Committee on Nuclear Structures and Materials,1975 **Second ASCE Specialty Conference on Structural Design of Nuclear Plant Facilities, New Orleans, Louisiana December 8-10, 1975: Papers presented at the conference not available for publication prior to the conference** , Structures for Nuclear Facilities M.Y.H. Bangash,2011-08-05 This book provides a general introduction to the topic of buildings for resistance to the effects of abnormal loadings The structural design requirements for nuclear facilities are very unique In no other structural system are extreme loads such as tornadoes missile and loud interaction earthquake effects typical in excess of any recorded historical data at a site and postulated system accident at very low probability range explicitly considered in design It covers the whole spectrum of extreme load which has to be considered in the structural design of nuclear facilities and reactor buildings the safety criteria the structural design the analysis of containment Test case studies are given in a comprehensive treatment Each major section contains a full explanation which allows the book to be used by students and practicing engineers particularly those facing formidable task of having to design complicated building structures with unusual boundary conditions **NUREG/CR.
