that add to this growing trend towards anti politics by either removing or displacing the potential for choice collective agency and deliberation This book examines the relationship between these two trends as understood within the broader shift towards governance. It brings together a number of contributions from scholars who have a varied range of concerns but who nevertheless share a common interest in developing the concept of depoliticization through their engagement with a set of theoretical conceptual methodological and empirical questions. This volume explores these questions from a variety of different perspectives and uses a number of different empirical examples and case studies from both within the nation state as well as from other regional global and multi level arenas. In this context this volume examines the potential and limits of depoliticization as a concept and its position and contribution in the nexus between the larger and more established literatures on governance and anti politics.
