Religion And The Western Mind:

The Closing of the Western Mind Charles Freeman, 2007-12-18 A radical and powerful reappraisal of the impact of Constantine's adoption of Christianity on the later Roman world and on the subsequent development both of Christianity and of Western civilization When the Emperor Constantine converted to Christianity in 368 AD he changed the course of European history in ways that continue to have repercussions to the present day Adopting those aspects of the religion that suited his purposes he turned Rome on a course from the relatively open tolerant and pluralistic civilization of the Hellenistic world towards a culture that was based on the rule of fixed authority whether that of the Bible or the writings of Ptolemy in astronomy and of Galen and Hippocrates in medicine Only a thousand years later with the advent of the Renaissance and the emergence of modern science did Europe begin to free itself from the effects of Constantine's decision yet the effects of his establishment of Christianity as a state religion remain with us in many respects today Brilliantly wide ranging and ambitious this is a major work of history

Religion and the Western Mind Ninian Smart, 1987-03-15 Ninian Smart believes that the modern study of religion should occur in the context of a radical reappraisal of our educational system This is a worldview analysis of religion appropriate to today's global city It attacks narrowness whether found in Western philosophy or Christian theology and argues for a disestablishmentarian stance

Passion of the Western Mind Richard Tarnas, 2011-10-19 This magnificent critical survey with its inherent respect for both the West's mainstream high culture and the radically changing world of the 1990s offers a new breakthrough for lay and scholarly readers alike Allows readers to grasp the big picture of Western culture for the first time SAN FRANCISCO CHRONICLE Here are the great minds of Western civilization and their pivotal ideas from Plato to Hegel from Augustine to Nietzsche from Copernicus to Freud Richard Tarnas performs the near miracle of describing profound philosophical concepts simply but without simplifying them Ten years in the making and already hailed as a classic THE PASSION OF THE WESTERN MIND is truly a complete liberal education in a single volume

Islam for the Western Mind Richard Henry Drummond, 2005-08-17 Prophecy politics and the birth of a religion More than a billion people consider themselves Muslim It is the world's second largest religion Yet

Western portrayals of the Islamic mind are often flawed Islam for the Western Mind is an intensive look from a Christian perspective at what inspires and motivates Muslims namely Muhammad and the teaching of the Koran Dr Drummond an ordained Presbyterian minister and former professor presents a balanced look at the life and teaching of Islam s founding Prophet paying detailed attention to the religious and political community that existed during Muhammad s time as well as after his death Dr Drummond also looks at the larger cultural impact of Islam examining what he calls the lightning like spread of the new religion across much of the Middle East North Africa and parts of Europe and examines Muhammad s teaching about women pagans and Jesus the Messiah Son of Mary He gives detailed attention to the ethical teaching of the Koran All this is with primary emphasis upon God as Lord of the Worlds yet merciful and compassionate and upon prophecy as divine revelation Islam for the Western Mind is an essential text for anyone wanting an unbiased look at Muhammad the Koran and the religion they inspired

Dominion Tom Holland,2019-10-29 A marvelous Economist account of how the Christian Revolution forged the Western imagination Crucifixion the Romans believed was the worst fate imaginable a punishment reserved for slaves How astonishing it was then that people should have come to believe that one particular victim of crucifixion an obscure provincial by the name of Jesus was to be worshipped as a god Dominion explores the implications of this shocking conviction as they have reverberated throughout history Today the West remains utterly saturated by Christian assumptions As Tom Holland demonstrates our morals and ethics are not universal but are instead the fruits of a very distinctive civilization Concepts such as secularism liberalism science and homosexuality are deeply rooted in a Christian seedbed From Babylon to the Beatles Saint Michael to MeToo Dominion tells the story of how Christianity transformed the modern world

Lancaster **Religion, Materialism and Ecology** Sigurd Bergmann, Kate Rigby, Peter Manley Scott, 2023-05-31 This timely collection of essays by leading international scholars across religious studies and the environmental humanities advances a lively discussion on materialism in its many forms While there is little agreement on what materialism means it is evident that there is a resurgence in thinking about matter in more animated and active ways The volume explores how debates

concerning the new materialisms impinge on religious traditions and the extent to which religions with their material culture and beliefs in the Divine within the material can make a creative contribution to debates about ecological materialisms. Spanning a broad range of themes including politics architecture hermeneutics literature and religion the book brings together a series of discussions on materialism in the context of diverse methodologies and approaches. The volume investigates a range of issues including space and place hierarchy and relationality the relationship between nature and society human and other agencies and worldviews and cultural values. Religion and American Education Warren A. Nord, 2014-07-01 Warren Nord's thoughtful book tackles an issue of great importance in contemporary America the role of religion in our public schools and universities. According to Nord public opinion has been excessively polarized by those religious conservatives who would restore religious purposes and practices to public education and by those secular liberals for whom religion is irrelevant to everything in the curriculum. While he maintains that public schools and universities must not promote religion he also argues that there are powerful philosophical political moral and constitutional reasons for requiring students to study religion. Indeed only if religion is included in the curriculum will students receive a truly liberal education.

one that takes seriously a variety of ways of understanding the human experience Intended for a broad audience Nord's comprehensive study encompasses American history constitutional law educational theory and practice theology philosophy and ethics It also discusses a number of current controversial issues including multiculturalism moral education creationism academic freedom and the voucher and school choice movements Eastern Religion for Western Gnostics Michael Faust,2013-01-26 Is religion compatible with science The Tao of Physics by Fritjof Capra famously attempted to draw parallels between modern physics and Eastern mysticism What Capra conspicuously avoided was any comparison between the Abrahamic religions and physics These religions of faith have no scientific component The West has in the last few hundred years been the engine of scientific progress yet the dominant religions of the West are anti scientific This has led to a damaging dichotomy in the Western mind Doesn't the West have any enlightenment religions that might allow science and religion to find common ground This book compares and contrasts the Gnostic religion of Illumination the religion of the ancient secret society known as the Illuminati with the main Eastern religions of Hinduism Buddhism and Taoism and suggests that all four religions can be brought together under one banner Enlightenment that may stand in united opposition to Abrahamism knowledge against faith **Religion and Public Doctrine in Modern England: Volume 1** Maurice Cowling,2003-09-25 A further contribution to understanding the role played by Christianity in modern English thought
