Anishinaabe Ways of Knowing and Being Lawrence W. Gross, 2016-04-15 Very few studies have examined the worldview of the Anishinaabeg from within the culture itself and none have explored the Anishinaabe worldview in relation to their efforts to maintain their culture in the present day world This book fills that gap Focusing mainly on the Minnesota Anishinaabeg Lawrence Gross explores how their worldview works to create a holistic way of living However as Gross also argues the Anishinaabeg saw the end of their world early in the 20th century and experienced what he calls postapocalypse stress syndrome As such the book further explores how the values engendered by the worldview of the Anishinaabeg are finding expression in the modern world as they seek to rebuild their society

Approaches to Human Geography Stuart C. Aitken, Gill Valentine, 2014-12-01 The book covers some of the traditionally most obtuse and difficult to grasp philosophical ideas that have influenced geographers geography The fact that these are presented in an inclusive and accessible manner is a key strength Many students have commented that the

chapters they have read have encouraged them to read more in this field which is fantastic from a lecturer's perspective

Halper, 1993-01-01 This book uses the study of philosophical texts to raise and explore metaphysical issues On one level each essay addresses a scholarly issue in a classical text often a text of Aristotle's On a deeper level the issues Halper considers are metaphysical However unlike thinkers who have brought linguistic analysis and contemporary metaphysical notions to these texts Halper approaches them to find their formulations of issues and their strategies of pursuit Halper is not concerned with the defense of metaphysical commitments but with finding and exploring paths of metaphysical inquiry The essays in this volume are exploratory and exegetical rather than decisive Their contribution to metaphysics lies in the issues they raise the methods they explore and their conception of metaphysics as a discipline rooted in philosophical problems     Joining God in the Great Unraveling Alan J. Roxburgh, 2021-05-06 The awareness that the churches shaped out of the

European Reformations are in an advanced process of unraveling is becoming increasingly sensed by many This book proposes a way of addressing this unraveling based on the experiences and knowledge of people who have always had to struggle with the unraveling of their own communities and worlds It takes us outside the circular conversations of the Euro tribal churches into dialogue with people who have been marginalized to see how they have learned to reenter their formative stories to discover ways of remaking themselves in the unraveling The book then turns these discoveries into ways the churches can engage their own massive unraveling

*The Line through the Heart* J. Budziszewski, 2014-04-29 The suicidal proclivity of our time writes the acclaimed philosopher J Budziszewski is to deny the obvious Our hearts are riddled with desires that oppose their deepest longings because we demand to have happiness on terms that make happiness impossible Why And what can we do about it Budziszewski addresses these vital questions in his brilliantly persuasive new book *The Line Through the Heart* The answers can be discovered in an exploration of natural law a venture that with Budziszewski as our expert guide takes us through politics religion ethics law philosophy and more Natural law the author states plainly but provocatively is a fact about human beings as surely as we have hands and feet we have the foundational principles of good and evil woven into the fabric of our minds From this elemental fact emerges a natural law theory that unfolds as part of a careful study of the human person Thus Budziszewski shows natural law forms a common ground for humanity But this common ground is slippery While natural law is truly an observable part of human nature human beings are hell bent quite

literally on ignoring it The mere mention of the obligations imposed on man by his nature will send him into a rage In this sense The Line Through the Heart explores natural law as not simply a fact and a theory but also a sign of contradiction While investigating the natural law and its implications Budziszewski boldly confronts and offers a newly integrated view of a wide range of contemporary issues including abortion evolution euthanasia capital punishment the courts and the ersatz state religion being built in the name of religious toleration Written in Budziszewski's usual crystalline style The Line Through the Heart makes clear that natural law is a matter of concern not merely to scholars it touches how each of us lives and how all of us live together His profoundly important examination of this subject helps us make sense of why habits that run against our nature have become second nature and why our world seems to be going mad

**Aristotle on Knowledge and Learning** David Bronstein, 2016-03-25 All teaching and all intellectual learning come to be from pre-existing knowledge So begins Aristotle's Posterior Analytics one of the most important and difficult works in the history of western philosophy David Bronstein sheds new light on this challenging text by arguing that it is coherently structured around two themes of enduring philosophical interest knowledge and learning The Posterior Analytics on Bronstein's reading is a sustained examination of scientific knowledge what it is and how it is acquired Aristotle first discusses two principal forms of scientific knowledge epistēmē and nous He then provides a compelling account in reverse order of the types of learning one needs to undertake in order to acquire them The Posterior Analytics thus emerges as an elegantly organized work in which Aristotle describes the mind's ascent from sense perception of particulars to scientific knowledge of first principles Bronstein also highlights Plato's influence on Aristotle's text For each type of learning Aristotle discusses Bronstein uncovers an instance of Meno's Paradox a puzzle from Plato's Meno according to which inquiry and learning are impossible and a solution to it In addition he argues against current orthodoxy that Aristotle is committed to the Socratic Picture of inquiry according to which one should seek what a thing's essence is before seeking its demonstrable attributes and their causes Aristotle on Knowledge and Learning will be of interest to students and scholars of ancient philosophy epistemology or philosophy of science

**Being Another Way** Dustin Klinger, 2024 In Being Another Way Dustin Klinger recounts the history of how medieval Arabic philosophers in the Islamic East grappled with the logical role of the copula to be an ambiguity that has bedeviled Western philosophy from Parmenides to the analytic philosophers of today Working from within a language that has no copula a group of increasingly independent Arabic philosophers began to critically investigate the semantic role that Aristotle for many centuries their philosophical authority invested in the copula as the basis of his logic Drawing on extensive manuscript research Klinger breaks through the thicket of unstudied philosophical works to demonstrate the creativity of postclassical Islamic scholarship as it explored the consequences of its intellectual break with the past Against the still widespread view that intellectual ferment all but disappeared during the period he shows how these intellectuals over the centuries developed and refined a sophisticated philosophy of language that speaks to core concerns of contemporary
