Kristeller,1961 **The Intellectual Life of Western Europe in the Middle Ages** Dales,2022-04-19 This work presents a connected account of western European thought from the Patristic age to the mid fourteenth century Dales aims to keep his reader close to the sense of the texts which he translates frequently at some length or summarizes in his exposition He attempts to include important matters which are generally omitted in broad treatments the chapter on the tenth century is the longest in the book but the author s choice of topics is fully justified by his special intimacy with what he elects to discuss particularly the hexameral tradition ancient and medieval the scientific tradition twelfth century treatises on nature and cosmology discussions of the eternity of the world and the thought of Robert Grosseteste This adds a personal and distinctive character to the work Dales stresses throughout the diversity and vigor of medieval thought qualities which he illustrates widely from Latin and vernacular poetry and literature of various kinds as well as from philosophical and theological texts
