City of Walls Teresa P. R. Caldeira, 2000 This is an extraordinary treatment of a difficult problem Much more than a conventional comparative study City of Walls is a genuinely transcultural transnational work the first of its kind that I have read George E Marcus author of *Ethnography Through Thick Thin* Caldeira s work is wonderfully ambitious theoretically bold ethnographically rich historically specific Anyone who cares about the condition and future of cities of democracy of human rights should read this book Thomas Bender Director of the Project on Cities and Urban Knowledges City of Walls is a brilliant analysis of the dynamics of urban fear The sophistication of Caldeira s arguments should stimulate new discussion of cities and urban life Its significance goes far beyond the borders of Brazil Margaret Crawford Professor of Urban Planning and Design Theory Graduate School of Design Harvard University Caldeira s insight illuminates the geography of the city as well as the boundaries or the lack of boundaries of violence Paul Chevigny author of *Edge of the Knife Police Violence in the Americas* An extraordinary account of violence in the city Caldeira brings to this task a rare depth of knowledge and understanding Saskia Sassen author of *Globalization and Its Discontents* An outstanding contribution to understanding authoritarian continuity under political reform Caldeira has written a brilliant and bleak analysis on the many challenges and obstacles which government and civil society face in new democracies Paulo Sérgio Pinheiro Director of the Center for the Study of Violence University of S o Paulo and Member of the United Nations Sub Commission for the Promotion and Protection of Human Rights

Twenty-First Century Eduardo Cesar Leão Marques,2016-05-20 This book analyzes in detail the main social economic and special transformation of the city of S o Paulo In the last 30 years S o Paulo has become a more heterogeneous and less unequal city Contrary to some expectations the recent economic transformations did not produce social polarization and the localized processes of spaces production and the plural is increasingly important are more and more key to define their respective growth patterns social conditions forms of housing production service availability and urban precariousness In other dimensions however inequalities remain present and strong and certain disadvantaged areas have changed little and are still marked by strong social inequalities The metropolis remains heavily segregated in terms of race and class in a clear hierarchical structure The book shows that it is necessary to escape from dual and polarity interpretations This did not lead to the complete disappearance of a crudely radial and concentric structure not only due to geographic path dependence but superposes other elements over it leading to more complexes and continuous patterns A general summary of these elements could perhaps be stated as pointing to greater social spatial heterogeneity accompanied by smaller but reconfigured inequalities *An Economic and Demographic History of São Paulo, 1850-1950* Francisco Vidal Luna,Herbert S.

Klein,2018-06-12 S o Paulo by far the most populated state in Brazil has an economy to rival that of Colombia or Venezuela Its capital city is the fourth largest metropolitan area in the world How did S o Paulo once a frontier province of little importance become one of the most vital agricultural and industrial regions of the world This volume explores the transformation of S o Paulo through an economic lens Francisco Vidal Luna and Herbert S Klein provide a synthetic overview of the growth of S o Paulo from 1850 to 1950 analyzing statistical data on demographics agriculture finance trade and infrastructure Quantitative analysis of primary sources including almanacs censuses newspapers state and ministerial level government documents and annual government reports offers granular insight into state building federalism the coffee economy early industrialization urbanization and demographic shifts Luna and Klein compare S o Paulo s transformation to

other regions from the same period making this an essential reference for understanding the impact of early periods of economic growth

The São Paulo Law School and the Anti-Vargas Resistance (1938-1945) John W. F. Dulles, 2014-07-03

The São Paulo Law School the oldest institution of higher learning in Brazil has long been the chief training center for that country's leadership For the members of the school's secret Burschenschaft society the training consisted principally in leading demonstrations for liberal causes such as the abolition of slavery and the overthrow of the monarchy During the Old Republic 1889-1930 the Brazilian presidency and other high posts in Rio de Janeiro were usually occupied by alumni of the powerful society while its members in São Paulo continued to agitate for political reform But in the 1920s when they formed the Nationalist League and the Democratic Party schisms resulted Thus the Burschenschaft was weakened before the long rule of Brazil by Getúlio Vargas starting in 1930 brought an end to the society's influence The role of the school in these and other historical events is carefully reviewed by Dulles before he turns to the school's well known resistance to the dictatorship of Vargas That resistance the most persistent confronting the dictator appeared to be unified especially when it provoked the police into shooting the students But as Dulles discovered when interviewing participants and consulting documents and scrapbooks of the early 1940s the movement was characterized by heated internal strife In the end however the idealism and courage of the participants and the ultimate effectiveness of the movement contributed mightily to the fall of Vargas This book is another in Dulles's series of narrative histories in which he gives flesh and blood to the names and breathes life into the events of twentieth century Brazilian politics

This report presents an in depth study of the innovation ecosystem of São Paulo Brazil We use georeferenced patent scientific publication and economic data to characterize one of the few global innovation hotspots in Latin America and the southern hemisphere It attempts to understand what makes São Paulo different from the rest of Brazil and the Latin American region by mapping what its main potentialities and drawbacks are The report finds that São Paulo is rich in scientific activity but lags behind with respect to patent production At the same time it is a patent leader in Brazil and the region with characteristics resembling the large innovation hotspots of the world The report also shows where São Paulo is in the global knowledge space and how it can leverage scientific production and global networks to upgrade into more complex technological activities The report also reviews the main innovation policies at national and subnational level which may
