Integrated Architecture Liangyong Wu, 2013-12-01 Integrated Architecture is both a historical and contemporary work The book was first published in 1989 by Wu Liangyong one of contemporary China s most influential architects and theoreticians with the title A General Theory on Architecture His eminence is also recognised by the international architectural community above all the group of architectural and urban planning theoreticians battling for a more decisive reform to the concepts methodologies and practices presiding over the construction and requalification of the contemporary metropolis First met professor Wu Liangyong in 2005 at the Faculty of Architecture at the Tsinghua University of Beijing his Faculty Wu Liangyong founded the school in 1949 at the age of 24 together with Liang Sicheng the father of modern Chinese architectural studies From this moment more than sixty seven years ago professor Liangyong has remained a central figure in Beijing s academic community He remains a constant source of inspiration not only national to education reforms and above all theoretical methodological and operative research into architecture the city and the territory He is a rare figure present throughout a lengthy historical period witness the world over to tumultuous upheavals in society and its cities A period whose most dramatic and exalting manifestations were perhaps to be found in China a period of war of hope of revolutions of great leaps forward of presumptions horrors errors new leaps forward and incomprehensible economic growth of irreversible social and cultural metamorphoses and what interests us most as architects of staggering urban growth and territorial transformations The intellect of this minute and genteel figure held fast against the storms of history The observation of events and the humanist and scientific principles of his personal culture continuously nourished an increasingly more effective reflection on the meaning of architecture in today s world He also clearly saw its inextricable ties to the substance of the city and the impossibility to substitute the figure of the architect

scientist humanist and artist A few years after our meeting having absorbed direct lessons from Wu's work as an architect and theoretician I proposed an Italian translation of an anthology of his writings The material was to be drawn from his many books and essays on architecture and the city published continuously over the course of his incomparable career Professor Wu Liangyong responded with a challenge in lieu of this anthology of texts he proposed a full translation in Italian and English of a book published twenty years ago 1989's *A General Theory on Architecture* Given the pace of cultural debate it would not have been out of place to imagine a book firmly sedimented in history I understood instead that it was a milestone in the expression of Wu Liangyong's ideas a benchmark that in all likelihood served as the starting point for his later theories even the most recent Published in other fundamental essays they range across the vast field of human settlements touching on all components of the man-made environment Lucio Valerio Barbera

Social and Cultural Dynamics Pitirim

Sorokin, 2017-09-29 This classic work is a revised and abridged version in a single volume of the work which more than any other catapulted Pitirim Sorokin into being one of the most famed figures of twentieth-century sociology Its original publication occurred before World War II This revised version written some twenty years later reflects a postwar environment Earlier than most Sorokin took the consequences of the breakdown of colonialism into account in discussing the renaissance of the great cultures of African and Asian civilization Other than perhaps F S C Northrop no individual better incorporated the new role of the Indian Chinese Japanese and Arabic peoples in this postwar world Sorokin came to view social and cultural dynamics in terms of three major processes a major shift of mankind's creative center from Europe to the Pacific a progressive disintegration of the sensate culture and finally the first blush of the emergence and growth of a new idealistic sociocultural order This volume is perhaps most famous for revealing Sorokin's remarkable efforts to understand the relationship of war and peace to the process of social and political change Contrary to received wisdom he shows that the magnitude and depth of war grows in periods of social cultural and territorial expansion by the nation In short war is just as often a function of development as it is of social decay This long unavailable volume remains one of the major touchstones by which we can judge efforts to create an international social science There are few areas of social or cultural life that are not covered from painting art and music to the ethos of universalism and particularism These are terms which Sorokin introduced into the literature long before the rise of functional doctrines For all those interested in cultural and historical processes this volume provides the essence of Sorokin's remarkably prescient effort to achieve sociological transcendence by taking

Hendrik Petrus Berlage Hendrik Petrus

Berlage, 1996-01-01 Hendrik Petrus Berlage the Dutch architect and architectural philosopher created a series of buildings and a body of writings from 1886 to 1909 that were among the first efforts to probe the problems and possibilities of modernism Although his Amsterdam Stock Exchange with its rational mastery of materials and space has long been celebrated for its seminal influence on the architecture of the 20th century Berlage's writings are highlighted here Bringing

together Berlage's most important texts among them *Thoughts on Style in Architecture* *Architecture's Place in Modern Aesthetics* and *Art and Society* this volume presents a chapter in the history of European modernism In his introduction Iain Boyd Whyte demonstrates that the substantial contribution of Berlage's designs to modern architecture cannot be fully appreciated without an understanding of the aesthetic principles first laid out in his writings **Littell's Living Age**
Eliakim Littell, Robert S. Littell, 1884
