state was ideologically obsessed with eradicating religion. Faced with persecution, torture and the creation of antireligious organizations such as the League of the Godless, Orthodox clergy and laity organized themselves against the Bolsheviks. They revived factional politics even using the village soviets, the intended cornerstone of Soviet power in the countryside, to defend their religious interests. When they achieved some degree of success in their resistance, the Bolsheviks were forced to respond and adapt their strategies. A conclusion that scholars have not put forward previously. Based on extensive research in archives and published sources, Young's book will force historians of Soviet Russia to confront religious issues as central to rural politics. Her work also draws upon cultural anthropology and theories of peasant politics, making it of great interest to any scholars studying the processes of secularization and desecralization in other cultures.

**Peasants And Power** Joan Sokolovsky, 2019-05-28 Focusing on events in Hungary and Poland from 1948 to 1962, Dr Sokolovsky shows why collectivization can best be understood as an element in state building for the new regimes of Eastern Europe. For these countries, policy options were constrained by dependence upon the Soviet Union and the economic demands of a newly industrializing society.

**Econom** Nomads and Soviet Rule Alun Thomas, 2018-06-14 The nomads of Central Asia were already well accustomed to life under the power of a distant capital when the Bolsheviks fomented revolution on the streets of Petrograd. Yet after the fall of the Tsar, the nature, ambition and potency of that power would change dramatically, ultimately resulting in the near eradication of Central Asian nomadism. Based on extensive primary source work in Almaty, Bishkek and Moscow, Nomads and Soviet Rule charts the development of this volatile and brutal relationship and challenges the often repeated view that events followed a linear path of gradually escalating violence. Rather than the sedentarisation campaign being an inevitability born of deep-rooted Marxist hatred of the nomadic lifestyle, Thomas demonstrates the Soviet state's treatment of nomads to be far more complex and pragmatic. He shows how Soviet policy was informed by both an anti-colonial spirit and an imperialist impulse by nationalism as well as communism, and above all by a lethal self-confidence in the Communist Party's ability to transform the lives of nomads and harness the agricultural potential of their landscape. This is the first book to look closely at the period between the revolution and the collectivisation drive and offers fresh insight into a little-known aspect of early Soviet history. In doing so, the book offers a path to refining conceptions of the broader history and dynamics of the Soviet project in this key period.

**Reforming Justice in Russia, 1864-1994: Power, Culture and the Limits of Legal Order** Peter H. Solomon, 2017-07-05 Measuring Russian legal reform in relation to the rule of law ideal, this study also examines the legal institutions, culture and reform goals that have actually prevailed in Russia. Judgements about future prospects are measured, adding new dimensions to our understanding of the Soviet legacy.

**Blood and Soil** Ben Kiernan, 2007-01-01 Kiernan examines outbreaks of mass violence from the classical era to the present, focusing on worldwide colonial exterminations and 20th century case studies including the Armenian genocide, the Nazi Holocaust, Stalin's mass murders and the Cambodian and Rwandan genocides.

Iconography of Power Victoria E. Bonnell, 1998-02-05 Masters

at visual propaganda the Bolsheviks produced thousands of vivid and compelling posters after they seized power in October 1917. Intended for a semi-literate population that was accustomed to the rich visual legacy of the Russian autocracy and the Orthodox Church, political posters came to occupy a central place in the regime's effort to imprint itself on the hearts and minds of the people and to remold them into the new Soviet woman and man. In this first sociological study of Soviet political posters, Victoria Bonnell analyzes the shifts that took place in the images, messages, styles, and functions of political art from 1917 to 1953. Everyone who lived in Russia after the October revolution had some familiarity with stock images of the male worker, the great communist leaders, the collective farm woman, the capitalist, and others. These were the new icons, standardized images that depicted Bolshevik heroes and their adversaries in accordance with a fixed pattern. Like other invented traditions of the modern age, iconographic images in propaganda art were relentlessly repeated, bringing together Bolshevik ideology and traditional mythologies of pre-Revolutionary Russia. Symbols and emblems featured in Soviet posters of the Civil War and the 1920s gave visual meaning to the Bolshevik worldview dominated by the concept of class. Beginning in the 1930s, visual propaganda became more prescriptive, providing models for the appearance, demeanor, and conduct of the new social types, both positive and negative. Political art also conveyed important messages about the sacred center of the regime, which evolved during the 1930s from the celebration of the heroic proletariat to the deification of Stalin. Treating propaganda images as part of a particular visual language, Bonnell shows how people read them, relying on their habits of seeing and interpreting folk, religious, commercial, and political art both before and after 1917, as well as the fine art traditions of Russia and the West. Drawing on monumental sculpture and holiday displays as well as posters, the study traces the way Soviet propaganda art shaped the mentality of the Russian people; the legacy is present even today and was itself shaped by popular attitudes and assumptions. *Iconography of Power* includes posters dating from the final decades of the old regime to the death of Stalin, located by the author in Russian, American, and English libraries and archives. One hundred exceptionally striking posters are reproduced in the book; many of them never before published. Bonnell places these posters in a historical context and provides a provocative account of the evolution of the visual discourse on power in Soviet Russia. **Works in**

**Progress** Jenny Leigh Smith, 2014-10-28. This book is the first to investigate the gap between the plans and the reality of the Soviet Union's mid-twentieth-century project to industrialize and modernize its agricultural system. Historians agree that the project failed badly: agriculture was inefficient, unpredictable, and environmentally devastating for the entire Soviet period. Yet assigning the blame exclusively to Soviet planners would be off the mark. The real story is much more complicated and interesting. Jenny Leigh Smith reveals in this deeply researched book. Using case studies from five Soviet regions, she acknowledges hubris and shortsightedness where it occurred but also gives fair consideration to the difficulties encountered and the successes, however modest, that were achieved.
