Specialty Construction Techniques for Dam and Levee Remediation Donald Bruce, 2012-09-26 Dam and levee remediation has become more prevalent since the start of the twenty first century Given the vastness and complexity of the infrastructures involved keeping up with maintenance needs is very difficult Major surges in repair are usually triggered by nature s wake up calls such as hurricanes floods and earthquakes The challenge has been to develop methods that ensure safe effective reliable and robust solutions for current and future remediation issues Specialty Construction Techniques for Dam and Levee Remediation presents the state of practice in North American dam and levee remediation as it relates to the use of specialty geotechnical construction techniques such as anchors grouting cutoff diaphragm walls and deep mixing The book focuses on the actual construction processes describing design and performance aspects of remediation where appropriate Chapters deal with the application of drilling and grouting methods methods to install mix in place category 2 cutoff structures excavated and backfilled trenches category 1 composite cutoff walls and stabilization using prestressed rock anchors The book also provides a comprehensive guide to dam and levee instrumentation covering planning operating principles data management staffing and automation As an educational and salutary example of

ineffective efforts the final chapter presents a case history of a series of remediations performed on a single project which ultimately proved unsuccessful A wide range of methods has been developed in response to the challenges that arise in the dam and levee remediation arena and the need for a competitive edge These new methods are designed and monitored using state of the art techniques giving rise to the emergence of new intensity and initiative in this field This book captures this transformation by examining the theory and practice of contemporary remedial techniques using recent U S case histories to provide knowledge and inspiration to readers both in North America and around the world Surfactants and Cosolvents for NAPL Remediation A Technology Practices Manual Donald F. Lowe, Carroll L. Oubre, C. H. Ward, 1999-03-26 A 19 3 million Department of Defense grant to Rice University funds the Advanced Applied Technology Demonstration Facility AATDF One of the project goals is the development of reduction strategies for nonaqueous phase liquids NAPLs in the subsurface Surfactants and Cosolvents for NAPL Remediation records the results of AATDF research The manual is a guide to the practical application of surfactants cosolvent for in situ remediation It is targeted to decision makers and anyone concerned with the design or implementation of these technologies The book discusses the situational viability of surfactants cosolvents the possible results design and operation It includes case studies step by step guidance and project cost work sheets The successful results of the AATDF research as documented Surfactants and Cosolvents for NAPL Remediation are an invaluable contribution to the future of subsurface remediation Without source NAPL reduction the alternative is decades of plume management through pump and treat **Geomechanical Aspects of Abandoned Room and Pillar Mines and Remediation Measures** Ömer Aydan, 2025-06-13 Geomechanical Aspects of Abandoned Room and Pillar Mines and Remediation Measures addresses the occurrence prediction and control of subsidence issues encountered in room and pillar mining including creep degradation and seismic aspects The book distinguishes itself by Presenting a unified treatise on room and pillar mines Using clear definitions and explanations of fundamental concepts Considering long term aspects creep and degradation seismic effects remedial measures contact types and remote sensing monitoring techniques Including physical and numerical modeling Demonstrating an in depth view of procedures and solution techniques This book provides a clear understanding of active and or abandoned room and pillar mines It is aimed at academics and engineers with a mining and or civil engineering background but it also serves as a reference for undergraduate and graduate students *Survey of the emergence and use of naturally occurring materials* Oberender, Anke, Juel Lyng, Rikke, Lyngfelt Molander, Lise, Jensen, Carl, Schouenborg, Björn, Theorin, Mikael, Wærner, Eirik Rudi, Røgeberg, Marthe, Punkkinen, Henna, Wahlström, Margareta, 2021-09-10 Available online <https://pub.norden.org/temanord2021/535> Naturally occurring materials such as soil mineral masses and rock masses from construction projects and infrastructure projects represent a high resource potential and potential for CO2 savings if used more efficiently Large amounts of these materials are managed on an annual basis in the Nordic countries but to enable a more resource efficient management of naturally occurring materials several regulatory

as well as practical challenges must be solved Existing legislation in the Nordic countries is not a direct barrier that prevents optimal utilization of resources but there are several untapped opportunities in regulation as well as problem areas that appear as barriers in practice Efficient utilization of naturally occurring materials in the Nordic countries faces also a wide range of challenges in practice and from different angles

Science and Technology for Environmental Cleanup at Hanford National Research Council, Division on Earth and Life Studies, Board on Radioactive Waste Management, Committee on the Review of the Hanford Site's Environmental Remediation Science and Technology Plan, 2001-11-23 The Hanford Site was established by the federal government in 1943 as part of the secret wartime effort to produce plutonium for nuclear weapons The site operated for about four decades and produced roughly two thirds of the 100 metric tons of plutonium in the U S inventory Millions of cubic meters of radioactive and chemically hazardous wastes the by product of plutonium production were stored in tanks and ancillary facilities at the site or disposed or discharged to the subsurface the atmosphere or the Columbia River In the late 1980s the primary mission of the Hanford Site changed from plutonium production to environmental restoration The federal government through the U S Department of Energy DOE began to invest human and financial resources to stabilize and where possible remediate the legacy of environmental contamination created by the defense mission During the past few years this financial investment has exceeded 1 billion annually DOE which is responsible for cleanup of the entire weapons complex estimates that the cleanup program at Hanford will last until at least 2046 and will cost U S taxpayers on the order of 85 billion Science and Technology for Environmental Cleanup at Hanford provides background information on the Hanford Site and its Integration Project discusses the System Assessment Capability an Integration Project developed risk assessment tool to estimate quantitative effects of contaminant releases and reviews the

Hardisty,Ece Ozdemiroglu,2004-12-20 Economic literature is often too theoretical for engineers and policymakers to put into practical use while scientific literature on the remediation of contaminated aquifers rarely considers costs and benefits Written by a hydrogeologist and an economist The Economics of Groundwater Remediation and Protection integrates economics and cost benefit analysis tools with optimal protection and remediation strategies for groundwater resources The book provides a thorough introduction of the concepts of groundwater flow and contaminant transport and the basics of economic decision making techniques It illustrates the types of risks and impacts caused by groundwater contamination and the economic benefits of its remediation The volume reviews a wide range of issues such as cost implementation and expectations of success for the latest remediation trends and techniques The book shows how economic analysis can be used to determine how much we should pay for groundwater clean up and when spending too much or too little actually makes us all worse off The authors step by step methodology for decision making focuses on determining optimal remedial objectives from containment to extensive cleanup and the selection of least cost alternatives They use examples from their personal experience to illustrate the methodologies in action and put the issues into perspective Combining the theoretical and

practical aspects of science policy and economics this book places the importance of groundwater remediation in the context of environmental economics protection and preservation The Economics of Groundwater Remediation and Protection is also an excellent introduction to innovative solutions for funding remediation projects education and incentive programs such as mitigation banking land pollution credit schemes and conservation credit alternatives Geotechnical and Geophysical Site Characterization 4 Roberto Quental Coutinho,Paul W.
