Religion Science Society In Modern Wor:

Bulletin of the Atomic Scientists ,1946-08-01 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **Religions in the Modern World** Linda Woodhead,2002 This comprehensive guide offers an unrivalled introduction to recent work in the study of religion from the religious traditions of Asia and the West to new forms of religion and spirituality such as New Age With an historical introduction to each religion and detailed analysis of its place in the modern world Religions in the Modern World is ideal for newcomers to the study of religion It incorporates case studies and anecdotes text extracts chapter menus and end of chapter summaries glossaries and annotated further reading sections Topics covered include religion colonialism and postcolonialism religious nationalism women and religion religion and globalization religion and authority the rise of new spiritualities *Science, Society, and the Search for Life in the Universe* Bruce M. Jakosky,2022-10-18 Are we alone in the universe As humans are we unique or are we part of a greater cosmic existence What is life s future on Earth and beyond How does life begin and develop These are age old questions that have inspired wonder and controversy ever since the first people looked up into the sky With today s technology however we are closer than ever to finding the answers Astrobiology is the relatively new but fast growing scientific discipline that involves trying to understand the origin evolution and distribution of life within the universe It is also one of the few scientific disciplines that attracts the public s intense curiosity and attention This interest stems largely from the deep personal meaning that the possible existence of extraterrestrial life has for so many Whether this meaning relates to addressing the Big Questions of our existence the possibility of encountering life on other planets or the potential impact on our understanding of religion there is no doubt that the public is firmly vested in finding answers In this broadly accessible introduction to the field Bruce Jakosky looks at the search for life in the universe not only from a scientific perspective but also from a distinctly social one In lucid and engaging prose he addresses topics including the contradiction between the public s fascination and the meager dialogue that exists between those within the scientific community and those outside of it and what has become some of the most impassioned political wrangling ever seen in government science funding

Religion in Today's World Melissa M. Wilcox,2013-12-19 Religion is a major force in contemporary society It is also one of the least understood social and political influences on individuals and communities In this innovative collection of original essays and classic readings experts explore the significance of contemporary religiosity as a source of meaning and motivation how it unites and divides us and how it is used politically and culturally Readers will be introduced to the broad debates in ways that will equip them to analyze discuss and make their own judgments about religion and society This book should be read by anyone interested in understanding religion as a central source of meaning and politics and is ideally suited for undergraduate teaching on religion and social issues and from a global perspective **The Comprehensive**

Philosophy: The Lvov-Warsaw School Francesco Coniglione, Roberto Poli, Jan Woleński, 2023-03-13 One can often encounter an opinion that Polish scientific or analytic philosophy or the Lvov Warsaw School deserves to be much better known than actually is This book is thought as a response to such a claim The papers collected in this volume are divided into two parts Background and Influence and History and Systematics However there is no sharp borderline between themes which are touched in both parts Generally speaking all papers of the first part relate the Lvov Warsaw School to some philosophical movements Brentanism phenomenology and Marxism external to it whereas the papers collected in the second one focus on internal issues connected with the school only Roberto Poli takes into account Brentano's views in his discussion of reism Since the Polish school of mathematical logic is much better known than the Polish analytic philosophy we decided to omit here any treatment of the former Thus this collection centers on purely philosophical matters We projected this volume not as an exhaustive panorama of Polish analytic philosophy but rather as a series of essays on particular persons or topic As a result one can find here papers on Twardowski Ajdukiewicz Kotarbinski Tarski and Lukasiewicz as well as on ethics on science nominalism and the methodology of psychology We hope that this book will contribute to a better knowledge and evaluation of Polish achievements in analytic philosophy We would like to express our gratitude to Professor Leszek Nowak the editor in chief of Poznan Studies in the Philosophy of the Sciences and the Humanities who initiated the idea of the collection and helped in its preparation **Handbook of New Age** James Lewis, Daren Kemp, 2007-05-30 The
