Religion And Rational Choice:

Religion and Rational Choice Shivesh Chandra Thakur,1981 To find more information on Rowman Littlefield titles please visit us at www.rowmanlittlefield.com **Choice and Religion** Steve Bruce,1999 The orthodox view is that the democracies of the western world have become increasingly secular over the twentieth century Fewer and fewer people have chosen to believe and the church has declined markedly as religion has changed from being part of an identity ascribed at birth to being a matter of personal choice Choice and Religion provides a detailed critique of the rational choice approach to religion to demonstrate that industrialisation has secularised the western world and that diversity far from making religion more popular by allowing individuals to maximize their returns undermines it The claim that diversity and competition promote religion is refuted with evidence from a wide variety of western societies Bruce examine the Nordic countries and the ex communist states of eastern Europe to explore the consequences of different sorts of state regulation and to show that ethnicity is a more powerful determinate of religious change than market structures Where religion matters it is not because individuals are maximising their returns it is because it defines group identity and is heavily implicated in social conflict

Rational Choice Theory and Religion Lawrence A. Young,2016-04-29 Rational Choice Theory and Religion considers one of the major developments in the social scientific paradigms that promises to foster a greater theoretical unity among the disciplines of sociology political science economics and psychology Applying the theory of rational choice the theory that each individual will make her choice to maximize gain and minimize cost to the study of religion Lawrence Young has brought together a group of internationally renowned scholars to examine this important development within the field of religion for the first time **An Introduction to the Sociology of Religion** Professor Pål Repstad,Assoc Prof Inger Furseth,2013-05-28 An Introduction to the Sociology of Religion provides an overview of sociological theories of contemporary religious life Some chapters are organized according to topic Others offer brief presentations of classical and contemporary sociologists from Karl Marx to Zygmunt Bauman and their perspectives on social life including religion Throughout the book illustrations and examples are taken from several religious traditions [Marx, Critical Theory, and Religion](#) ,2006-08-01 The Sociology of Religion has had several frameworks guiding its analysis including functionalism interpretive sociology phenomenology symbolic interactionism and now rational choice theory Marxism has tended to ignore religion assuming it is something that would eventually disappear even though it retained theological elements This collection of essays brings together a group of scholars who use frameworks provided by Marx and Critical Theory in analyzing religion It s goal is to establish a critical theory of religion within the sociology of religion as an alternative to rational choice In doing so it engages in a critique of the positivism uncritical praise of the market neoconservatism and one dimensional conception of rationality of the rational choice theory of religion [Rational Choice Approach to Religion](#) ,1995 *Religion in Sociological Perspective* Keith A. Roberts,David Yamane,2011-06-09 Religion in Sociological

Perspective is an introduction to the sociology of religion core text designed to present and illustrate the basic theories sociologists use to understand the social dimensions of religion First and foremost the authors seek to help students understand the perspective from which sociologists view religion By the time students have finished this book they should understand the central theories and methods of research in the sociology of religion and they should have an idea of how to apply these analytical tools to new groups they encounter The goal of this text is to be illustrative rather than all encompassing The Fifth Edition continues to draw on a wide range of perspectives The text aims to help students recognize the contributions of various theoretical perspectives and the blind spots of each theory Conflict functional social constructionist and rational choice paradigms are used throughout the text Various middle range theories are also utilized to explore specific processes Despite the effort to introduce many perspectives however we have made an effort to enhance integration of the text by using one framework throughout the book the open systems model

Religion and Everyday Life Stephen Hunt, 2013-01-11 This introductory text explores the historical and contemporary relevance of religion to social life through an examination of practice and belief Author Hunt reconsiders how theories and concepts are lived at the level of selfhood and cultural identity through religious and spiritual belief At the same time he looks at contemporary changes in religious life and how these are impacted by socialization institutional belonging and belief and at the significance of class gender age and ethnicity Individual chapters cover a range of issues such as religion identity and community secularization and pluralism traditional Christianity change and continuity globalization and the global context religion and ethnicity The text challenges much current sociological thought and deals with contemporary Christianity a range of world faiths and new and developing expressions of religion and spirituality With tables and diagrams to illustrate key points and trends it provides an accessible and captivating introduction to the sociology of religion

provides an invaluable resource for research and teaching in this diverse discipline *The Parting of the Ways* Stephen Spence, 2004 This book seeks to inject into the general discussion of the Parting of the Ways of Judaism and Christianity the social realities of the separation of a particular Christian community and a particular Jewish community By drawing upon the literary and the historical data available concerning the church in Rome Spence seeks to discover when and how Christians came to see themselves as an identifiably distinct community His findings will surprise those who see the Parting of the Ways as a slow process He argues that although the parting was early it was not without its complications Drawing upon the work of Rodney Stark a sociologist of religion Spence suggests that within the church in Rome there was a struggle between those who saw the church as a Jewish sect and those who saw the church as a Roman cult a struggle already underway when the Apostle Paul wrote Romans This struggle however was not an even one because it was the cultists those for whom the church's primary social location was the pagans of Rome who held the positions of power over the numerically smaller sectarians who sought to maintain the church's primary identity as a Jewish sect acceptable within the synagogues of Rome *Religion Today* Ross Aden, 2012-10-18 Introduces students to key concepts in religious studies through a compelling problem solving framework This new textbook features the following dynamic case studies opening each chapter that teach critical thinking skills and engage students in contemporary religious issues such as the intersection of science and religion a wide range of examples from world religions throughout the text clear introductions to classic and contemporary theories of religion both Eastern and Western and chapter summaries that include essential concepts a list of key terms and questions for individual reflection or class discussion Religion today guides students in understanding the complex role that religion plays in the world while also building a solid foundation in both religious studies and problem solving skills **Religion in Consumer Society** François Gauthier, 2016-04-08 Presenting an overview of an emerging field in the study of contemporary religion this book together with a complementary volume Religion in the Neoliberal Age explores issues of religion neoliberalism and consumer society Claiming that we have entered a new phase that implies more than the recasting of state religion relations the authors examine how religious changes are historically anchored in modernity but affected by the commoditization mediatization neoliberalization and globalization of society and social life Religion in Consumer Society explores religion as both shaped by consumer culture and as shaping consumer culture Following an introduction which critically analyses studies on consumer culture and integrates scholarship in the sociology of religion this book explores the following topics how consumerism and electronic media have shaped globalized culture and how this is affecting religion the dynamics and characteristics of often overlooked middle class religion and how these relate to globalization and differences between developed and emerging countries emerging trends and how we understand phenomena as different as mega churches and holistic spiritualistic journeys and how the pressures of consumer culture act on religious traditions indigenous and exogenous the politics of religious phenomena in the Age of Neoliberalism and the hybrid areas emerging from these

reconfigurations of religion and the market Outlining changes in both the political institutional and cultural spheres the contributors offer an international overview of developments in different countries and state of the art representation of religion in the new global political economy *Critiquing the Rational Choice Theory of Religion* John Churchill, University of the West of England, 2006

Science and Nonbelief Taner Edis, 2009-12-02 In this wide ranging overview physicist and acclaimed science writer Edis examines the relationship between today's sciences and religious nonbelief He provides a very readable nontechnical introduction to the leading scientific ideas that impinge upon religious belief

The Sociology of Religion Malcolm B. Hamilton, 2012-06-12 This clear introduction to the sociology of religion combines a discussion of key theorists with a modern emphasis on the diversity of religious beliefs and practices Malcolm Hamilton's expanded second edition brings the discussion fully up to date and extends its material on secularization and religious sects giving a broad comparative view Drawing on the insights of history anthropology and sociology he surveys classic and contemporary theory to give a full picture of the variety and scope of theoretical perspectives

Religions in Movement Robert Hefner, John Hutchinson, Sara Mels, Christiane Timmerman, 2013-10-23 There has long been a debate about implications of globalization for the survival of the world of sovereign nation states and the role of nationalism as both an agent of and a response to globalization In contrast until recently there has been much less debate about the fate of religion Globalization has been viewed as part of the rationalization process which has already relegated religion to the dustbin of history just as it threatens the nation as the world moves toward a cosmopolitan ethics and politics The chapters in this book however make the case for the salience and resilience of religion often in conjunction with nationalism in the contemporary world in several ways This book highlights the diverse ways in which religions first and foremost make use of the traditional power and communication channels available to them like strategies of conversion the preservation of traditional value systems and the intertwining of religious and political power Nevertheless challenged by a more culturally and religiously diversified societies and by the growth of new religious sects contemporary religions are also forced to let go of these well known strategies of preservation and formulate new ways of establishing their position in local contexts This collection of essays by established and emerging scholars brings together theory driven and empirically based research and case studies about the global and bottom up strategies of religions and religious traditions in Europe and beyond to rethink their positions in their local communities and in the world

Faith in Reading David Paul Nord, 2004-08-19 In the twenty first century mass media corporations are often seen as profit hungry money machines It was a different world in the early days of mass communication in America Faith in Reading tells the remarkable story of the noncommercial religious origins of our modern media culture In the early nineteenth century a few visionary entrepreneurs decided the time was right to reach everyone in America through the medium of print Though they were modern businessmen their publishing enterprises were not commercial businesses but nonprofit societies committed to the publication of traditional religious texts Drawing on organizational reports and archival

sources David Paul Nord shows how the managers of Bible and religious tract societies made themselves into large scale manufacturers and distributors of print These organizations believed it was possible to place the same printed message into the hands of every man woman and child in America Employing modern printing technologies and business methods they were remarkably successful churning out millions of Bibles tracts religious books and periodicals They mounted massive campaigns to make books cheap and plentiful by turning them into modern mass produced consumer goods Nord demonstrates how religious publishers learned to work against the flow of ordinary commerce They believed that reading was too important to be left to the market revolution so they turned the market on its head seeking to deliver their product to everyone regardless of ability or even desire to buy

Wedding modern technology and national organization to a traditional faith in reading these publishing societies imagined and then invented mass media in America Encyclopedia of Religion and Society William H. Swatos,1998 As the new millennium approaches the sacred and profane interface conflict and intermingle in novel ways The Encyclopedia of Religion and Society provides a guide map for these developments From succinct brief notes to essay length entries it covers world religions religious perspectives on political and social issues and religious leaders and scholars present and past in the United States and the world This comprehensive volume is an essential reference for studies in the anthropology psychology politics and sociology of religion Topics include abortion adolescence African American religious experience anthropology of religion Buddhism commitment conversion definition of religion ecology movement Emile Durkheim ethnicity fundamentalism Hinduism Islam Judaism new religious movements organization parish Talcott Parsons racism research methods Roman Catholicism sexism Unification Church Max Weber and many others

Salvation Goods and Religious Markets Jörg Stolz,2008 The idea that religion has to succeed in a market selling salvation goods has proved to be extremely attractive to scholars in sociology and the study of religion Max Weber used the term salvation good to compare different religious traditions Pierre Bourdieu

employed the term in order to analyze religious economy And recently an American group of researchers advocating rational choice of religion put the theme at the forefront of current debates This book the fruit of an International Congress in Lausanne in April 2005 brings together leading specialists in the fields of sociology and the study of religion who discuss the terms salvation goods or religious goods and religious market The authors test the applicability of these concepts by using specific examples and they either deliberately advocate or criticize Weberian Bourdieusian or rational choice perspectives
