## **Reforming Korea's Industrial Conglomerates:**

Reforming Korea's Industrial Conglomerates Edward Montgomery Graham, 2003 In 1998 the Korean economy experienced the deepest recession since the Korean War Within a year a number of smaller industrial conglomerates had failed In this study Graham examines the causes of this situation tracing them back to the aggressive industrial policy begun by president Park Chung hee during the late 1960s He also analyzes reforms undertaken since 1997 concluding that they have not been entirely successful Neoliberalism and Institutional Reform in East Asia Meredith Jung-En Woo, 2007-11-06 This book brings together scholars of political economy law and sociology to interrogate the seemingly unproblematic notions the rules of law good corporate governance and flexible labour market that inform neoliberal policy prescriptions It also discusses how these concepts have been translated and practiced in East Asia Reforming the IMF for the 21st Century, 2006 The Oxford Handbook of South Korean Politics JeongHun Han, Ramon Pacheco Pardo, Youngho Cho, 2023-01-24 This Handbook presents and analyses contemporary South Korean politics bringing together domestic political economic social cultural and demographic developments and putting them in the context of trends in fellow developed countries

**Transformations in the Brazilian and Korean Processes of Capitalist Development between the Early 1950s and the Mid-2010s: From Global Capital Accumulation to Late Industrialisation** Nicolás Grinberg, 2023-10-16 Challenging mainstream nation centred theories of economic development Nicol s Grinberg examines the specificities of capitalist development in Brazil and South Korea by starting from their modes of participation in the international division of labour and hence in the production of surplus value on a global scale Contrary to those theories he does not consider these as resulting simply from the economic policies of nation states and their associated political institutions nor from local class struggle dynamics or geopolitical developments Rather drawing on key insights from Marx s critique of political economy his analysis begins by recognising that the process of capitalist development is global in terms of its economic dynamics and historical trends and national only in its political and institutional forms of realisation State mediated patterns of economic development and institutional change in Brazil and Korea as well as the intra and inter state political processes through which these have come about are then considered mediations in the conformation and reproduction of the nationally differentiated uneven process of capital s valorisation on a global scale **The Korean Developmental State** Iain Pirie, 2007-09-12 The Korean Developmental State is a comprehensive and up to date analysis of processes of state and economic restructuring in South Korea since the 1997 crisis The book distinguishes itself from previous studies by consistently arguing that structural changes in the global political economy have played a crucial role in reshaping the Korean state s own economic project More precisely Iain Pirie seeks to demonstrate how the Korean state increasingly adopted neo liberal policies from the 1980s onwards as a rational response to the evolution of global economic structures an evolution which has been driven by the continuous attempts of major global firms and leading capitalist states to overcome

the chronic profitability problems that have dogged the core capitalist area since the late 1960s The radical restructuring programme the Korean state initiated after the 1997 crisis must be understood as a logical conclusion to these earlier more incremental processes of reform it initiated almost two decades earlier This book seeks to establish the neo liberal character of the Korean state through a close analysis of key institutional and policy reforms and serious engagement with more theoretical debates concerning the nature of the neo liberal state itself The Korean Developmental State offers a new perspective on the economic experience of Korea as a development model one that emphasizes global trends and contradictions for Korea s economic crisis and resulting transformation and as such will be of significant interest to scholars of Korean studies and the Asian economy

### **Governing Finance**

Andrew Walter,2011-03-15 The international financial community blamed the Asian crisis of 1997 1998 on deep failures of domestic financial governance To avoid similar crises in the future this community adopted and promoted a set of international best practice standards of financial governance The G7 asked specialized public and private sector bodies to set international standards and tasked the International Monetary Fund and the World Bank with their global dissemination Non Western countries were thereby encouraged to emulate Western practices in banking and securities supervision corporate governance financial disclosure and policy transparency In *Governing Finance* Andrew Walter explains why Indonesia Malaysia South Korea and Thailand key targets and test cases of this international standards project were placed under intense pressure to transform their domestic financial governance Walter finds that the depth of the economic crisis and more enduring aspects of Asian capitalism such as family ownership of firms made substantive compliance with international standards very costly for the private sector and politically difficult for governments to achieve In spite of international compliance pressure the result was varying degrees of cosmetic or mock compliance In a book containing lessons for any agency or country attempting to implement lasting change in financial governance Walter emphasizes the limits of global regulatory convergence in the absence of support from domestic politicians institutions and firms **US-China Trade**

**Disputes: Rising Tide, Rising Stakes , Trans-Pacific Partnership: An Assessment** Cathleen Cimino-Isaacs,Jeffrey J. Schott,2016-07-20 The Trans Pacific Partnership TPP between 12 Pacific Rim countries has generated the most intensive political debate about the role of trade in the United States in a generation The TPP is one of the broadest and most progressive free trade agreements since the North American Free Trade Agreement NAFTA The essays in this Policy Analysis provide estimates of the TPP s benefits and costs and analyze more than 20 issues in the agreement including environmental and labor standards tariff schedules investment and competition policy intellectual property ecommerce services and

financial services government procurement dispute settlement and agriculture Through extensive analysis of the TPP text PIIE scholars present an indispensable and detailed reader's guide that also sheds light on the agreement's merits and shortcomings In *Rich People Poor Countries* Caroline Freund identifies and analyzes nearly 700 emerging market billionaires whose net worth adds up to more than 2 trillion Freund finds that these titans of industry are propelling poor countries out of their small scale production and agricultural past and into a future of multinational industry and service based mega firms And more often than not the new billionaires are using their newfound acumen to navigate the globalized economy without necessarily relying on political connections inheritance or privileged access to resources This story of emerging market billionaires and the global businesses they create dramatically illuminates the process of industrialization in the modern world economy

**Regulatory Reform** Russell Pittman, 2003 *Financial Globalization, Economic Growth, and the Crisis of 2007-2009*, **Seoul** Rafael Luna, 2024-04-30 This book focuses on understanding how a megacity like Seoul can be read as a formal architectural composition and not an endless urban sprawl In a broader sense the book discusses the dichotomy between city and urbanization city being an architectural problem of bounded forms while urbanism is an infrastructural project of expansion It is an uncontested reality that urbanization is a continuous global process that has produced nebulous conurbations labeled as megacities These expand beyond the virtual administrative boundary of any said city producing a discrepancy between an area of administrative control and the real physical condition of human settlement If there were a better formal understanding of megacities through their typological architectural conditions then there could be a better assessment of the qualitative state of urbanization Avant garde groups from the 1950s 1960s and 1970s such as Team X the Situationist the Structuralist and the Metabolist worked with ideas of megaforms and megastructures to address this issue Although most of these proposals remained as paper architecture this book reevaluates some of these ideas for the 21st century megacity using Seoul as a case study due to its clear typological formations produced over its different periods of governance The aim is to present the concept for an infra architectural hybrid model of typological islands and subterranean megastructure that organizes Seoul as a flexible multi linear city This book will be of interest to academics and students of architecture urban geography and Asian studies

East Asian Capitalism Andrew Walter, Xiaoke Zhang, 2012-07-26 This volume analyzes developments in East Asian capitalism since the 1980s focusing on three main areas business systems financial structures and labor markets

**After the Washington Consensus: Restarting Growth and Reform in Latin America**, **The Economic Rise of East Asia** Linda Glawe, Helmut Wagner, 2022-01-01 In light of the growing global economic importance of East Asia this book analyzes and compares the extraordinary development paths and strategies of Japan South Korea and China It examines both the factors that enabled these countries prolonged periods of high speed economic growth and the reasons for their subsequent cool downs In addition the book illustrates how their development strategies served as role models for one another and what current and future developing countries can learn from the East

Asian success stories This book will appeal to scholars and students of economics and development studies with an interest in the East Asian development model
