Commitment to Reform through Strategic Communication Cecilia Caba ero-Verzosa, Helen R. Garcia, 2009-10-06 Strategic communication is a powerful tool for creating broad based support for reform and change initiatives Much has been written about why communication matters in reform efforts but there is scant material available to help those who manage reforms apply communication concepts and approaches to their own programs and policy reform initiatives Building Commitment to Reform through Strategic Communication attempts to bridge that gap The authors present a pragmatic and systematic approach for reformers ready to use communication strategically to achieve their reform goals The Five Communication Management Decision Tool helps reformers and their teams develop a framework for their communication strategies This decision tool helps managers see change initiatives through the eyes of those who will be affected by the reforms When the decision tool is used in the early stages of the development of change programs reformers gain an even deeper understanding of the stakeholders perspectives on the reforms which influence stakeholder opposition or support for them Such understanding will not only be instructive but possibly transformative for both change agents and those stakeholders whose support is critical to the success of reform Reform agents may recognize the source of stakeholder resistance and be able to revise reform goals and redesign change interventions Stakeholders who have a shared understanding of why the status quo is not acceptable and change is necessary are more likely to create coalitions of committed allies and supporters who will work together to achieve reform goals This workbook illustrates how the decision tool can be used for various types of change and reform initiatives from policy reform to country and donor partnership agreements to sectoral reforms Tested and used in learning interventions across cultures regions and sectors the tool has been used successfully by teams in government nongovernmental organizations the business sector and donor agencies The book will be of great interest to readers working in all of these areas **Countering Extremism: Building Social**

House of Commons - Communities and Local Government Committee: Community Budgets - HC 163 Great Britain: Parliament: House of Commons: Communities and Local Government Committee, 2013-10-23 Community Budgets are demonstrating their potential to deliver cheaper more integrated and more effective public services They are at risk however of being replaced after a few years if key issues are not resolved If this opportunity is missed the Committee warns that local services could come under unsustainable pressure in the face of increased demand and reduced budgets This in turn may result in more spending later on judicial and emergency health and welfare interventions The Government should send a clear message that it will assist every local authority wishing to introduce Community Budgets and to set out the specific assistance it will provide them with Furthermore the programme of pilots must not be allowed to slow progress towards wider implementation If they are to succeed public service providers and local authorities must realise investment in Community Budgets will bring them benefits Local authorities their partners and central government should therefore develop a framework for agreements on how the benefits of investment are to be shared On the Troubled Families Programme the Committee is supportive of the work being done but highlights the need for greater focus on how work with these families will continue after the programme

ends in 2016 Noting that the resources available have not increased in proportion to the number of families added to the programme in June DCLG needs to monitor carefully progress and provide more resources to local authorities if necessary
