Religion Without Revelation:

Religion Without Revelation Julian Huxley, 1957 Religion Without Revelation. (New and Revised Edition.). Julian Huxley, 1957 *Religion Without Revelation* Martin Mayer, 1957 *Religion Without Revelation* Julian Sorell Huxley (Sir), 1957 Bulletin of the Atomic Scientists, 1959-12 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world **The Catholic Doctrine of Non-Christian Religions**

Miikka Ruokanen, 2016-05-18 In the Second Vatican Council 1962-65 the Catholic Church for the first time recognized non-Christian religions as entities which the Church should respect and with which Christians should enter into dialogue There are however conflicting views in Catholic interpretations of Conciliar theology to what extent did the Council see other religions as means to salvation The author offers The Catholic Doctrine of non-Christian Religions according to the Second Vatican Council as the first comprehensive and analytic piece of research on Conciliar teaching concerning the nature of other faiths His study is based on the original Latin and covers Conciliar and pre-conciliar documents with special focus on the Declaration on the relation of the Church to Non-Christian religions *Nostra aetate* In his detailed and careful analysis Ruokanen demonstrates that Vaticanum Secundum understood non-Christian religions as naturally good entities part of human culture Religions express in many ways and to varying degrees the natural cognition of God and of natural moral law Except for Judaism they do not however possess the status of being considered channels of divine revelation or salvific grace The seeds of truth present in other faiths must be purified and perfected by the fullness of grace and truth given in Christ and entrusted to the Church *Religion Without Revelation. New Edition* Sir Julian Sorell Huxley, 1957

Religion Without Revelation Julian Sorell Huxley (biologiste.), 1941 **Reformed Dogmatics** Herman Bavinck, John Bolt, John Vriend, 2003-10 In English for the first time Bavinck's magnum opus covers the history literature and foundations of dogmatic theology Karl Barth's Theology as a Resource for a Christian Theology of Religions Sven Ensminger, 2014-08-28 This book uses Karl Barth's theology as a resource for Christian theology of religions For this purpose it examines Barth's theology under the doctrinal aspects of revelation revelation and religion theological anthropology and election addressing questions such as the possibility of and context for revelation Barth's understanding of religion the theological approach to the human being and soteriology Furthermore Barth's thought is put into conversation with other approaches in the field of theology of religions notably Karl Rahner's inclusivism and John Hick and the pluralist paradigm It is shown that Barth's theological system as a whole can serve as a resource for the Christian approach to and interaction with those of other faiths or no faith at all This is achieved through maintaining a balance between the commitment to the own faith and the openness to the sovereignty of God impacting the whole of creation Central to Barth's approach is the challenge to the Christian community to see their presuppositions challenged in the most unexpected circumstances while looking beyond human

categories to affirm the dignity bestowed upon all of humanity through the divine Yes in the person Jesus Christ Barth's theology with its starting point in the person of Jesus Christ is advocated as a framework for the members of the Christian community as they live alongside those with a different faith from their own

Julian Huxley, Evolutionism and the History of Transhumanism Ingrid Dunér, 2025-03-18 The evolutionary biologist Julian Huxley 1887-1975 attempted to promote a religion for the future which he would come to refer to as Transhumanism Transhumanism was an attempt to unite a more traditional humanistic view of the human as containing some form of core essence or potential with an evolutionary point of view of humans as a work in progress Before humans natural selection had been responsible for the transformation of life Through its ordering principles and through chance it had given rise to humankind which had ushered in a new phase of evolution Humanity stood on the threshold of yet another critical point in evolution The consciously purposive phase of evolution This open access book explores the history of transhumanism by analyzing how Julian Huxley's transhumanism develops and why it does at this particular point in time by placing it firmly within the context of his specific scientific and sociopolitical milieu starting roughly in the interwar years and stretching over the Second World War to the 1970s Continuing the study then focuses on the new transhumanists of the 1970s 1980s and 1990s and investigates continuity in mode of thinking contributing to a more coherent understanding of transhumanism its history and of modern projects of human enhancement The book captures how scientific and technological development in relation to society and social order shapes images and expectations of the future and of what future is desirable

Religion Within Reason, Second Edition Steven M. Cahn, 2025-02-27 Most believers and their critics agree that religious commitment relies on the acceptance of supernaturalism Steven M Cahn argues to the contrary He maintains that theism is neither necessary nor sufficient for adherence to a religious outlook He writes in a nonpolemical spirit about morality the problem of evil faith miracles heaven mystical experience and religious diversity His book develops a strong case for the reconciliation of science and religion

Moral Energy in America Rebecca K. Wright, 2025-04-29 This book offers an illuminating exploration of how the concept of energy shaped American thought culture and politics throughout the first half of the twentieth century This essential history traces how politicians sociologists geographers urban planners economists and intellectuals adopted the idea of energy to bolster their social programs and visions of the future through distinctive energy imaginaries

Reconciling Science and Religion Peter J. Bowler, 2014-04 Although much has been written about the vigorous debates over science and religion in the Victorian era little attention has been paid to their continuing importance in early twentieth century Britain Reconciling Science and Religion provides a comprehensive survey of the interplay between British science and religion from the late nineteenth century to World War II Peter J Bowler argues that unlike the United States where a strong fundamentalist opposition to evolutionism developed in the 1920s most famously expressed in the Scopes monkey trial of 1925 in Britain there was a concerted effort to reconcile science and religion Intellectually conservative scientists

championed the reconciliation and were supported by liberal theologians in the Free Churches and the Church of England especially the Anglican Modernists Popular writers such as Julian Huxley and George Bernard Shaw sought to create a non Christian religion similar in some respects to the Modernist position Younger scientists and secularists including Rationalists such as H G Wells and the Marxists tended to oppose these efforts as did conservative Christians who saw the liberal position as a betrayal of the true spirit of their religion With the increased social tensions of the 1930s as the churches moved toward a neo orthodoxy unfriendly to natural theology and biologists adopted the Modern Synthesis of genetics and evolutionary theory the proposed reconciliation fell apart Because the tensions between science and religion and efforts at reconciling the two are still very much with us today Bowler s book will be important for everyone interested in these issues **Science**

and Religion: Fifty Years After Vatican II Kenan Osborne,Ki Wook Min,2014-01-31 In the past one hundred years two major realities have changed both science and religion The world of science has been enriched by quantum physics the computation of the age of the universe archaeological data in the Middle East and a scientific stress on historical writing The world of religion has been enriched by the establishment of the World Council of Churches and the Second Vatican Council In the past fifty years major scientists and major religious leaders have met together again and again In the past fifty years religious leaders from Christianity Islam and Judaism have held a number of thought provoking conferences In this volume these gatherings are reviewed and evaluated Two major religious problems have challenged the science religion discussions namely which God should the scientists agree on the Trinitarian God Allah or Yahweh Which history of the universe sponsored by these three religions should scientists be looking for This volume raises questions and suggests some preliminary forms of serious discussion **Theologizing in Black** Celucien L. Joseph,2020-04-15

Theologizing in Black is a creative and rigorous comparative study on black theological musings and liberative intellectual contemplations engaging the theological ethics and anthropology of both continental African theologians Tanzania Kenya Democratic Republic of the Congo and black theologians in the African Diaspora Haiti Trinidad Jamaica Antigua and Barbuda United States Using the pluralist approach to religion promoted by the philosopher of religion and theologian John Hick the book is also an attempt to bridge an important gap in the comparative study of religion Africana Studies and Liberation theology both in Africa and its diaspora The book provides an analytical framework and intellectual critique of white Christian theologians who deliberately disengage with and exclude black and Africana theologians in their theological writings and conversations From this vantage point Africana critical theology is said to be a theology of contestation as it seeks to deconstruct white supremacy in the theological enterprise This book not only articulates a rhetoric of protest about the misrepresentation and underrepresentation of the humanity of African and black people in white theological imagination it also enunciates a positive image of black humanity and congruently promulgates a constructive representation of blackness The paramount goal of Africana theological anthropology and ethics is the preservation of life and promotion of human dignity and the sheer

acknowledgement that the African people and people of African descent are bearers of the image of God *The Study of Greek and Roman Religions* Nickolas P. Roubekas,2022-07-14 How should ancient religious ideas be approached Is religion an applicable term to antiquity Should classicists ancient historians and religious studies scholars work more closely together Nickolas P Roubekas argues that there is a disciplinary gap between the study of Greek and Roman religions and the study of religion as a category a gap that has often resulted in contradictory conclusions regarding Greek and Roman religion This book addresses this lack of interdisciplinarity by providing an overview criticism and assessment of this chasm It provides a theoretical approach to this historical period raising the issue of the relationship between theory of religion and history of religion and explores how history influences theory and vice versa It also presents an in depth critique of some crucial problems that have been central to the discussions of scholars who work on Graeco Roman antiquity encouraging us to re examine how we approach the study of ancient religions **Religion and Artificial Intelligence** Beth Singler,2024-10-31 Artificial intelligence AI is rarely out of the news or the public imagination Images of red eyed Terminators illustrate press accounts of incremental advances in medical diagnosis facial recognition natural language processing and robotics Such advances are transforming society through measurable impacts on people s decisions and opportunities Religion and Artificial Intelligence An Introduction explores an emerging field with a religious studies approach drawing on cultural and digital anthropological methods to demonstrate the entanglements of religion and AI our imaginaries of these objects and our ideas about their utopian or dystopian futures It addresses key topics including the following What AI is and is not How religions are reacting to AI with examples of rejection adoption and adaptation How established religions understand creation and place human like AI within that How overtly secular and even new atheist groups understand AI as a tool for liberation from human evolution and religion Religious visions of superintelligent AI This engaging book is essential for anyone considering the relationship between religion science and technology and interested in the questions raised by transhumanism posthumanism and new religious movements *Opening the Covenant* Michael S. Kogan,2008 Michael Kogan delves deeply into the theologies of Christianity and Judaism to locate the precise points of difference and convergence He sees Christianity as the breaking open of the original Covenant to include gentile peoples God has brought this about Kogan argues through Jesus and his interpreters *The Poetry of Philip Larkin* S. N. Prasad,2022-07-14 The Poetry Of Philip Larkin A Study In Long Perspectives By S N Prasad The present book is an innovative attempt to give the Philip Larkin criticism a new direction Early critical writings on Larkin for the most part tried to show him as a provincial poet and his poetic imagination as of a middle brow kind However soon some perceptive readers of his poetry found some of its real value as a result of which he is now regarded as one of the major British post modern poets This book has tried to show that Philip Larkin in his poetry tries to see man in his present existential condition and he sees his future prospects as a species in very long perspectives and in this respect besides his many faceted merit as a true poet he can and should be seen

in the company of great mainstream scientists philosophers creative writers and thinkers Philip Larkin in his major poems aims at giving a therapeutic touch to the ailing human culture This book has a long INTRODUCTION which tries to show the true origins of man his physiology and his present psycho social condition Views of reputed creative writers scientists philosophers and thinkers have been referred to in this connection In the three middle sections of the book thirty of Larkin s poems taken from his three major volumes have been analyzed individually at some length These analyses reveal some of the very important but hitherto unrevealed aspects of his poetry
