Encounters with the Posthuman and the Environment Inci Bilgin Tekin, Zeynep Talay Turner, 2024-10-29 With the advent of posthumanism many scholars in the humanities have started to explore a transforming conception of the human recognizing the limits of anthropocentrism both within and between disciplines Posthumanism may be defined in various ways but the emphasis in this volume is on the idea of constitutive alterity not simply in the relationship between human beings and other human beings but in that between human beings and other species and life forms and between human beings nature and technology As a result Encounters with the Posthuman and the Environment is located at a crossover between posthumanism and environmental humanities Between them they move not only between disciplines but also between levels of abstraction from the most general reflection to the most everyday empirical detail At the same time all the chapters are case studies whether they address particular aspects of philosophical or scientific posthumanism analyze particular pieces of film theatre art literature or recall for us instructive episodes from social history The aim at any rate is to give a feel for the range and depth of the posthumanist problematic within the wider context of environmental humanities

Trajectory of the 21st Century Lawrence J. Terlizese, 2009-01-10 Trajectory of the Twenty first Century explores what many prophets of the twentieth century such as Oswald Spengler Paul Tillich Aldous Huxley Jacques Ellul and others have predicted would transpire in the current century Their vision included an out of control technological system and a return to religious sentiment that will ultimately undermine the system to which it is reacting This book aims to accurately present their positions and draw certain logical conclusions from them that pertain to the course of history in our time The book's theme argues that modernity is a secularized version of millennial Christianity which reaches its fullest development in the twenty first century and will regress into what Russian philosopher Nicholas Berdyaev called the new Middle Ages or a new religious period This will

mean the twilight of modern technological society as its values of rationalism give way to a post-rationalist society Ironically decline will come through further technological advance Omnicide threatens through religious world war driven by transcendent values and modern weaponry Jihadist thinking and posthumanist technology both establish the omnicidal mentality New technologies such as genetic engineering and artificial intelligence created under millennial inspiration to reach for immortality could potentially bring an end to the human species either through a slow steady obsolescence or through environmental catastrophe The titanic forces of technological progress and regress are on a direct collision course in the twenty first century

Donawerth, 1997-04-01 Women Science fiction authors past and present are united by the problems they face in attempting to write in this genre an overwhelmingly male dominated field Science fiction has been defined by male centered scientific discourse that describes women as alien others rather than rational beings This perspective has defined the boundaries of science fiction resulting in women writers being excluded as equal participants in the genre *Frankenstein's Daughters* explores the different strategies women have used to negotiate the minefields of their chosen career they have created a unique utopian science formulated by and for women with women characters taking center stage and actively confronting oppressors This type of depiction is a radical departure from the condition where women are relegated to marginal roles within the narratives Donawerth takes a comprehensive look at the field and explores the works of authors such as Mary Shelley Marion Zimmer Bradley Ursula K Le Guin and Anne McCaffrey

Sport and Political Ideology John

Hoberman, 2014-06-30 Across the modern political spectrum left wing and right wing political theorists have invested sport with ideological significance That significance however varies distinctively and characteristically with the ideology a phenomenon John Hoberman terms ideological differentiation Taking this phenomenon as its point of departure this provocative work interprets the major sport ideologies of the twentieth century as distinct expressions of political doctrine Hoberman argues that a political ideology's interpretation of sport is shaped in part by the value it assigns to work and play as modes of experience the political anthropologies of right and left can be distinguished by examining their resistance to or affinity for sportive imagery of their leaders and of the state itself there exists a fascist temperament that shows an affinity to athleticism and the sphere of the body that is not shared by the left Tracing modern sport ideology back to its premodern antecedents Hoberman examines the interpretations of sport that have been promulgated by European political intellectuals such as cultural conservatives and contemporary neo Marxists and by the official ideologists of Nazi Germany the Soviet

Union the German Democratic Republic and China before and after Mao As a form of mass theater sport can advertise any ideology But the deeper relationship between sport and political ideology has never before been explored with such vigor Presenting the first general theory of sport and political ideology to appear in any language Hoberman's groundbreaking work is a unique and invaluable contribution to the intellectual and political history of sport in the twentieth century
