Rocks and Bottles E.S. Tasker, 2021-10-12 When the author sat down and began writing Rocks and Bottles his thoughts centered around the problems facing our society today He recognized that there were many within the society who had a tendency to blame one particular segment our law enforcement for much of what was going on Nothing could be further from reality than that belief Truth be known our law enforcement much like our society isn't perfect But without our law enforcement there would be no society worth having The demands placed on our police officers today are at times excruciating Theirs is a tough job It always has been Yes occasionally mistakes are made There is no excuse for those They are human beings just like you and me but with one exception they are each willing to sacrifice what some refer to as a normal life to protect the lives of others When reading the various chapters within Rocks and Bottles it is hoped that you the reader will gain a better perspective as to the type of person many officers are and that you will conclude

that they are very much like yourself *California. Supreme Court. system is idealistic security officer Leo Demidov a war hero who believes in the iron fist of the law But when a murderer kills at will and Leo dares to investigate the State's obedient servant finds himself demoted and exiled Now with only his wife at his side Leo must fight to uncover shocking truths about a killer and a country where crime doesn't exist The Secret Speech Soviet Union 1956 It is a period of wrenching change Stalin is dead and a regime once held together by fear is beginning to fracture creating a lawless society where the police have become the criminals and the criminals take vengeance against them A series of murders now has all of Moscow on edge and no one no matter how powerful or connected seems safe With his new and secretive homicide department Leo Demidov investigates only to find that he his wife and his two adopted daughters may be in grave danger For Leo is a former state security officer who arrested and condemned many of his fellow citizens and despite all his efforts to atone for his past he cannot escape the long shadow of his former career To save his family Leo must make a desperate choice and face an impossible journey that may bring his redemption or shatter their fragile future

Cowboys and Indians Gordon Sinclair, 1999 When J J Harper of the Island Lake Tribal Council was fatally shot on a wintry Winnipeg street in 1988 the city police department was quick to absolve the officer involved from all blame Less than a day after the shooting Police Chief Herb Stephen announced that Harper had died during a struggle for Constable Robert Cross's gun But the truth was not so cut and dried Far from closing the case Stephen's remarks were just the start of this dramatic tale of sex death threats flimsy charges and a police force so out of control that a prominent lawyer a senior Crown attorney and a respected journalist all had reason to suspect they were being watched by the police Pursued doggedly by Winnipeg Free Press columnist Gordon Sinclair Jr the stranger than fiction story of the shooting of J J Harper points a finger at the growing disaster of race relations and policing in Canada's inner cities

Technocrime Stéphane Léman-Langlois, 2008 This book is concerned with the concept of technocrime The term encompasses crimes committed on or with computers the standard definition of cybercrime but it goes well beyond this to convey the idea that technology enables an entirely new way of committing combating and thinking about criminality criminals police courts victims and citizens Technology offers for example not only new ways of combating crime but also new ways to look for unveil and label crimes and new ways to know watch prosecute and punish criminals Technocrime differs from books concerned more narrowly with cybercrime in taking an approach and understanding of the scope of technology's impact on crime and crime control It uncovers mechanisms by which behaviours become crimes or cease to be called crimes It identifies a number of corporate government and individual actors who are instrumental in this construction And it looks at the beneficiaries of increased surveillance control and protection as well as the targets of it Chapters in the book cover specific technologies e.g the use of CCTV in various settings computers hackers and security experts photo radar but have a wider objective to provide a comparative perspective and some broader theoretical foundations for thinking about crime and technology than have existed hitherto This is a pioneering book which advances our understanding of the relationship between crime and

technology drawing upon the disciplines of criminology political science sociology psychology anthropology surveillance studies and cultural studies *Stealing You Blind* K. A. Lorenz, 2015-05-04 When I started to write the novel NOTTINGHAM HARBOR it was to just be a fictional crime novel set in northern New England After working on the story and reading about the DNA analysis stories I realized the novel had a very significant purpose It was and is the story of how to catch serial rapist after law enforcement has the results from the DNA analysis The story is about a task force attempting to identify a number of rapist DNA does not identify the criminal The FBI maintains a database called CODIS This is a database of DNA of persons convicted of crimes Unless a person has been

convicted of a crime their DNA is NOT in CODIS The Author Jack Lorenz of NOTTINGHAM HARBOR fully agrees with this legal restriction When the DNA from the rape kits is determined very few of the results match the DNA in CODIS Rape is a unique type of crime Most criminals do NOT rape in addition to other crimes So very few rapist are in the CODIS database So in a number of jurisdictions where several hundred to a thousand rape kits have been analyzed only two or three rapist are identified The secondary problem is that the serial rapists move from jurisdiction to jurisdiction and only rape once in each jurisdiction It is very difficult to identify the rapist with the information from only one case Use of the physical characteristics of the criminal and the DNA must be used to tie cases together This is what the team of Mattie Greene the mathematics teacher and Sergeant Bill Simpson do in NOTTINGHAM HARBOR They find a common denominator between the cases with regard to the identity of the rapist Since rapists like other people must reside work eat and drink at physical places these types of information can be used to identify the specific person The techniques in the fictional story are the methods required in the real world to catch these dangerous criminals DNA will not catch but a few rapists There may be as many as 2000 rapists running around North America They rape randomly on the streets of this country and Canada The police and district attorneys in United States must work across jurisdictional lines as in NOTTINGHAM HARBOR Beside a good story the novel has a higher purpose It explains how to identify and catch these violent criminals The other fact about these criminals is some of them are murders in addition to being rapists If you are victim of a rape then you need to urge the local police to work with other jurisdictions and using technique similar those in NOTTINGHAM HARBOR identify and catch the rapist This is the purpose of the novel in addition to being a good story Enjoy the novel

Historical Climate Variability and Impacts in North America Lesley-Ann Dupigny-Giroux, Cary J. Mock, 2009-09-18

Climatologists with an eye on the past have any number of sources for their work from personal diaries to weather station reports Piecing together the trajectory of a weather event can thus be a painstaking process taking years and involving real detective work Missing pieces of a climate puzzle can come from very far afield often in unlikely places In this book a series of case studies examine specific regions across North America using instrumental and documentary data from the 17th to the 19th centuries Extreme weather events such as the Sitka hurricane of 1880 are recounted in detail while the chapters also cover more widespread phenomena such as the collapse of the Low Country rice culture The book also looks at the role of weather station histories in complementing the instrumental record and sets out the methods that involve early instrumental and documentary climate data Finally the book s focus on North America reflects the fact that the historical climate community there has only grown relatively recently Up to now most such studies have focused on Europe and Asia The four sections begin with regional case studies and move on to reconstruct extreme events and parameters This is followed by the role of station history and lastly methodologies and other analyses The editors aim has been to produce a volume that would be instrumental in molding the next generation of historical climatologists They designed this book for use by general researchers as well as in upper level undergraduate or graduate level courses
