Academics and practitioners from across Asia and beyond revisit the issues and impact of climate change in Asia They examine the preconditions for good governance regarding climate change and the role of state and non state actors in climate change governance and explore different political legal frameworks The Geopolitics of Australia's Regional Relations D. Rumley,2001-06-30 The origins of this book go back 30 years to the stimulation and interest generated by the political geography seminars led by John House at the University of Newcastle Upon Tyne I was very fortunate to graduate among its extremely capable sporty and enthusiastic class of 68 from where several academic geographers emerged Equally fortunately some of them and their predecessors had already blazed a trail to undertake graduate studies in Canada At the University of British Columbia I was supervised at different times by Julian Minghi and Victor Prescott both of whom are not only extremely capable academics but are also very fine people owe an enormous debt to John Julian and Victor and to the British and Canadian taxpayers who provided financial support for my University studies In 1974 I began an academic career at the University of Western Australia where I have been ever since save for a two year period from 1991 to 1993 as Professor of Australian Studies in the Department of International Relations at the University of Tokyo Viewing Australia and the Asia Pacific region from this different perspective within an extremely supportive Japanese environment had a profound impact I am especially grateful for the support provided by so many Japanese academic colleagues and friends beginning as early as 1976 Three individuals deserve special mention for their help guidance and enduring friendship George Ohshima Hiroshi Tanabe and Akihiro Kinda **International Law and Sustainable Development** Nico J. Schrijver,Friedl Weiss,2004-08-10

The concept of sustainable development has attracted considerable attention in recent years and has become of pivotal importance not only in scientific and political discourse but also increasingly in the practice of states and of relevant international organisations Since 1992 and within a remarkably short period of time sustainable development has been endorsed and recognised in a number of instruments of international law Thus it is incorporated in various environmental treaties as well as in international fisheries agreements the 1995 Agreement Establishing the World Trade Organisation WTO and EU law Sustainable development and related concepts also feature in a number of international judicial decisions of the 1990s for example those of the International Court of Justice and the WTO Appellate Body The chapters assembled in this book illustrate various aspects of efforts of policy makers regional and national interest groups to invoke and rely upon international law for the realisation of the objective of sustainable development They deal in particular with recent examples

of the practice of states and of relevant international organisations especially in such areas as international trade foreign investment regulation human rights and natural resources and waste management Furthermore some chapters are dedicated to a review of relevant practice at the regional and national level

Authoritarian Regionalism in the World of

International Organizations Anastassia V. Obydenkova,Alexander Libman,2019-05-02 The interconnection between international organizations IOs membership and democratization has become a topic of intense debate However the main focus of the literature so far has been on IOs created by democratic states and comprised mostly of democracies for examples the European Union In contrast to existing studies this book focuses on another group of regional IOs referred to as non democratic IOs which are organizations founded by autocracies How do these newly emerged organizations interrelate and interact with the outside world How do they counteract and confront the danger of democratization in their own member states and neighboring states This book aims to address these questions by developing a new theory of authoritarian regionalism and by combining both quantitative and qualitative analysis to test it The quantitative analysis uses a large dataset of all regional organizations worldwide for the post World War II period with the aim of defining historical trends in development and the modification of regionalism over the last seven decades 1945 2015 Qualitative analysis refines and develops the argument by looking at the case of post Soviet Eurasia The book uncovers a new type of regionalism authoritarian regionalism and traces its historical roots as well as its implications for modern politics The book is the first attempt to systematically investigate the functioning and the impact of authoritarian regionalism as a new phenomenon as well as its implications for democratization world wide The book contributes to the theory of regionalism international organizations studies of autocracies foreign policy and democratization world wide
