Remaking The Chinese State Strategies Society And Security:

Remaking the Chinese State Jianmin Zhao, Bruce J. Dickson, 2001 After more than twenty years of economic and political reform China is a vastly different country to that left by Mao Almost all the characteristic policies and practices of the Maoist era have been abandoned with the goals of revolution in foreign and domestic policy being replaced by an emphasis on economic modernization accompanied by radical social transformation and an increasingly significant international role Yet despite these dramatic changes other fundamental features of China's policy remain unchanged This book explores the strategies of reform in China and their implications for its domestic and foreign policies It challenges the misconceptions that no political reforms are taking place and that China is eagerly embracing capitalism It also challenges the view that China does not abide by international norms and practices on military and security matters Its contributors all highly respected scholars avoid simple generalisations about the nature of China's politics or future path instead offering comparisons and contrasts between policy areas and regions to create a more complete picture of this complex country

Training the Party Charlotte P. Lee, 2015-07-02 Charlotte P Lee considers organizational changes taking place within the contemporary Chinese Communist Party CCP examining the party's renewed emphasis on an understudied but core set of organizations party managed training academies or party schools This national network of organizations enables party authorities to exert political control over the knowledge skills and careers of officials Drawing on in depth field research and novel datasets Lee finds that the party school system has not been immune to broader market based reforms but instead has incorporated many of the same strategies as actors in China's hybrid state led private sector In the search for revenue and status schools have updated training content and become more entrepreneurial as they compete and collaborate with domestic and international actors This book draws attention to surprising dynamism located within the party in political organizations thought immune to change and the transformative effect of the market on China's political system

The Chinese Communist Party and China's Capitalist Revolution Lance Gore, 2010-11-08 The Chinese Communist Party and China's Capitalist Revolution examines issues of political change and development in China In the last 30 years China has experienced a profound political transformation and a degree of political progress but these are largely mired in the assumption that the free market is inherently incompatible with communism and the perceived lack of political reforms in China Indeed there has not been much in the sense of democratization multi party competition freedom of speech and association but as this book demonstrates political development is not limited to these factors Based on extensive empirical investigations of the impact of the market on the communist party with a particular focus on its grassroots organisations this book finds that the Chinese communist party is undergoing profound changes in a host of important areas By analyzing the

impact of China's socioeconomic transformation on the CCP and the adaptations of the Party to the new environment the book takes stock of the nature and dynamics of political change underway in China The author concludes that the Chinese communist party we knew no longer exists it is evolving into something quite different which must have political implications for both China and the rest of the world Professor Lance L P Gore is a political scientist specializing in contemporary Chinese politics at The East Asian Institute National University of Singapore Korean Society Charles K. Popular Protest in China Teresa Wright, 2018-07-26 Popular protest in China has been widespread and prevalent Why do people protest and how are such demonstrations handled by the authorities Could they ultimately imperil China's political

system In this book Teresa Wright analyzes the array of protests that have swept China in the post Mao period Exploring popular contention through a range of different groups from farmers to factory workers urban homeowners to environmentalists nationalists to dissidents ethnic minorities to Hong Kong residents Wright shows that with the exception of the latter popular protest has achieved adequate government responses to the public s most serious grievances Yet Wright cautions that this may not last forever For Chinese citizens that engage in protest often suffer serious emotional and physical costs As a result they have developed an unhealthy relationship with the regime In this context Xi Jinping s recent efforts to restrict public expression may backfire leading to an explosive dynamic that may threaten the political stability that China s ruling elites so desire

China and International Institutions Marc Lanteigne, 2005-11-14 China has shifted its foreign policy from one that avoided engagement in international organizations to one that is now embracing them These moves present a new challenge to international relations theory How will the global community be affected by the engagement of this massive global power with international institutions This new study explores why China has chosen to abandon its previous doctrine of institutional isolation and details how it is currently unable to balance American power unilaterally and details an indirect path to greater power In addition it includes the first major analysis of the Shanghai Cooperation Organization comprising China Russia and most of Central Asia In contrast to many works on the rise of China which place an emphasis on her material goods and powers this book delivers a new approach It shows how the unique barriers Beijing is facing are preventing the country from taking the traditional paths of territorial expansion and political economic domination in order to develop as a great power One of these barriers is the United States and its inherent military and economic strength The other is the existence of nuclear weapons which makes direct great power conflict unacceptably costly China has therefore opted for a new path using institutions as stepping stones to great power status This book will be of great interest to students and scholars of international relations world politics world history and Asia
