The Rise of the New Second Generation Min Zhou, Carl L. Bankston, III, 2016-04-29 In this age of migration more and more children are growing up in immigrant or transnational families The new second generation refers to foreign born and native born children of immigrants who have come of age at the turn of the twenty first century This book is about this new generation in the worlds largest host country of international migration the United States Recognizing that immigration is an intergenerational phenomenon and one that is always evolving the authors begin by asking Do members of the new second generation follow the same pathways taken by the old second generation They consider the relevance of assimilation approaches to understanding the lived experiences of the new second generation and show that the demographic characteristics of today s immigrant groups and changing social economic and cultural contexts require new thinking and paradigms Ultimately the book offers a view of how American society is shaping the life chances of members of this new second generation and how today s second generation in turn is shaping a new America Designed as a rich overview for general readers and students and as a concise summary for scholars this book will be an essential work for all interested in contemporary issues of race ethnicity and migration

Rumbaut two of the leading figures in the field provide a close look at this rising second generation including their patterns of acculturation family and school life language identity experiences of discrimination self esteem ambition and achievement Based on the largest research study of its kind *Legacies* combines vivid vignettes with a wealth of survey and school data Accessible engaging and indispensable for any consideration of the changing face of American society this book presents a wide range of real life stories of immigrant families from Mexico Cuba Nicaragua Colombia the Dominican Republic Haiti Jamaica Trinidad the Philippines China Laos Cambodia and Vietnam now living in Miami and San Diego two of the areas most heavily affected by the new immigration The authors explore the world of second generation youth looking at patterns of parent child conflict and cohesion within immigrant families the role of peer groups and school subcultures the factors that affect the children s academic achievement and much more A companion volume to *Legacies* entitled *Ethnicities Children of Immigrants in America* was published by California in Fall 2001 Edited by the authors of *Legacies* this book will bring together some of the country s leading scholars of immigration and ethnicity to provide a close look at this rising second generation A Copublication with the Russell Sage Foundation

Identity and the Second Generation Faith G. Nibbs, Caroline B. Brettell, 2021-04-30 Most recently Americans have become familiar with the term second generation as it s

applied to children of immigrants who now find themselves citizens of a nation built on the notion of assimilation This common worldwide experience is the topic of study in Identity and the Second Generation These children test and explore the definition of citizenship and their cultural identity through the outlets provided by the Internet social media and local community support groups All these factors complicate the ideas of boundaries and borders of citizenship and even of home Indeed the second generation is a global community and endeavors to make itself a home regardless of state or citizenship This book explores the social worlds of the children of immigrants Based on rich ethnographic research the contributors illustrate how these young people the so called second generation construct and negotiate their lives Ultimately the driving question is profoundly important on a universal level How do these young people construct an identity and a sense of belonging for themselves and how do they deal with processes of inclusion and exclusion **The European Second**

Generation Compared Maurice Crul,Jens Schneider,Frans Lelie,2012-08-01 Based on data collected by the TIES survey in 15 cities across 8 European countries looks at the place and position of the children of immigrants from Turkey Morocco and the former Yugoslavia **Second-Generation Fiscal Rules** Luc Eyraud,Mr.Xavier Debrun,Andrew Hodge,Victor Duarte Lledo,Ms.Catherine A Pattillo,2018-04-13 Fiscal rule frameworks have evolved significantly in response to the global financial crisis Many countries have reformed their fiscal rules or introduced new ones with a view to enhancing the credibility of fiscal policy and providing a medium term anchor Enforcement and monitoring mechanisms have also been upgraded However these innovations have made the systems of rules more complicated to operate while compliance has not improved The SDN takes stock of past experiences reviews recent reforms and presents new research on the effectiveness of rules It also proposes guiding principles for future reforms to strike a better balance between simplicity flexibility and enforceability Read the blog **Second-Generation Memory and Contemporary Children's Literature** Anastasia

Ulanowicz,2013-09-02 Winner of the Children s Literature Association Book Award This book visits a range of textual forms including diary novel and picturebook to explore the relationship between second generation memory and contemporary children s literature Ulanowicz argues that second generation memory informed by intimate family relationships textual mediation and technology is characterized by vicarious rather than direct experience of the past As such children s literature is particularly well suited to the representation of second generation memory insofar as children s fiction is particularly invested in the transmission and reproduction of cultural memory and its form promotes the formation of various complex intergenerational relationships Further children s books that depict second generation memory have the potential to challenge conventional Western notions of selfhood and ethics This study shows how novels such as Lois Lowry s The Giver 1993 and Judy Blume s Starring Sally J Freedman as Herself 1977 both of which feature protagonists who adapt their elders memories into their own mnemonic repertoires implicitly reject Cartesian notions of the unified subject in favor of a view of identity as always already social relational and dynamic in character This book not only questions how and why second

generation memory is represented in books for young people but whether such representations of memory might be considered radical or conservative Together these analyses address a topic that has not been explored fully within the fields of children's literature, trauma and memory studies and Holocaust studies *The Position of the Turkish and Moroccan Second Generation in Amsterdam and Rotterdam* Maurice Crul, Liesbeth Heering, 2008 Annotation The Dutch second generation of Turkish and Moroccan origin is coming of age and making a transition from education to the labour market This first publication of the TIES Project Towards the Integration of the European Second Generation studies the social situation and views of this ethnic group drawing on the research carried out in Amsterdam and Rotterdam in 2006/07 among the Dutch born children of immigrants from Turkey and Morocco and a comparison group of young people age 18-35 whose parents were born in the Netherlands This title can be previewed in Google Books <http://books.google.com/books/vid/ISBN9789089640611> This title is available in the OAPEN Library <http://www.oapen.org> *Reframing Christian Education for a Global Generation* Heesung Hwang, 2024-09-24 This groundbreaking book serves as a case study delving into the unique challenges faced by the global generation as they navigate the complexities of their hybrid identities Heesung Hwang drawing from her extensive experience as both a minister and theologian presents a compelling vision for religious education inspired by the traditional Korean concept of madang In this open space faith communities gather to engage in communal interaction fostering generative environments where all members are valued and their contributions esteemed Through the lens of madang Hwang invites readers to reimagine religious education as a holistic experience that transcends traditional boundaries encompassing storytelling, conversation, play and relationship building This transformative work challenges religious educators to embrace innovative approaches that honor the diverse cultural and religious backgrounds of young people ultimately paving the way for redemptive communities that empower the next generation to shape new cultural and religious expressions within society Reframing Christian Education for a Global Generation promises to ignite important conversations and inspire meaningful change within faith communities worldwide **The Transformation of Australia's Population** Siew-An Khoo, Peter Francis McDonald, Siew-Ean Khoo, 2003 Transformation of Australia's population 1970-2030 **Learning a New Land** Carola Suárez-Orozco, Marcelo M. Suárez-Orozco, Irina Todorova, 2009-06-30 One child in five in America is the child of immigrants and their numbers increase each year Based on an extraordinary interdisciplinary study that followed 400 newly arrived children from the Caribbean, China, Central America and Mexico for five years this book provides a compelling account of the lives, dreams, academic journeys and frustrations of these youngest immigrants **The Spirit Moves West** Rebecca Y. More Richard Alba, Nancy Foner, 2015-04-27 An up to date and comparative look at immigration in Europe the United States and Canada Strangers No More is the first book to compare immigrant integration across key Western countries Focusing on low status newcomers and their children it examines how they are making their way in four critical European countries France Germany Great Britain and the Netherlands and across the Atlantic in the United States and Canada This systematic data rich comparison reveals their progress and the barriers they face in an array of institutions from labor markets and neighborhoods to educational and political systems and considers the controversial questions of religion race identity and intermarriage Richard Alba and Nancy Foner shed new light on questions at the heart of concerns about immigration They analyze why immigrant religion is a more significant divide in Western Europe than in the United States where race is a more severe obstacle They look at why despite fears in Europe about the rise of immigrant ghettos residential segregation is much less of a problem for immigrant minorities there than in the United States They explore why everywhere growing economic inequality and the proliferation of precarious low wage jobs pose dilemmas for the second generation They also evaluate perspectives often proposed to explain the success of immigrant integration in certain countries including nationally specific models the political economy and the histories of Canada and the United States as settler societies Strangers No More delves into issues of pivotal importance for the present and future of Western societies where immigrants and their children form ever larger shares of the population Hispanics and the Future of America National Research

Council, Division of Behavioral and Social Sciences and Education, Committee on Population, Panel on Hispanics in the United States, 2006-02-23 Hispanics and the Future of America presents details of the complex story of a population that varies in many dimensions including national origin immigration status and generation The papers in this volume draw on a wide variety of data sources to describe the contours of this population from the perspectives of history demography geography

education family employment economic well being health and political engagement They provide a rich source of information for researchers policy makers and others who want to better understand the fast growing and diverse population that we call Hispanic The current period is a critical one for getting a better understanding of how Hispanics are being shaped by the U S experience This will in turn affect the United States and the contours of the Hispanic future remain uncertain The uncertainties include such issues as whether Hispanics especially immigrants improve their educational attainment and fluency in English and thereby improve their economic position whether growing numbers of foreign born Hispanics become citizens and achieve empowerment at the ballot box and through elected office whether impending health problems are successfully averted and whether Hispanics geographic dispersal accelerates their spatial and social integration The papers in this volume provide invaluable information to explore these issues
