## **Sabah And Kota Kinabalu Travel Map:**

*Bradt Travel Guide - Borneo* Tamara Thiessen, 2008 Borneo's biodiversity is among the richest in the world. The first guide to focus on Malaysian Borneo and Brunei, this book gives full details on where and how to see the island's colourful flora and fauna. Tropical rainforest and rivers cover over 70% of Malaysian Borneo, and this lush habitat is home to hundreds of unique species, from the jelly green snake and bearded pig to the proboscis monkey. Trek through one of the region's national parks or catch a glimpse of an orang utan. Traditional rural lifestyles, tribal influences, and ethnic variety also offer the visitor a rewarding cultural experience. Take part in island festivities, spend the night in a longhouse or shop in the bustling markets. Borneo can provide for adventure travellers, divers, and even sunbathers. Over 27 000 UK visitors travelled to Borneo in 2007, up 10% on the previous year.

**Urban Forestry and Arboriculture in Malaysia** Sreetheran Maruthaveeran, Wendy Y. Chen, Justin Morgenroth, 2022-11-29 This book represents the latest research on urban forestry in a Malaysian context It demonstrates that urban forestry is concerned not only with environmental enhancement but also other aspects such as recreation health and well being and government policies This edited collection provides a comprehensive overview of urban forestry studies from various researchers in Malaysia and includes rich historical perspectives of urban forestry in the country It also tackles related issues in policy The greening of urban Malaysia in the 1970s focused primarily on beautification and was primarily the province of horticulturists landscapers nursery workers town planners and architects with negligible inputs from foresters particularly urban foresters Perhaps for that reason the term landscaping has been used more widely than urban forestry by government and private institutions politicians stakeholders academicians and the public Nevertheless the authors show that the concept of urban forestry is not new for developing countries such as Malaysia where urbanization is increasing at a rapid rate The book unpacks this demographic shift from a predominantly rural to a principally urban society As the only unified body of work on urban forestry and arboricultural studies in Malaysia this volume presents an important interdisciplinary reference for students researchers and scholars in physical geography forestry and urban forestry arboriculture and landscape architecture both in Malaysia and in other developing urbanizing countries particularly in Southeast Asia It is also an important resource for those working in environmental policy and practice excavating the vital connection between the environment and well being
