Religion in the Age of Decline S. J. D. Green, 1996-05-30 The seemingly inexorable decline of religion in twentieth century Britain has for long fascinated historians sociologists and churchmen In this cogent and original study S J D Green concentrates scholarly attention for the first time on the social history of the chapel in a characteristic industrial urban setting He demonstrates just why so many churches were built in these years who built them who went to them and why and he offers a fresh interpretation of the extent and the implications of the decline of religion in Britain

The Churches and the Working Classes Patricia Midgley, 2012-12-21 Contrary to our perception of the centrality of the churches in English life in the nineteenth century the disappointing results of the 1851 Religious Census led religious leaders to seek a variety of ways to increase religious allegiance as the century progressed The apparent apathy and lack of interest in formal religion on the part of the working classes was particularly galling and the various denominations tried hard to attract them through evangelical missions as well as social and charitable ventures which sometimes competed with religious concerns to the latter's detriment This book traces the motivations concerns and efforts of the churches particularly in the period between 1870 and 1920 and the ambivalent responses of ordinary people The Education Act of 1870 led to the

churches losing their hold on the education of the young a consequence foreseen by many church leaders but unable to be prevented By 1920 it was apparent that the churches optimism regarding an increased role with a war weary population would not be fulfilled The focus is on the city of Leeds representative of the industrialised urban areas with burgeoning populations which proved to be such a challenge to the churches at the same time stimulating them to ever greater efforts

The Passing of Protestant England S. J. D. Green, 2010-12-09. In this book S. J. D. Green offers an important account of the causes, courses and consequences of the secularisation of English society. He argues that the critical cultural transformation of modern English society was forged in the agonised abandonment of a long domesticated Protestant Christian tradition between 1920 and 1960. Its effects were felt across the nation and among all classes. Yet their significance in the evolution of contemporary indigenous identities remains curiously neglected in most mainstream accounts of post-Victorian Britain. Dr Green traces the decline of English ecclesiastical institutions after 1918. He also investigates the eclipse of once common moral sensibilities during the years up to 1945. Finally, he examines why subsequent efforts to reverse these trends so comprehensively failed. His work will be of enduring interest to modern historians, sociologists of religion and all those concerned with the future of faith in Britain and beyond.

The Social Significance of Religion in the Enlarged Europe Olaf Müller, 2016-02-24. Engaging with some of the central issues in the sociology of religion, this volume investigates the role and significance of churches and religion in contemporary Western and Eastern Europe. Based on an extensive international research project, it offers case studies of various countries including Finland, Ireland, Portugal, Germany, Poland, Russia, Estonia, Hungary and Croatia, as well as cross-country comparisons. Researching more precisely the present social relevance of church and religion at different levels, *The Social Significance of Religion in the Enlarged Europe* raises and responds to both descriptive and explanatory questions: Can we observe tendencies of religious decline in the various Western and Eastern European countries? Are we witnessing trends of religious individualization? To what extent has there been a religious upswing in the last few years? And what are the factors causing the observed processes of religious change? Marked by its broad range of data and a coherent conceptual framework, in accordance with which each chapter assesses the extent to which three important theoretical approaches in the sociology of religion—secularization theory, the market model of religion and the individualization thesis—are applicable to the data, this book will be of interest to scholars of sociology, politics
