Bureau of the Census,1965 **Revolutionary Contagion and International Politics** Chad E. Nelson,2022 A unique theory of what happens when leaders fear a revolution abroad will spread to their own country and how that affects international relations When do leaders fear that a revolution elsewhere will spread to their own polities and what are the international effects of this fear In *Revolutionary Contagion* Chad E Nelson develops and tests a theory that explains how states react to ideological driven revolutions that have occurred in other nations To do this he analyzes four key revolutionary movements over two centuries liberalism communism fascism and Islamism He further explains that the key to understanding the response to revolutions lies in focusing on the extent to which leaders fear upheaval in their own countries According to the theory Nelson argues

fear of contagion is driven more by the characteristics of the host rather than the activities of the infecting agents In other words leaders will fear revolutionary contagion when they have significant revolutionary opposition movements that have an ideological affinity with the revolutionary state A powerful theory of the profound effects revolutions have on international relations this book shows why one simply cannot make sense of international politics including patterns of alliances and wars in certain situations without considering the fear of contagion

the experience of the periphery in a comparative context in the belief that the margins can often elucidate better the character of a phenomenon and de provincialize it from essentialist notions In doing so *The Lost World of Socialists at Europe's Margins* moves beyond the traditional historiographical emphasis on ideology by looking at different intersections or entanglements of spaces generations genders ideas and feelings and different flows of historical time The study provides a social and cultural history of early socialism in Eastern Europe with an emphasis on Bulgaria arguably the country with the earliest and strongest socialist movement in Southeast Europe and one that had a unique relationship to both German and Russian social democracy Based on a rich prosopographical database of around 3500 biographies of people born in the 19th century the book addresses the interplay of several generations of leftists looking at the specifics of how ideas were generated received transferred and transformed Finally the work investigates the intersection between subjectivity and memory as reflected in a unique cache of archival materials containing over 4000 documentary sources including diaries oral interviews and unpublished memoirs A microhistorical approach to this material allows the reconstruction of structures of feeling that inspired an exceptional group of individuals *Paul Lafargue and the Flowering of French Socialism, 1882-1911* Leslie Derfler, 1998-09-15 Lafargue disciple and son in law of Karl Marx helped found the first French Marxist party in 1882 and over the next three decades served as its chief theoretician and propagandist Here Derfler explores Lafargue's political strategies and his attempts to apply Marxist methods of analysis to anthropology aesthetics and literary criticism

Transatlantic Radicalism Frank Jacob, Mario Keßler, 2021-04-01 The Atlantic Ocean not only connected North and South America with Europe through trade but also provided the means for an exchange of knowledge and ideas including political radicalism Socialists and anarchists would use this radical ocean to escape state prosecution in their home countries and establish radical milieus abroad However this was often a rather unorganized development and therefore the connections that existed were quite diverse The movement of individuals led to the establishment of organizational ties and the import and exchange of political publications between Europe and the Americas The main aim of this book is to show how the transatlantic networks of political radicalism evolved with regard to socialist and anarchist milieus and in particular to look at the actors within the relevant processes topics that have so far been neglected in the major histories of transnational political radicalism of the late nineteenth and early twentieth centuries Individual case studies are examined within a wider context to show how networks were actually created how they functioned and their impact on the broader history of the radical Atlantic
