Remembrance Of Things Past 7vol:

Men and Mothers Hendrika C. Freud, 2018-03-08 Not all men vie with their fathers for the love of their mothers In some families the mother becomes the central figure for her son the father is excluded or excludes himself and does not come between mother and son The main thesis of this book using clinical vignettes and quotes from the work of Marcel Proust to illustrate the author's points is that in these cases fantasies of matricide replace patricide Men develop their male gender identity by being permitted to separate from their mother early on but when a man does not resolve his infantile tie to his mother he risks remaining in a passive and or dependent position towards her Over identification with the mother might ensue hampering masculine development Mothers who seek emotional support by binding their sons too closely can become seductive towards them The child is inclined to try to satisfy the emotional needs of his mother and he fears rejection if he asserts his independence instead of complying *Edwin Dickinson* John Lawrence Ward, Edwin Walter Dickinson, 2003 Featuring 19 color plates and 65 b/w illustrations this text critically examines the imagery process and pictorial structure of works by American painter Edwin Dickinson 1891-1978 Drawing upon 56 years of the artist's journals and several thousand pages of his letters Ward makes connections b The Ideal Reader Jacques Riviere, 2017-07-05 Jacques Riviere knew how to accept art emotionally No French critic was ever less a traditional pedagogue Riviere was an intelligent French writer who knew that the summit of the intellect is to admit effective knowledge instinct and intuition The heart or taste is always superior to raw intelligence Riviere's supple metaphors are not easily rendered into English The density of his thought the complexity of his views the moral and spiritual fervor that vibrates in these pages further enhances the difficulties the skilled translator must overcome Literary criticism is often ephemeral it has served its purpose if it stimulates discussion about the work of art under scrutiny Not so with essays like these They demand an active reading as do the original works themselves They do not easily yield their significance Among the critics who came into the French literary scene in the years immediately preceding and following the First World War Jacques Riviere has been least affected by the attrition of time His studies of Proust and Rimbaud still rank among the two or three essential works to be read on these authors Few other critics have gone further in a sensuous perception of these authors work and the intellectual lucidity in analyzing it Riviere had few pretensions to profundity and a great purity of style In an age of slogans and judgments this volume reminds the reader of the extraordinary role of European critical thought in the twentieth century **Dysfluencies** Chris Eagle, 2013-11-07 Dysfluencies is the first comprehensive study of how speech disorders are portrayed in modern literature Tracing the roots of this interaction between literary practice and speech pathology back to the rise of aphasiology in the 1860s Dysfluencies examines portrayals of disordered speech by writers like Zola Proust Joyce Melville and Mishima as well as contemporary writers like Philip Roth Gail Jones and Jonathan Lethem Dysfluencies thus speaks directly to the growing interest at present both in popular culture and the Humanities regarding the status of the Self in relation to speech pathology

The need for this type of study is clear considering the number of prominent writers whose works foreground disorders of speech Melville Zola Kesey Mishima Roth et al Moreover thinkers like Freud Bergson and Jakobson were similarly concerned with the implications of language breakdown This volume shows this concern began with the rise of neurology and aphasiology which challenged spiritual conceptions of language and replaced them with a view of language as a material process rooted in the brain Dysfluencies traces the history of this interaction between literary practice and speech pathology arguing that works of literature have responded differently to the issue of language breakdown as the dominant views on the issue have shifted from neurological circa 1860s to 1920s to psychological circa 1920s to 1980s and back to neurological during the so called decade of the Brain the 1990s

Beautiful Shadow Andrew Wilson, 2008-12-07 The life of Patricia Highsmith was as secretive and unusual as that of many of the best known characters who people her peerlessly disturbing thrillers and short stories Yet even as her work has found new popularity in the last few years the life of this famously elusive writer has remained a mystery For Beautiful Shadow the first biography of Highsmith British journalist Andrew Wilson mined the vast archive of diaries notebooks and letters she left behind astonishing in their candor and detail He interviewed her closest friends and colleagues as well as some of her many lovers But Wilson also traces Highsmith's literary roots in the work of Poe noir and existentialism locating the influences that helped distinguish Highsmith's writing so startlingly from more ordinary thrillers The result is both a serious critical biography and one that reveals much about a brilliant and contradictory woman one who despite her acclaim and affairs always maintained her solitude

Losing Site Dr Shelley Hornstein, 2013-06-28 As Ruskin suggests in his *Seven Lamps of Architecture* We may live without architecture and worship without her but we cannot remember without her We remember best when we experience an event in a place But what happens when we leave that place or that place no longer exists This book addresses the relationship between memory and place and asks how architecture captures and triggers memory It explores how architecture exists as a material object and how it registers as a place that we come to remember beyond the physical site itself It questions what architecture is in the broadest sense assuming that it is not simply buildings Rather architecture is considered to be the mapping of physical mental or emotional space The idea that we are all architects in some measure as we actively organize and select pathways and markers within space is central to this book's premise Each chapter provides a different example of the manifold ways in which the physical place of architecture is curated by the architecture in our mental space our imaginary toolbox when we think of a place and look at a photograph or visit a site and describe it later or send a postcard By connecting architecture with other disciplines such as geography visual culture sociology and urban studies as well as the fine and performing arts this book puts forward the idea that a conversation about architecture is not exclusively about formal isolated buildings but instead must be deepened and broadened as spatialized visualizations and experiences of place

Psychoanalysis After Freud Judy Gammelgaard, 2021-07-29 This book draws on a number of Freud's lesser known works to explore psychoanalytic perspectives on memory mourning and repetition It is remarkable that Freud in his speculations on the human psyche often took his point of departure in an insignificant detail It might be a lapse of memory or a detail in a piece of art From here he uncovered the many layers of the psyche its complex structure and the processing of meaning right to the limit of understanding At this point Freud's exploration encountered the unknown an internal outland as difficult to acknowledge as the external reality Freud did not invent the unconscious but he demonstrated how it works The unconscious according to Freud does not exist but insists on making itself visible The eleven essays in this book draw a picture of the critical humanistic thinking so characteristic of Freud His concepts and suppositions were the result of many years speculations based on observation experience and ideas and although they are marked by the time and culture from which they emerged they demonstrate a revolutionary knowledge of the psyche transcending the knowledge of his time In her reading of the chosen texts the author has chosen the position of a contemporary interpretation Examining how psychoanalytic work on the topics of memory mourning and repetition has changed since Freud and how these themes remain of crucial importance in contemporary psychoanalytic theory this book intersperses theory with clinical practice It will be of great interest to training

and practicing psychoanalysts as well as scholars of art literature and sociology
