Religion And State Egypt Iran And Saudi Arabia:

Religion and State Anwar Alam,1998 Religion, State and the United Nations Anne Stensvold,2016-07-22 This volume approaches the UN as a laboratory of religious political value politics Over the last two decades religion has acquired increasing influence in international politics and religious violence and terrorism has attracted much scholarly attention But there is another parallel development which has gone largely unnoticed namely the increasing political impact of peaceful religious actors With several religious actors in one place and interacting under the same conditions the UN is as a multi religious society writ small The contributors to this book analyse the most influential religious actors at the UN including The Roman Catholic Church The Organisation of Islamic Countries the Russian Orthodox Church Mapping the peaceful political engagements of religious actors who they are and how they collaborate with each other whether on an ad hoc basis or by forming more permanent networks throwing light at the modus operandi of religious actors at the UN their strategies and motivations The chapters are closely interrelated through the shared focus on the UN and common theoretical perspectives and pursue two intertwined aspects of religious value politics namely the whys and hows of cross religious cooperation on the one hand and the interaction between religious actors and states on the other Drawing together a broad range of experts on religious actors this work will be of great interest to students and scholars of Religion and Politics International Relations and the UN Religious Fundamentalism in the Middle East Mansoor Moaddel,Stuart A. Karabenick,2013-07-04 In *Religious Fundamentalism in the Middle East* Moaddel and Karabenick analyze fundamentalist beliefs and attitudes across nations Egypt Iran Lebanon and Saudi Arabia faith Christianity and Islam and ethnicity Azari Turks Kurds and Persians among Iranians using comparative survey data For them fundamentalism is not just a set of religious beliefs It is rather a set of beliefs about and attitudes toward whatever religious beliefs one has In this analysis the authors show that fundamentalist beliefs and attitudes vary across national contexts and individual characteristics and predict people's orientation toward the same set of historical issues that were the concerns of fundamentalist intellectual leaders and activists The authors analysis reveals a cycle of spirituality that reinforces the critical importance of taking historical and cultural contexts into consideration to understand the role of religious fundamentalism in contemporary Middle Eastern societies *Religion and Politics in the Middle East* Robert D. Lee,2018-04-19 This innovative book analyses the relationship between religion and politics in the Middle East through a comparative study of five countries Egypt Israel Turkey Iran and Saudi Arabia Robert D Lee examines each country in terms of four domains in which state and religion necessarily interact national identity ideology institutions and political culture In each domain he considers contradictory hypotheses some of them asserting that religion is a positive force for political development and others identifying it as an obstacle Among the questions the book confronts Is secularization a necessary prerequisite for democratic development How is it and why is it that religion and politics are so deeply entangled in these five countries And why is it that all five countries differ so markedly in the way they identify

themselves and use religion for political purposes The book argues that the nature of religious organization and practice in the Middle East must be understood in the context of individual nation states The second edition is updated throughout and includes an entirely new chapter discussing the political and religious climate in Saudi Arabia Earlier introductory analysis has been condensed to make room for new material and chronologies at the end of each chapter have been added to help students understand the broader context The second edition of Religion and Politics in the Middle East is a robust addition to courses on the Middle East Middle Eastern Leaders and Islam Sonia Aljanak,2007 This book breaks down and elucidates the relationships between the several leaders of an increasingly religious Middle East Considering Islamic religious figures as well as the political leaders of Jordan Saudi Arabia Iraq Syria and Egypt it explains how in times of crisis these leaders counter the influences of moderate and extremist Islamists with Islam itself Each uses an interpretation of the religion to effect equilibrium amongst their people thus generating relative stability for their rule As a result many leaders have enjoyed remarkable longevity of power and some have managed to obtain legitimate political ends This book goes beyond state and society centered theories to focus on the dynamic interactions between the rulers and the ruled shedding new light on how international crises create domestic crises and suggesting new solutions to the Middle East s international problems

Making Constitutions in Deeply Divided Societies Hanna Lerner, 2011-05-12 How can societies still grappling over the common values and shared vision of their state draft a democratic constitution This is the central puzzle of *Making Constitutions in Deeply Divided Societies* While most theories discuss constitution making in the context of a moment of revolutionary change Hanna Lerner argues that an incrementalist approach to constitution making can enable societies riven by deep internal disagreements to either enact a written constitution or function with an unwritten one She illustrates the process of constitution writing in three deeply divided societies Israel India and Ireland and explores the various incrementalist strategies deployed by their drafters These include the avoidance of clear decisions the use of ambivalent legal language and the inclusion of contrasting provisions in the constitution Such techniques allow the deferral of controversial choices regarding the foundational aspects of the polity to future political institutions thus enabling the constitution to reflect a divided identity

International Law Ioana Cismas, 2014-07-17 This book assesses whether a new category of religious actors has been constructed within international law Religious actors through their interpretations of the religion s they are associated with uphold and promote or indeed may transform potentially oppressive structures or discriminatory patterns This study moves beyond the concern that religious texts and practices may be incompatible with international law to provide an innovative analysis of how religious actors themselves are accountable under international law for the interpretations they choose to put forward The book defines religious actors as comprising religious states international organizations and non state entities that assume the role of interpreting religion and so claim a special legitimacy anchored in tradition or charisma Cutting across the state non state divide this definition allows the full remit of religious bodies to be investigated It analyses the crucial question of whether religious actors do in fact operate under different international legal norms to non religious

states international organizations or companies To that end the Holy See Vatican the Organization of Islamic Cooperation and churches and religious organizations under the European Convention on Human Rights regime are examined in detail as case studies The study ultimately establishes that religious actors cannot be seen to form an autonomous legal category under international law they do not enjoy special or exclusive rights nor incur lesser obligations when compared to their respective non religious peers Going forward it concludes that a process of two sided legitimation may be at stake religious actors will need to provide evidence for the legality of their religious interpretations to strengthen their legitimacy and international law itself may benefit from religious actors fostering its legitimacy in different cultural contexts
