in Russia and the former Soviet bloc and their think tanks search for influence independence and sustainability Other chapters deal with the developing countries of Africa Asia the Middle East and Latin America finding that the number quality and independence of think tanks is largely determined by the degree of democracy in individual nations
