Street Urchins, Sociopaths and Degenerates David Floyd, 2014-02-15 From the notable emergence of orphan figures in late eighteenth century literature through early and middle period Victorian fiction and as this book argues well into the fin de siècle this potent literary type is remarkable for its consistent recurrence and its metamorphosis as a register of cultural conditions The striking ubiquity of orphans in the literature of these periods encourages inquiry into their metaphoric implications and the manner in which they function as barometers of burgeoning social concerns The overwhelming majority of criticism focusing on orphans centres particularly on the form as an early to middle century convention primarily found in social and domestic works in effect the non traditional aberrant at times Gothic orphan of the fin de siècle has been largely overlooked if not denied outright This oversight has given rise to the need for a study of this potent cultural figure as it pertains to preoccupations characteristic of more recent instances This book examines the noticeable difference between orphans of genre fiction of the fin de siècle and their predecessors in works including first wave Gothic and the majority of Victorian fiction and the variance of their symbolic references and cultural implications
